AT the latter end of the previous week a fierce cyclone passed through Orissa, and then recurving in a north-easterly direction, passed through South and East Bengal into Sylhet and Upper Burma. On the last day of that week, however, the storm was advancing from Sylhet towards Upper Burma, and by the morning of the 8th it had practically entirely ceased to exist, though there were feeble indications of a low pressure area still existing in Upper Burma and Assam. Considering the fierceness of the storm, the amount of rainfall brought up by it was less than usual. except in Orissa, where it was exceedingly heavy, and in its passage through Bengal generally only light to moderate rain was received. Another rather remarkable feature in connection with the storm was the rapidity with which the disturbed weather which accompanied it disappeared and was replaced by fine settled weather of the ordinary cold season type. So rapid, indeed, had been this change, that by the morning of the 8th. or the first day of the present week, fine weather with almost cloudless skies was reported from all districts except Assam, and only at one or two stations, such as Sibsagar, Bhogotpore and Gopalpore, was any rain received. The meteorological changes during the next two or three days were not important ; on the 9th pressure rose in the northern and western districts and fell at the south-eastern stations, and the pressure distribution became that which is usual in the cold-weather months; temperature commenced to fall, while humidity also decreased, and the air became dry: the sky was practically cloudless, and no rain was reported On the 10th pressure decreased slowly, while the temperature and humidity changes were variable, weather continued fine, and rainfall was entirely absent On the 11th the changes were very small and quite unimportant, but on the 12th certain changes had occurred in the Bay, which immediately made themselves felt in the weather conditions of Bengal On the 12th there were clear indications that another barometric depression had formed in the Bay to the south-west of Diamond Island or to the west of the Andamans, and so far as could be ascertained from the observations made at the coast stations, it was giving squally unsettled weather over the centre and south of the Bay. Indeed all the conditions pointed to the possibility of formation of another cyclonic storm Immediately with the occurrence of the disturbance in the Bay, the sky commenced to cloud over in all districts of the province except Behar and part of North Bengal. A few light showers were also reported in East Bengal, principally from the Chittagong district, but the only falls of importance were 0·90 inch at Rangamati and 0·66 inch at Satkanya. Over Bengal generally temperature rose rather rapidly and humidity also increased largely, while the barometer fell steadily, but not by more than about 0·03 inch to 0·04 inch. On the 13th the depression to the west of the Andamans appeared to have slowly increased in intensity, but its position was unchanged, and on this day it was certainly influencing the weather in Bengal very largely. The sky became heavily clouded in all districts except Behar, Chutia Nagpur and Orissa, the air became very damp, and numerous showers were reported in parts of East and South-West Bengal, particularly in the Furreedpur, Dacca, Tipperah, Jessore, Khoolna and Nuddea districts Temperature also again increased and became above the normal by amounts which were usually between 3° and 5°, while pressure again fell moderately over the whole Province. From the 13th to the 14th the depression appears to have decreased in intensity rather rapidly, and it must have broken up to a considerable extent. It also probably moved slowly in a westerly direction, and perhaps existed in the centre of the Bay, too far from the coast observatories to give any very definite indication of its existence The weather conditions in Bengal at once began to improve slightly on this day, and except for a few local showers, rainfall almost ceased. The sky, however, still remained moderately to heavily clouded, while temperature and humidity were decidedly high, but pressure had only fallen extremely slowly. Conditions therefore in Bengal remained rather disturbed up till quite the close of the week, though they were less disturbed on the 14th than they had been on the 12th and 13th, and there were also indications that the disturbed conditions were passing away rather rapidly.

Pressure.—The mean pressure for the week has been below the normal by small amounts generally averaging one or two hundredths of an inch in the southern and south-western districts, but at many of the northern and eastern stations an almost corresponding excess has been registered. For the whole province, therefore, the mean pressure for the week has been almost normal. In Assam also the mean pressure for the week has been only 0·003" in defect of the normal.

Temperature.—Owing to the influence of the disturbed weather in the Bay, the temperature of Bengal for the second half of the week was unusually high. The mean temperature has therefore been in excess of the normal in all districts except Orissa, the excess equalling between 1° and 2° in North Bengal, South Behar and Chutia Nagpur, while in South-West and East Bengal and in North Behar it has been rather less than 1°. In Orissa, on the other hand, there has been a defect of 0·9°. For the whole Province the mean temperature for the week has been about 0·8° in excess of the normal. In Assam the excess has only equalled 0·3°.

Rainfall.—The only districts that have received rainfall of any importance during the week have been Chittagong Hill Tracts, Chittagong, Dacca, Noakhally, Jessore, Khoolna, and

Nuddea, which have received falls averaging from one inch to about a tenth, while slight falls also have been received in 24-Pergunnahs, Tipperah, Backergunge, Furreedpore and Bogra. Elsewhere practically the whole province has been rainless.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 14th of November 1891 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th Oct. 1891.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; ≡, fog; o overcast; d drizzling rain.

OFFICIAL PAPERS.

CONTENTS.

REPORT ON THE STATE OF THE SALT MARKET FOR SECOND QUARTER 1891-92.

No. 809B, dated Calcutta, the 14th November 1891.

From—T. INGLIS, ESQ., Offg. Secretary to the Board of Revenue, L.P.,
To—The Secretary to the Government of Bengal, Financial Department.

SALT.

A. SMITH, ESQ.

I AM directed by the Board of Revenue to submit the following report on the state of the salt market for the second quarter of 1891-92, comprising the months of July, August, and September 1891.

2. The quantity of salt of every description cleared during the quarter under report amounted to 27,39,377 maunds 10 seers 14 chittacks, against 27,65,043 maunds 1 seer 11 chittacks in the previous quarter, and 25,14,577 maunds 20 seers 8 chittacks in the corresponding quarter of the previous year; and the net amount of duty levied thereon was Rs. 63,81,532-8, against Rs. 65,36,650 in the previous quarter and Rs. 58,64,525-11 in the corresponding quarter of the previous year.

3. The quantity of excise salt sold in Orissa during the quarter under review and the quantity which remained in store at the close of the quarter are shown in table I:—

TABLE I.

	Cuttack.	Pooree.	Balasore.
		MDS. S.	MDS. S.
Balance at close of the last quarter	......	48,784 20	501 0
Manufactured or added during the quarter	......	8,554 0	431 0
Total ...	......	57,338 20	932 0
Sales during the quarter	......	3,349 0	......
Wastage	......	492 0	......
Total ...	......	3,841 0	......
Balance at close of the quarter	......	53,497 20	932 0

4. The total sale of excise salt during the quarter under review amounted to 3,349 maunds, against 8,005 maunds in the previous quarter, and 36,102 maunds 20 seers in the corresponding quarter of the previous year. The total amount of excise salt cleared, *i.e.*, on which duty was paid during the quarter, was 3,275 maunds. The figures in the table shown in the last paragraph are for the salt removed from the golahs.

5. The subjoined table shows in comparison the importations into the port of Calcutta and the total clearances of sea-imported salt during the quarter under review and the corresponding quarters of the previous two years :—

No transactions in sea-imported salt have been reported for the quarter from the ports of Cuttack, Pooree, and Balasore.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 21st November, 1891.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
BURDWAN DIVN.			
1	Burdwan Nov. 21, '91 Culna ... Cutwa ... Raneegunge ...	Nil Nil Nil Nil	Weather—cool mornings and evenings. Prospects of early winter in Sudder subdivision not good. Sugarcane fair. Rice selling at from 14 to 16 seers per rupee.
2	Bankoora „ 21, '91	Nil	Weather—seasonable. *Aman* coming to maturity. Harvesting of early winter paddy continues Sowing of *rabi* in progress. Sugarcane doing well. Condition of cattle good and supply of fodder sufficient. Common rice selling at 15½ seers per rupee at Bishenpore and 17 seers at Sudder station.
3	Birbhum „ 21, '91 Rampore Haut ...	Nil Nil	Weather—cool and a little cloudy now and then, but no rain. No rain can be of any use now. Rice crops on low lands in good condition; those on high lands have been injured by drought. Outturn expected to be 12 to 14 annas of an average crop all round. Fodder and water plentiful. Price of common rice stationary.
4	Midnapore „ 21, '91	Nil	Weather—fair: getting cooler every day. Prospects of winter paddy crop not bright except in Contai. Indigo doing tolerably well. Cow-pox is still reported. Fodder plentiful. Prices of common rice— Srs. Sudder ... ... 16 } Contai ... ... 18 } per rupee. Tumluk ... ... 16 } Ghatal ... ... nearly 16 }
5	Hooghly „ 21, '91 Serampore ... Jehanabad ...	Nil 0·01 Nil	Weather—fair and cool. Winter rice crop not expected to be more than 8 annas. Sugarcane reported to be in good condition. Fodder and water-supply sufficient. Prices of common rice— Srs. Sudder ... ... 13 } Serampore ... ... 13 } per rupee. Jehanabad ... ... 16 }
6	Howrah „ 21, '91 Uluberia ...	Nil Nil	Weather—not quite so cold as the season would warrant. Paddy on high lands somewhat damaged; otherwise prospects favourable. *Rabi* crops being sown. Fodder and water-supply adequate. Condition of cattle good. Price of common rice 14 seers 12 chittacks per rupee.
PRESIDENCY DIVN.			
7	24-Perghs. „ 24, '91	Nil	Weather—seasonable. *Aman* in ear and prospects unchanged. *Rabi* cultivation not yet finished. Prices stationary. Cattle-disease gradually diminishing. No deficiency of fodder or want of water reported.
8	Nuddea „ 21, '91 Kushtea ... Meherpore ... Chuadanga ... Ranaghat ...	Nil Nil Nil Nil Nil	Weather—seasonable. Harvesting of *aman* going on; outturn not expected to be more than 3 annas. Prospects of winter crops bad owing to continued drought. Common rice selling at from 12 seers 12 chittacks to 15 seers per rupee. Condition of cattle good and supply of fodder and water sufficient.
9	Khoolna „ 21, '91 Bagirhat ... Satkhira ...	Nil 0·16 0·30	Weather—fair and cool. Prospects of *aman* good in the Bagirhat and Satkhira subdivisions, but not so in the Sudder subdivision. Fodder and water sufficient. Price of common rice 14 to 15 seers per rupee.
10	Jessore „ 21, '91 Jhenidah ... Magura ... Narail ... Bongong ...	Nil 0·03 0·06 0·02 0·09	Weather—cool. Outturn of *aman* paddy throughout the district will be much below the average. Recent rain was too insufficient to do any good except in Narail subdivision. *Chotan* paddy is now being harvested, but the crop is thin. Prospects of *rabi* crops fair. Supply of water and fodder sufficient.
11	Murshedabad „ 23, '91	Nil	Weather—bright and cool. Prospects of winter rice improved. *Rabi* crops are being sown. *Kalai* thriving. Fodder obtainable for cattle.
CHITTAGONG DIVN.			
12	Chittagong ...		Report not received.
13	Noakhally „ 21, '91	0·34	Weather—seasonable. *Rajasail* rice is being reaped. Sowing of *rabi* crops continues. Outturn of betelnuts estimated to be 15 annas. Condition of cattle, and fodder and water-supply, good. Price of common rice 15 seers per rupee.
14	Tipperah „ 21, '91	Nil	Weather—seasonable. Prospects of *aman* fair. Fodder sufficient. No cattle-disease reported in any part of the district. Jute market brisk.
15	Chittagong Hill Tracts. „ 20, '91	Nil	Weather—seasonable. Gathering of cotton still continues. Late plough-paddy in flower. Mustard and other cold-weather crops are being sown and transplanted. Common rice is being sold at 11 seers 6¼ chittacks per rupee.

No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.—*concluded.*				
DACCA DIVN.				
16	Dacca	Nov. 21, '91	0·37	Weather—seasonable. Prospect of *aman* on low lands fair, but the crop on high lands has been partially damaged. Prospects of *rabi* crops fair. Recent showers have done much good to standing crops, especially to paddy. Condition of cattle good. Fodder available. Common rice selling at 13 to 16 seers per rupee.
17	Furreedpore	" 21, '91	Nil	Weather—cool. State of crops fair. Harvesting of *aman* commenced. Sowing of winter crops in progress. Rice selling at 16, 14 to 16, and 16¼ seers per rupee at Sudder, Goalundo and Madaripore respectively.
18	Backergunge	" 21, '91	0·81	Weather—seasonable. Prospects of crops good in the Patuakhali and Perozepore subdivisions, but not so in the Sudder and Bhola subdivisions. Price of common rice varies from 12 to 17 seers per rupee. Supply of fodder and water sufficient except in parts of the Sudder subdivision. Cattle-disease reported.
19	Mymensingh	" 21, '91	Nil	Weather—moderately cold and seasonable. Prospects of winter crops fair. Rice selling at 13¼ seers per rupee. Condition of cattle good. Sufficient supply of water and fodder.
RAJSHAHYE DIVN.				
20	Dinagepore Thakurgaon	" 21, '91 ...	Nil Nil	Weather—bright and cool. Prospects of winter rice bad. Cultivation of *rabi* still going on. Price of rice both at Sudder and Thakurgaon stationary. Condition of cattle good. Fodder and drinking water sufficient.
21	Rajshahye Nattore Nowgong	" 21, '91	Nil Nil Nil	Weather—seasonable. Condition of *aman* continues the same. Prospect of *rabi* favourable. Land is being prepared for sowing of *rabi* crops. Prospect of ganja good. Price of common rice ranges from 11 to 15 seers per rupee. Condition of cattle good. Fodder and water sufficient.
22	Rungpore Gaibanda Nilphamari Kurigram	" 21, '91	Nil Nil Nil Nil	Weather—cool with occasional clouds. Prospects of *aman* unchanged. Mustard, potato and tobacco doing well. Rice selling at from 8½ to 12 seers per rupee. Fodder and water sufficient.
23	Bogra Sherpur Nowkhilla	" 21, '91	Nil Nil Nil	Weather—seasonable. Harvesting of *aman* commenced. *Rabi* crops promising. 14 annas outturn of *aman* expected. No want of fodder and water. Common rice selling at 14 seers a rupee.
24	Pubna	" 21, '91	Nil	Weather—fine and cool. *Aman* paddy is being reaped and is estimated to yield an outturn of 10 annas. *Rabi* crops doing well. Price of common rice 13 seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.
25	Darjeeling	" 21, '91	0·01	Weather—fair. *Haimanti* rice progressing; want of rain has made the produce less. *Kalai* progressing favourably. *Marua* flowering in some places and coming to perfection. Fodder and water-supply sufficient. Prices of common rice— Srs. Silliguri ... ... 11 Kurseong ... ... 10 Naxalbari ... ... 10 Kalimpong ... ... 9 Darjeeling ... ... 9 per rupee. Pulbazar ... ... 11 Sonadah ... ... 10 Jore Bungalow ... ... 10 Nagri 8
26	Julpigoree	" 21, '91	Nil	Weather—seasonable. Prospect of *haimanti* paddy not good for want of rain. *Rabi* crops promising. Common rice sells at 10 seers per rupee. Fodder and water-supply sufficient. No cattle-disease.
BEHAR.				
BHAGULPORE DIVN.				
27	Monghyr Beguserai Jamui	" 21, '91	Nil Nil Nil	Weather—bright with clouds intervening. *Rabi* crop as far as sown is yet promising, but rain is urgently wanted. Prices of common rice varying from 11 to 14 seers per rupee. No cattle-disease. Fodder and water sufficient.
28	Bhagulpore	" 21, '91	Nil	No rain. Prospects of *aghani* rice not altered. Those of *rabi* not favourable. Fodder plentiful. No cattle-disease.
29	Purneah Kishengunge Arrareah	" 21, '91	Nil Nil Nil	Weather—becoming cooler, but still hot in the day. Rain still urgently wanted everywhere for *rabi* crops; those sown early so far doing well. A larger amount of land sown with *rabi*, especially *kurthi* and wheat. In Arrareah price of rice shows a tendency to fall; in other parts it is stationary. Fodder and water-supply sufficient.
30	Maldah Chanchal Shibgunge Gajole	" 21, '91	Nil Nil Nil Nil	Weather—seasonable. Prospects of winter rice not improved for want of rain; outturn expected to be 6 to 8 annas. *Kalai* and others winter crops thriving. Common rice sells at from 12 to 15 seers per rupee. Supply of fodder and water plentiful. Condition of cattle good.
31	Sonthal Perghs.	" 21, '91	Nil	Weather—seasonable. Harvesting of paddy has commenced. Outturn estimated to be 8 annas in Deoghur, 10 annas in Godda, and 8 annas in Rajmehal. Taking the district as a whole, the average yield will be about 12 annas. Price of commun rice 16 seers per rupee. Fodder and water-supply sufficient.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BEHAR—(concld.)			
Patna Division.			
32	Patna Nov. 21, '91 Barh ... Dinapore ... Hilsa ...	Nil Nil Nil Nil	Weather—seasonable. *Rabi* sowings progressing slowly for want of rain. Paddy that has survived is being harvested in places. Opium sowings in progress. Rain badly wanted for all of these crops. Prices almost stationary
33	Gya " 21, '91	Nil	Weather—fair. Paddy harvest commenced. Sowing of *rabi* and poppy still going on in some places. Prices of food-grains almost stationary. Supply of fodder and water for cattle yet sufficient.
34	Shahabad " 21, '91 Buxar ... Bhabuah ... Sasseram ...	Nil Nil Nil Nil	Cold weather has set in. *Rabi* crops damaged by insects are being resown. These crops generally are thriving. But rain is very much wanted in tracts not reached by the canal system. Artificial irrigation is largely had recourse to. Prices rising slowly in the west of the district. Fodder abundant.
35	Durbhunga " 21, '91	Nil	Weather—getting colder. There can be no improvement in prospects without rain. Paddy is getting into ear. Lands are being prepared for indigo. High land paddy everywhere withered or withering. Condition of cattle good. Fodder and water plentiful.
36	Mozufferpore " 21, '91 Sitamarhi ... Hajipore ...	Nil Nil Nil	Weather—seasonable. *Sudder subdivision*—Rain urgently wanted for rice, poppy and *rabi* crops. Estimated outturn of rice crop 5 annas. *Hajipur subdivision*—Paddy flowering, but withering for want of rain; estimated outturn 3 annas. *Rabi* withering in some places for want of moisture. Other standing crops in good condition. *Sitamarhi subdivision*—Paddy is being cut in several places for cattle. Estimated outturn for the whole subdivision 7 annas. *Rabi* sowings nearly completed. Sugarcane and *rahar* good everywhere. Fodder and water for cattle sufficient. Prices of common rice— Srs. Sudder .. .. 12 } Hajipore ... ... 13 } per rupee. Sitamarhi ... ... 14 } Prices of indian-corn— Sudder ... ... 20 } Hajipur ... ... 21 } per rupee. Sitamarhi ... . 21½ }
37	Sarun " 21, '91	Nil	Weather—fine and dry; warm for the time of the year. *Rabi* crops germinating well. Supply of fodder and water sufficient. Prices of common rice— Srs. Sudder ... ... 13 } Sewan ... ... 16 } Per rupee. Gopalgunge ... ... 12 }
38	Chumparun " 21, '91	Nil	Weather—seasonable. *Rabi* crops are being sown. State of standing crops fair. Supply of fodder and water for cattle plentiful.
ORISSA.			
Orissa Divn.			
39	Cuttack " 21, '91	Nil	Weather—seasonable. *Laghu* paddy is being harvested. Prices of common rice stationary. More rain wanted in parts of Banki for *sarad* crop.
40	Pooree " 19, '91 Khurda ... Banpur ...	Nil Nil Nil	Weather—seasonable. *Laghu* rice being reaped. *Sarad* in ear and in fair condition. Common rice sells at from 12 seers 8 chittacks to 19 seers per rupee.
41	Balasore " 21, '91	Nil	Weather—seasonable. Harvesting of winter rice commenced. Extent of *biri, mung,* and mustard sowings estimated to be 16 annas. Rice sells at Balasore 19 seers per rupee and at Bhadrak 21 seers.
CHOTA NAGPORE.			
South-West Frontier Agency.			
Chota Nagpore Divn.			
42	Hazaribagh Nov. 21, '91 Giridih ...	Nil Nil	Weather—seasonable. Harvesting of paddy continues. Rain wanted for *rabi* crops; 14 annas of the poppy crop sown and seeds germinated strongly. Common rice selling at from 12 to 16 seers per rupee. Fodder and water-supply sufficient. Cattle-disease reported from Symiria thana.
43	Lohardugga " 21, '91 Palamow (up to 16th) ...	Nil Nil	Weather—a little cloudy. Harvesting of winter rice continues. Rain badly wanted for *rabi* crops. Price of common rice 15 seers per rupee. Ample fodder and water for cattle.
44	Singbhoom " 21, '91	Nil	Weather—cloudy. Prospects good. Winter rice is being harvested with an outturn of 16 annas. No change in prices.
45	Manbhoom " 21, '91 Govindpore ...	Nil Nil	Weather—seasonable. Prospects of crops continue satisfactory. Rice selling at from 14 to 20 seers per rupee.

Published for general information.

* Mean of 6 days.

Explanation.—*Summary.*—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fall.

for the week ending Saturday, the 21st of November 1891.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. RAINFALL. Of week. Mean for district.	Of week. Normal mean.	Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 16th October 1891. Mean for district.	Since 16th October 1891. Normal mean.	Since 16th October 1891. Variation.	Of week. Average number of rainy days.	Of week. Normal number of rainy days.	Representative station.	District.	Meteorological Division.

Explanation.—......indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the 24th November* 1891.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 21ST OF NOVEMBER 1891.

THE weather conditions in Bengal at the close of the previous week had been distinctly disturbed owing to the formation of a barometric depression in the centre of the Bay, and on the 13th, when the depression was fairly well marked, cloudy weather with rain and unusually high temperature and humidity prevailed in the south of the province. The depression in the Bay, however, filled up almost entirely on the 14th, or the last day of the previous week, and thus weather began rapidly to improve in Bengal, and the sky cleared to a large extent, though still a few local rain-showers fell at some of the stations in East Bengal, and which falls were reported on the morning of the 15th instant. With the commencement of more settled weather pressure rose rapidly in Bengal, the increase on the 15th at some stations exceeding a tenth of an inch, while temperature on the other hand commenced to fall. Light north-easterly and northerly winds set in over the greater part of the province except the extreme western stations, where more or less southerly winds were blowing. The disturbed conditions in the province indeed had so rapidly disappeared, that at almost all stations the sky had become nearly cloudless, and at the same time humidity decreased and the air became generally fairly dry, so that from this day practically ordinary cold weather or north-east monsoon conditions had again set in over the province. The meteorological changes in Bengal on the next three days were unimportant; on the 16th pressure rose slowly and temperature continued to fall rather rapidly; on the 17th pressure had commenced to fall moderately, and there was a slight further fall of temperature; on the 18th pressure had commenced to rise very slowly, but the slow fall of temperature continued except at some of the central and northern stations. To the east of the centre of the Bay, however, on this day there were distinct indications of the formation of a new depression and strong easterly winds set in at Diamond Island, pointing to the existence of squally or somewhat stormy weather in the eastern part of the southern half of the Bay, or perhaps to the existence of a feeble storm between the Andamans and the Madras Coast. The indications of the existence of this depression were more marked on the morning of the 19th, but the depression did not on this occasion concentrate to form a definite storm, for on the 20th it had practically disappeared, and on the 21st there was again no indication of the existence of any definite depression or storm, though probably squally weather generally obtained in the south of the Bay. The unsettled weather in the Bay as usual affected the weather in Bengal, and pressure fell moderately to rapidly on the 19th and the 20th, though there was a slight rise on the 21st. Wind directions on the whole were almost unchanged except on the 19th, when they became more southerly. Temperature, however, on the 19th rose decidedly, the increase being from 1° to 2°, but on the 20th and 21st there was on the whole a fall. The sky became a little more clouded and humidity a little higher, but except for a few drops of rain at Cox's Bazar and Darjeeling, the whole province remained rainless. The cold weather conditions have therefore not been very strongly developed in Bengal during the week under review, and weather has been for a part of it again distinctly disturbed.

Pressure.—The mean pressure of the province for the week has been generally below the normal by from one to three hundredths of an inch, but the variations have been somewhat irregular. The defects at the western stations have been generally rather larger than those over the eastern half of the province, where at some stations such as Comilla, Burisal, Furreedpore, and Julpigoree pressure has been almost normal.

Temperature.—The mean temperature has been above the normal in all districts except Orissa, where a defect of 1·4° has been registered. In South-West, East and North Bengal the excess has equalled about one degree, and in Chutia Nagpur and North Behar about one-and-a-half degrees. The largest excess has, however, been registered in South Behar, where it has equalled no less than 3°. For the whole province the mean temperature for the week has been above the normal by about one degree.

Rainfall.—The only stations at which falls in excess of a tenth of an inch have been received during the week have been Perozepore, Burisal, Noakhally, Dacca, Brahmanberiah and Buxa. Elsewhere the whole province has been practically rainless.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 21st of November 1891 :—

Meteorological Divisions.	Temperature.						Rainfall.

The average fall of the corresponding period for 24 years, S.-G.'s Office ...	0·03
The total fall from 1st January to 21st November 1891	46·93
The average fall of the corresponding period for 24 years, S.-G.'s Office ...	65·14

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew.

C. Little,

For Meteorological Reporter to the Govt. of India.

Meteorological Office, Govt. of India;

Calcutta, the 23rd November 1891.

Statement showing the Results of the Registration of Births and Deaths in the principal Municipalities in Bengal during the week ending with Saturday, the 31st October 1891.

ACTION TAKEN UPON THE RECOMMENDATIONS OF THE POLICE REFORM COMMITTEE.

No. 4226J.

RESOLUTION.

POLICE.

Motihari, the 28th November 1891.

READ—

Resolution of this Government, dated 24th September 1891, appointing a Committee consisting of Mr. J. Beames, C.S., Mr. J. F. Stevens, C.S., and Mr. J. C. Veasey, C.S., to collect information regarding the reform of the Police in these Provinces.

Read also—

Letters Nos. 27, 31 and 35, dated 1st, 5th, and 19th December 1890, adding Raja Peary Mohan Mookerjee, C.S.I., Mr. E. R. Macnaghten and Mr. H. H. Risley, C.S., to the Committee, and appointing Mr. Risley as Secretary.

Read also—

The Report of the Committee.

In the Resolution cited in the preamble, it was stated that the Lieutenant-Governor, after examining, in compliance with the instructions of the Government of India, the statistics of crime cognizable by the Police reported and disposed of in Bengal during the years 1878—1888, had come to the conclusion that although crime generally was not positively great in Bengal and was decreasing relatively to the increase of population, yet certain offences showed a tendency to increase; that an unduly large proportion of the crime actually occurring was not brought to the notice of the Police or of the Magistrates and was therefore never enquired into; that the Police enquiry into a large number

of the cases taken up was fruitless, such cases never coming before the Courts, and that a disproportionable number of the persons brought before the Courts were acquitted. The Governor-General in Council, on considering the special reports of this and the other Local Governments on the subject, thought it advisable not to appoint a General Commission to investigate the problem of Police reform throughout India, for the reason that the conditions under which the administration of different Provinces is carried on vary so much that practical results are likely to be attained only by concentrating attention on local circumstances and requirements. It was accordingly left to the Lieutenant-Governor, if he should see fit, to convene a Provincial Committee. Being of opinion that it was evidently necessary to enquire minutely into the causes of the imperfections admitted to exist, and to ascertain by what means whether legislative or executive, remedies capable of being made practically effective could be devised and applied, Sir Steuart Bayley decided to appoint a Committee, consisting of experienced officials from both the Executive and Judicial branches of the service, and of gentlemen representing the views of the public. Mr. J. Beames, Commissioner of Bhagulpur, who was appointed the President of the Committee, entered upon his duties on the 20th August 1891. Mr. J. F. Stevens, Judge of Gya, and Mr. J. C. Veasey, Inspector-General of Police, joined him at the beginning of October. Raja Peary Mohun Mukherjea, a large zemindar, was added to the Committee on the 1st December, Mr. E. R. Macnaghten, Secretary of the Behar Planters' Association, joined it on the 16th idem, and Mr. H. H. Risley, C.S., acted as Member and Secretary from the 17th idem. After examining a number of witnesses, and discussing the written and oral evidence and other materials before them, the Committee submitted their Report on the 26th February 1891.

2. Since the receipt of the Report, which is signed unanimously, the Government of Bengal has fully considered the numerous recommendations made by the Committee; a number of the suggestions have already been acted upon, and the Lieutenant-Governor has been taking steps to carry out those remaining which have met with his approval. The measures adopted have now advanced to such a stage that what has been done can be conveniently summarised and made public. The ensuing paragraphs, in describing the recommendations and the action taken upon them follow the order of arrangement adopted in the Committee's Report which is divided into three main heads, viz.—I. The Village Police. II. The Regular Police. III. The Criminal Courts.

PART I.—VILLAGE POLICE.

3. The Committee have passed in review the previous essays towards the important and difficult question of improving the Village Police of Bengal, and have examined the working of Act VI (B.C.) of 1870, amended by Act I (B.C.) of 1886, and the systems of chaukidars who are not under that Act. The conclusion of the Committee is that, although chaukidars are better paid than formerly, they are not much, if at all, more useful than they were, and that radical changes in the law affecting both punchayets and chaukidars are necessary before improvement can be expected. The chief proposals made may be classed as follows:—

(*A*).—*Recommendations requiring legislation.*

(*a*). The repeal of the restriction of the minimum of 60 houses in villages, and 80 houses in unions, for the introduction of the Act. The Magistrate should have power to introduce the Act into all villages irrespective of the number of houses they contain, provided that the inhabitants can afford to pay the chaukidar's wages.

(*b*). The number of chaukidars to be employed in any village should not be left to the punchayet entirely as at present, but the determination of the punchayet should be subject to the control of the Magistrate; the minimum of 1 chaukidar for 60 houses, 2 for 150, and one more for every extra 100 houses remaining as before.

(*c*). The rate of pay of the chaukidar between the limits of Rs. 3 and Rs. 6 *per mensem* should be fixed by the Magistrate and not by the punchayet.

(*d*). The supervision over chaukidars should be exercised by an official to be called the Circle Officer (halkadar), who should also collect the chaukidari rate. He should be directly under the orders of the Magistrate of the district,

and should be paid by a levy of 25 per cent. over and above the amount levied for the chaukidar's salary, instead of 15 per cent. as now provided in section 13 of the Act. The collections made by this officer should be paid into the district or sub-divisional treasury.

(e). The provisions of section 50 of the Act should be amended so as to allow of the zemindar contesting the claim of the punchayet to include in the *chakran* area lands which he contends are rent-paying. Section 64 should also be amended so as to give Commissioners control over the proceedings of Collectors under Part II of the Act.

(f). Special provisions for the duties of assessment and supervision in tea gardens in Julpaiguri and elsewhere, where ordinary punchayets cannot be appointed.

The most important of these recommendations is that the Magistrate should be allowed power to introduce the Act into all villages in the province. The Lieutenant-Governor has accepted this, and proposes to divide the inhabited area of the whole country into blocks—each of which should have one or more chaukidars according to its size, and the number and means of its inhabitants. It may be necessary to take power to fix the pay of the chaukidar at Rs. 2 a month in some of the poorer and worst cultivated blocks, but the Lieutenant-Governor expects that this will be only necessary in a few exceptionally situated places. It may also be found desirable in some parts of the country to have only one punchayet for two or more blocks, and this will be provided for in the new law. Provision will also be made for the election of punchayets in such parts of the country as may be fitted for the exercise of this privilege, and where it is desired. The Lieutenant-Governor has been unable to accept the proposal mentioned in clause (d) above, that the collections should be paid into the district or sub-divisional treasury. The disadvantages of this seem to outweigh any possible advantages. It will be necessary to make it clear in the law that any member of a punchayet may, if competent, be appointed collecting officer, that the duties of collection and supervision shall not necessarily be entrusted to the same officer, and also that the amount to be levied in excess of the chaukidars' salaries need not be as much as 25 per cent. in all cases, and will be available for other purposes connected with the administration of the Act, besides the payment of circle and collecting officers. A draft Bill intended to carry out the changes which have been resolved on has been submitted to the Government of India and to the Secretary of State, and permission to introduce it into the Lieutenant-Governor's Council has now been obtained. The draft has been circulated for opinion to all local officers and the various associations representing classes interested in the subject, and any recommendations made by them will be considered before the Bill is introduced. Besides the changes mentioned above, based on the recommendations of the Committee, the draft contains the following provisions:—

(a). The extension of the powers of arrest by a chaukidar so as to bring the law into accordance with the general practice.

(b). The extension of the power of the Local Government to issue rules for the guidance of Magistrates and others exercising powers under the Act.

It also contains some minor changes which need not be detailed here.

It is recommended by the Committee that the duty of reporting vital statistics, epidemics, state of crops, &c., should be transferred from the chaukidar to the punchayet, who should send a written report by the chaukidar when he goes to the police-station to attend muster-parade, or by post when more convenient. The Lieutenant-Governor is inclined to agree to this proposal. It has not been incorporated in the Bill, but on the receipt of replies from those consulted, His Honour will consider the propriety of introducing a provision to give effect to this recommendation.

(*B*)—*Recommendations to be carried out by executive order.*

(a). The Committee are of opinion that the rate of pay of the chaukidar, between the limits of Rs. 3 and Rs. 6 per mensem, varies very unfairly and in many places is not fixed with reference to the rates of wages of unskilled labour, cost of living and other local circumstances. The Lieutenant-Governor has caused enquiries to be instituted by District Officers in each thana with a view to fixing the rate of pay for that area, which shall be the ordinary rate in

future; the results of these enquiries will be scrutinized by the Divisional Commissioners. As above mentioned, it may hereafter be found necessary to fix the pay as low as Rs. 2 in a few tracts.

(*b*). The system of muster-parades prevailing in most districts is commended in the Report, and the Lieutenant-Governor approves the principle upon which it is based of requiring the chaukidar to attend regularly at the police station. The Inspector-General of Police has recently drawn up draft instructions for the purpose of bringing the procedure to be followed at these parades into accord throughout the Province; these instructions have been sent to selected District Officers and District Superintendents for criticism and suggestions before being issued.

(*C*)—*Recommendations concerning service lands.*

(*a*). The Committee advocate the abolition of the Government orders of 1886, which are to the effect that the provisions of the Act for the conversion of *chakran* lands should not be put into force where there are already chaukidars in the enjoyment of *chakran* lands, and the amount and value of such lands are sufficient for their proper maintenance. These orders have had the effect of retarding greatly the abolition of *chakran* chaukidars, whose services almost invariably are unsatisfactory, and Sir Charles Elliott agrees with the Committee that the last circular upon the subject should be cancelled as soon as the proposed provisions, giving the Commissioner of the Division general controlling authority over the proceedings of the Collector in effecting the conversion, are passed into law. The present Act would leave the parties without the power to appeal against the Collector's orders.

(*b*). Besides the regular village police, there exist in the Bankura, Midnapore, Manbhum, and some other districts, classes of rural officers called *ghatwals, paiks and phanridars*; these always hold service lands, but the services they are supposed to render are very often delegated by them to sub-lessees. The organization of these old rural officials is most unsatisfactory and calls for special investigation. Mr. Risley, the Secretary of the Committee, drew up a Bill to provide for the commutation of the lands of the *ghatwals*, and the Committee recommended it with diffidence, as they did not deem themselves very competent to express an opinion upon the subject. The subject seemed to the Lieutenant-Governor to be one of such difficulty, involving many old customs and nice points of law, that he deputed a special officer, Mr. E. R. Henry, now Officiating Inspector-General of Police, to visit the districts in question and draw up careful notes upon the facts relating to each of the various kinds of tenure. Those notes have been sent to the local officers for their opinion; on receipt of replies the Lieutenant-Governor will be in a better position to deal with the problem of effecting an improvement which has hitherto proved difficult.

(*c*). The chaukidari system in Orissa is shown by the Committee to be in urgent need of reform, and three different courses of action are suggested, but not exhaustively examined. The Commissioner of the Division, in consultation with the district officers, is now considering a suggestion to bring all the Orissa chaukidars under the Act. If this measure be adopted, the Lieutenant-Governor thinks that it had better be carried out under the supervision of the settlement officer when the *jagirs* held by the chaukidars have been surveyed and determined. All these lands should be commuted, and the necessary number of chaukidars should be decided on and their pay fixed *pari passu* with the progress of settlement.

PART II.—THE REGULAR POLICE.

4. The essential part of the recommendations of the Committee for the improvement of the Regular Police is that no officers inferior in rank to Sub-Inspectors should be employed in the investigation of criminal cases, and that head-constables, whose number would be greatly reduced, should be confined to work of a less responsible nature. Sir Charles Elliott has accepted this principle and has determined to carry it out as far as possible, though he thinks that there may be some places in which the amount of reported crime is so small as not to warrant the employment of a Sub-Inspector. The Committee did not fully work out the details of the

scheme recommended by them, but it appears from a statement attached to the report that it practically amounted to little more than the substitution of a Sub-Inspector wherever there is now an investigating head-constable. The cost of this would be prohibitive in the present state of the finances. The Government of India, in their proposals for the next financial contract, have intimated that they will not allow anything on the score of the improvements in the police beyond a sum of Rs. 1,71,417 already sanctioned on account of constables as will be described below. Consequently any additional cost to be provided for from the Provincial revenues can only be available during the later years of the contract, and any improvement now made involving an increase of cost will have to be met by reduction in some other direction. Now there appears to be little doubt that by judicious redistribution of the station staff, and improvement in the method of investigating, a considerable reduction can be made in the number of officers required for investigating duty. This will allow of many head-constables being abolished and additional Sub-Inspectors being appointed in their places; but the Lieutenant-Governor finds it impossible to work out the details of this change without local enquiry, as the strength of the machinery to be employed in investigating crime must depend not merely on the arithmetical figures of crime to be investigated but also on local characteristics and peculiarities, on the class of crime most prevalent, and to some extent on the area to be supervised and on the density of population. The Lieutenant-Governor has therefore found it necessary to appoint a Committee composed of Mr. H. J. S. Cotton, Financial Secretary to Government as President, and of Mr. J. C. Veasey, Inspector-General, and Mr. Knyvett, District Superintendent of Police, to work out for each district the number of Sub-Inspectors required, and the changes in the distribution of the force which have become necessary. Mr. Henry, Officiating Inspector-General, will assist in making the enquiries, and will be present at the meetings of the Committee when his other duties permit him. Mr. Knyvett will act as Secretary to the Committee.

5. This Committee will also frame rules for the appointment of Sub-Inspectors and for their subsequent promotion. They will consider whether first appointment should not be made to depend to some extent on the result of competitive examination, and it has been suggested that the following classes should be allowed to compete:—

(a) Candidates who have passed the F. A. examination of the Calcutta University, or who have received a certificate of proficiency from a Police training institution, such as that of Mr. Ballard, a retired Inspector of Police, recognized by Government, and who also pass a physical standard and a riding examination.

(b) Head-constables and writer-constables who have been recommended by Magistrates for practical success in the detection of crime, and as possessing really high qualities of intelligence, activity and honesty.

Certain questions connected with boat establishments and river patrols, which also need further elucidation, have been referred to the Committee now appointed.

6. The Committee recommended that the pay of the lowest grade of Inspectors should be raised from Rs. 100 to Rs. 150, that the pay of the lowest grade of Sub-Inspectors should be raised from Rs. 30 to Rs. 40, and that of the highest grade from Rs. 80 to Rs. 100, the pay of the intermediate grades being also raised. The Lieutenant-Governor does not consider that sufficient evidence has been produced to show the necessity of this increase, while its cost would make it impossible at present even if reason for it had been shown. The officers in the lowest grade of Sub-Inspectors will, under the future arrangements, be considered to be on probation, their duties and powers will be necessarily limited, and the Lieutenant-Governor considers the pay of Rs. 30 to be sufficient in the circumstances.

7. The Committee propose that the four grades of head-constables on Rs. 10, Rs. 15, Rs. 20, and Rs. 25 should be altered to three grades, Rs. 15, Rs. 20, and Rs. 25. Sir Charles Elliott accepts the argument put forward that, as the first grade constable draws Rs. 9 per mensem and may have an additional Re. 1 as good conduct allowance, the minimum pay of a head-constable should be more than Rs. 10. In view of the fact that head-constables are not ordinarily

to investigate cases, His Honour has determined that three grades on Rs. 12, Rs. 15, and Rs. 20 will be sufficient.

8. The Lieutenant-Governor has already carried out the recommendations of the Committee for increasing the pay and allowances of constables on the ground that the standard of wages has risen generally amongst the labouring and lower classes throughout these Provinces, but especially in Bengal Proper, and that there is in consequence difficulty in enlisting suitable recruits and keeping them afterwards. Sir Charles Elliott therefore agreed to the proposal to fix the pay of the lowest grade of constables in the Presidency, Burdwan, Rajshahye, Dacca, and Chittagong Divisions at Rs. 7 instead of the former rate, Rs. 6, and has also done away with the deduction of 2 pice in the rupee on account of the Superannuation Fund. He has also sanctioned the grant of a free kit to recruits on entering the service, and an increase to the former clothing allowances. These concessions, which involve the additional cost of Rs. 1,71,417 per annum, were brought into force with the consent of the Government of India from the 1st July last.

9. The questions connected with Reserves were not dealt with fully by the Police Committee. They, however, advised the Government to substitute in the special reserves of Dumka, Bhagalpur, and Dacca, military titles such as sepoy, havildar, jamadar, and subadar, for the civil designations of constable, head-constable, sub-inspector and inspector. This has met the Lieutenant-Governor's approval, and it has been embodied with other more important matters in a draft Bill, called the Bengal Military Police Bill, framed upon the lines of the Burma Military Police Act, 1888, which has been forwarded to the Government of India for sanction to its introduction into the Bengal Legislative Council. In 1887 the Government of India drew the attention of this Government to the desirability of re-organizing the district reserves with a view to rendering them more efficient in the repression of local disturbances, especially during religious celebrations. Sir Steuart Bayley was in favour of an increase in these reserves, but found that there were financial objections in the way. Orders on the subject were received from the Government of India in March 1889, but the district reserves are still in an unsatisfactory state. Sir Charles Elliott thinks that an opportunity has now presented itself in the proposed reorganization of the staff of the police, and the consequent reduction in some of the smaller stations, to withdraw a sufficient number of men from mofussil work to be formed in an efficiently drilled force that may be ready to put down disturbances on any emergency, and has directed the Committee which has now been formed to consider this question fully.

PART III.—CRIMINAL COURTS.

10. The suggestions made in the Report under this head are less definite than under the two other heads, and some difficulty has been found to give practical effect to them. Such action as it has been possible for Government to take upon the measures advocated has already been taken.

11. The Committee ascribe the defects in the working of the courts to the insufficient supervision exercised by the superior courts over subordinate Magistrates. They consider that the faults of the majority of such Magistrates lie chiefly in fear of responsibility, dilatoriness and want of thoroughness. They set forth instances of the superficiality and want of method which is observed on all sides. They point out that witnesses are detained day after day, and are made to attend again and again after long intervals to the great inconvenience of themselves and to the great prejudice of the administration of justice. They say that many Magistrates do not understand that it is their duty to exhaust every source of enquiry that may appear available, and to make good the deficiencies in the evidence presented in court, but are under the erroneous impression that they have only to adjudicate upon such matters as the contending parties or the police choose to lay before them. They assert that cases are not infrequently committed to the Sessions without any real necessity, because the Magistrate will not take it upon him to exercise his own judgment. In order to correct these evils, they urge that District Magistrates should exercise greatly increased supervision over Subordinate Magistrates, and, while avoiding interference with the judicial discretion of such Magistrates, should endeavour to secure punctuality of attendance, method,

regularity, promptitude, and general efficiency in the disposal of business, and, when necessary, should assist their subordinates by judicious criticism and advice. The Lieutenant-Governor has accepted generally the recommendations of the Committee, and rules* have been laid down to give effect to them. A fortnightly register showing the number of under-trial prisoners is to be submitted to the District Magistrate from each subsidiary jail. The District Magistrate is directed to inspect once a week the trial register of each subordinate Magistrate at head-quarters, sending for particular records, calling for explanation, or passing other orders when necessary. A statement is to be sent from each court away from head-quarters containing extracts from the trial register, showing each case which has been remanded more than three times or has been pending more than a month. District Magistrates are also, if possible, once a quarter, without previous warning, to send for and inspect the records of the last six cases disposed of by each subordinate Magistrate. A manual of inspection is under preparation, embodying the principles which have been laid down by the Committee, and accepted by the Lieutenant-Governor.

* Circular No. 3060J, dated 5th August 1891.

12. The Committee in commending the system of competitive examination for the recruitment of the Subordinate Executive Service, which has been in force for the last few years, recommend that the Evidence Act should be added to the subjects to be taken up for examination. The suggestion has been acted upon, and the notification of the 10th October 1891, prescribing the list of subjects for the next examination, contains this Act, together with other enactments usually required by Magistrates among the subjects for examination.

13. The Committee suggest that in order that subordinate Magistrates may feel that their success depends as much upon attention to their judicial work as to their executive work, their merits should be reported on by the Sessions Judges as well as by District Officers. The rule prescribing this has lately been revived by the High Court, and Government has received a copy of all the reports for last year.

14. It is pointed out in the Report that the failure in Sessions trials often results from the delay in hearing the cases. The Committee state their opinion that it is desirable that such trials should be held as soon as possible after the occurrence, and propose that a system of holding monthly sessions should be introduced as far as practicable. Other Governments have been consulted concerning their practice, and the High Court have been asked their advice in the matter.

15. Another cause of failure of justice at the Sessions Courts, alluded to in the Report, is the imperfect way in which many cases are committed by Magistrates. The Committee advise that powers of committal be entrusted only to selected Magistrates of the second class, and not to all as at present. The Lieutenant-Governor has accepted this advice, and has cancelled the general order of 1874, and after consulting local officers has vested this power in selected officers only.

16. The Committee consider that the Crown should be represented in all important appeals, and point out that the number of successful appeals, notwithstanding that the number of appeals lodged increases, remains very small. The rules on the subject seem sufficient to the Lieutenant-Governor, as any Court against whose order an appeal is lodged can apply for the Government Pleader to appear to support the order. In a recent circular† the Lieutenant-Governor has prescribed a form by which the subordinate Court is invited to state when notice of appeal is sent, whether the Government Pleader should appear or not.

† Circular No. 4J.D., dated 15th October 1891.

17. The Committee point out that the Government Pleader is not always the best man at the local bar or the best man available. They suggest that the Judge and the Magistrate should always be consulted before a Government Pleader is appointed. The Legal Remembrancer, with whom the nomination lies, has been requested to consult these officers always in future. And Sir Charles Elliott has under consideration a suggestion to appoint Government pleaders for a term of years, instead of for life, as is practically now the case.

18. The Committee recommend that both in head-quarters and at subdivisions the best local legal practitioners should be engaged as legal advisers,

to the police and as public prosecutors before Magistrates. The scheme which would cost a very large sum is not fully developed. In many places suitable advisers could not be obtained, and Sir Charles Elliott doubts if cases would be much improved by legal advice given to the police during investigations: if advice is required, the District or Sub-divisional Magistrate is the proper person to apply to. The Lieutenant-Governor is, however, of opinion that more attention should be devoted to the prosecution of police cases, and desires to relieve Court Sub-Inspectors of much of their routine work to allow them time for this important duty. The experiment of transferring a large portion of the Court Sub-Inspector's work to the Magistrate's office, and setting the Court Sub-Inspector free from the multifarious details which now engross his time to prepare cases and conduct prosecutions, will be tried for six months in six selected districts. The officiating Inspector-General has selected for this experiment the districts of the 24-Pergunnahs, Mymensingh, Backergunge, Mozufferpore, Patna, and Monghyr, and he expects to have all arrangements completed by the 1st of January. His Honour has sanctioned a suggestion by Mr. Henry that hereafter Court Sub-Inspectors shall draw Rs. 20 at head-quarters and Rs. 10 at sub-divisions more than their grade pay in order to attract the best men to Court work. Special rules will be framed for the appointment of this class of Sub-Inspectors in order to secure superior knowledge of law and procedure.

19. The Report deals with the great delays which frequently occur in disposing of cases instituted under section 110, Criminal Procedure Code, which are known as " bad livelihood " cases, and it is advised that Magistrates should be allowed perfect freedom of action, and the existing rules which direct cases of bad livelihood should be taken up in the village where the accused resides should be abolished as being the cause of much of the delay observed. The Lieutenant-Governor dealt with the subject in a circular* in June last, in which it was pointed out that the orders directing local enquiry were issued by Sir Ashley Eden, who in 1877 had found that there had been an indiscriminate use of the provisions regarding security, and had little doubt that a number of innocent persons had been committed to jail upon mere hearsay evidence. Sir Charles Elliott, in modifying so much of the previous orders as prescribed a local trial in every case, and in leaving the matter to the discretion of the Magistrate, only did so because he prefers a speedy trial in Court to a long deferred one on the spot, and expressed his hope that Magistrates would try such cases as far as possible in or near the villages where the accused persons reside.

* Circular No. 3J.D., dated 4th June 1891.

20. *Conclusion.*—So much has been done. The passing of the Chaukidar Bill and the reorganisation of the Police staff are the chief objects which now remain to be effected. Sir Charles Elliott trusts that their accomplishment will be seen at the end of the present cold season.

By order of the Lieutenant-Governor of Bengal,

JOHN EDGAR,

Chief Secretary to the Govt. of Bengal.

GOVERNMENT OF BENGAL, MARINE DEPARTMENT.

No. 214Mne., dated Calcutta, the 1st December 1891.

THE following report of the 17th quarterly inspection of the Dock Works at Kidderpore which are being carried out by the Commissioners of the Port of Calcutta, is published for general information.

By order of the Lieutenant-Governor of Bengal,

J. M. McNEILE, *Col.*, R.E.,

Secy. to the Govt. of Bengal, P. W. Dept.

QUARTERLY INSPECTION OF THE KIDDERPORE DOCK WORKS.

Dated Calcutta, the 24th November 1891.

From—LIEUT.-COL. A. D. MCARTHUR, R.E., and H. N. C. CLOETE, ESQ.,

To—The Secretary to the Government of Bengal, Public Works Department.

AGREEABLY to the orders of the Government of Bengal, received with the Under-Secretary's letter No. 2536M. of the 30th ultimo, we have the honour to report that the inspection of the Kidderpore Dock works for the two quarters ending 30th September 1891 was made by us on the 21st instant. All the works are approaching completion, and their present state is as reported below.

Sixty-feet Lock.—Already reported complete. A small quantity of work on the jetties at the head of the lock remains to be done. The entrance to the lock has been dredged.

Eighty-feet Entrance.—As previously reported, this work is completed, and the jetty heads are almost finished. The dredging of the entrance has been carried out.

Double Entrance to Dock No. 1—Is completed as previously reported.

Tidal Basin.—The masonry work is completed. Half the total area of the basin was dredged to within 5 feet of the required depth and full depth dredged between the lock and double entrances.

Graving Dock.—The engine-house for this dock which was under construction at the time of our last inspection is now completed with the exception of finishing work. The engines and pumps have already been utilized for emptying the docks.

Dock No. 1.—The additional works rendered necessary by the slips reported during the quarter ending 30th September 1890 are well in hand. With regard to repairs to walls of this dock, it was at first found impossible to make any progress with dismantling and reconstructing the upper portions of the injured walls while the river had access to the dock, and consequently it was decided to strut the gates of the 60 feet and 80 feet passages against the tide. Since this was done, the work on the walls has made good progress. More than ⅓rd of the concreting of the south-west berth had been done, and on the eastern wall 368 out of 418 bolt holes had been drilled and 60 per cent. of the waling had been fixed and the pockets concreted.

Boat Canal.—The lock and bridge at Chetla Hât are now completed. The gates and overbridge which were under construction when our last report was submitted are now finished, as also the revetments. The foot-bridge across the lift lock at the Budge-Budge Road has been erected and raised to position, and the piers erected under it.

Subsidiary Works.—The addition to the hydraulic engine station for the accommodation of electric light engines and plant was nearly completed at the time of our inspection. The wing was roofed and satisfactory progress made with engine foundation. The iron work for the cargo sheds has been received from England. Four sheds on the west side have been erected and partly roofed in, and two on the east side were put in hand. Considerable progress has been made with them.

GENERAL REMARKS.

We consider that the progress on the works in hand during the two quarters was very satisfactory, and that, so far as we could judge, the quality of work done was all that could be desired, promising completion at a very early date.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 28th November, 1891.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
BURDWAN DIVN.	1	Burdwan Nov. 28, '91 Culna ... Cutwa ... Raneegunge ...	Nil Nil Nil Nil	Weather—fairly cool, but cloudy for the last two days. *Aman* crop is being harvested. Prices of common rice:— Srs. Burdwan ... ... 14 to 16 Cutwa ... ... 15 Culna ... ... 14 Raneegunge ... ... 15½ } per rupee.
	2	Bankoora „ 28, '91	Nil	Weather—seasonable with patches of clouds in the sky. Harvesting of *aman* rice commenced. Sowing of *rabi* continues Sugarcane prospering. Condition of cattle good. Fodder sufficient. Common rice selling at 15½ seers per rupee at Bishenpur and 17 seers at Sudder.
	3	Birbhum „ 28, '91 Rampore Haut ...	Nil Nil	Weather—rather too warm for the season. Since yesterday (27th) somewhat cloudy. Harvesting of winter rice has commenced. Prospects of *rabi* crops good. Supply of fodder and water sufficient. Common rice sells at from 14½ to 18½ seers per rupee.
	4	Midnapore „ 28, '91	Nil	Weather—fair; not so cool as it should be. Harvesting of paddy has begun in all parts except Contai. *Rabi* and indigo doing well. No want of fodder or water. Price of silk cocoons increased in Ghatal during last month. Prices of common rice:— Srs. Sudder ... ... 16 Contai ... ... 17 Tumluk ... ... 16 Ghatal ... ... nearly 16 } per rupee.
	5	Hooghly „ 28, '91 Serampore ... Jehanabad ...	Nil Nil Nil	Weather—clear but not sufficiently cool. Winter rice crop severely affected by want of rain. *Rabi* sowings almost over. Sugarcane doing well. Fodder and water-supply sufficient. Prices of common rice:— Srs. Sudder ... ... 13 Serampore ... ... 13 Jehanabad ... ... 16 } per rupee.
	6	Howrah „ 28, '91 Uluberia ...	Nil Nil	Weather—somewhat cloudy and warm for the season. Paddy on high lands in some parts of the district parched up. *Rabi* crops being sown on lands near the river. Health of cattle good. Fodder and water-supply sufficient. Price of common rice 14 to 14¾ seers per rupee.
PRESIDENCY DIVN.	7	24-Perghs. „ 28, '91	Nil	Weather—moderately cold and seasonable. *Aman* paddy is being reaped; want of rain has affected the outturn. Sowing of *rabi* crops in progress. Common rice is being sold at from 12½ to 15 seers per rupee. No cattle-disease reported. No want of fodder or water.
	8	Nuddea „ 28, '91 Kushtea ... Meherpore ... Chuadanga ... Ranaghat ...	Nil Nil Nil Nil Nil	Weather—seasonable. Prospects of *aman* unchanged. Outturn expected to be not more than 3 annas. *Rabi* crops not doing well for want of moisture. Common rice selling at 12 seers 12 chittacks to 15 seers per rupee. Condition of cattle good, and supply of fodder and water sufficient.
	9	Khoolna „ 28, '91 Bagirhat ... Satkhira ...	Nil Nil Nil	Weather—slightly cloudy and foggy in the morning. Sowing of *rabi* just finished. Prospects of *aman* fair. Prices of common rice 14 to 16 seers per rupee. Fodder and water sufficient.
	10	Jessore „ 28, '91 Jhenidah ... Magura ... Narail ... Bongong ...	Nil Nil Nil Nil Nil	Weather—rather warm for the season. Rain wanted for winter crops and *boran* paddy. *Chhotan* paddy being harvested. No cattle-disease reported. Supply of fodder and water for cattle plentiful.
	11	Murshedabad „ 28, '91	Nil	Weather—cloudy and nights cool. Harvesting of winter rice has commenced. *Rabi* sowings completed in Lalbagh subdivision. Rain still wanted. No want of fodder for cattle.
CHITTAGONG DIVN.	12	Chittagong Dec. 1, '91	Nil	Weather—warm. Mornings sometimes foggy. State and prospects of winter rice crop not very good. Prices steady.
	13	Noakhally Nov. 28, '91	Nil	Weather—foggy mornings, hot days, cool nights. *Aman* paddy maturing. In some places reaping of *aman* commenced. *Rabi* crops progressing. Condition of cattle and supply of fodder and water good. Price of common rice 15½ seers at head-quarters and 17 seers at Fenny.
	14	Tipperah „ 28, '91	Nil	Weather—seasonable. Prospects of crops fair. Fodder sufficient. No cattle-disease reported from any part of the district.
	15	Chittagong Hill Tracts. „ 26, '91	Nil	Weather—cool and foggy generally from 1 to 9 A.M. Hot and cloudy throughout the rest of the day. Cotton is still being gathered. Early plough-paddy is being harvested in places and late paddy progressing. Sowing and transplanting of mustard and other cold-weather crops almost over. Price of common rice 11½ seers per rupee.

	No	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*					
DACCA DIVN.	16	Dacca	Nov. 28, '91	Nil	Weather—seasonable. Harvesting of *aman* going on. Prospects appear to be favourable. Fodder available. Common rice selling at from 13 to 17 seers per rupee. Condition of cattle good.
	17	Furreedpore	„ 28, '91	Nil	Weather—getting cool. Harvesting of *aman* in progress. Rice selling at 14 to 16 seers per rupee.
	18	Backergunge	„ 28, '91	Nil	Weather—seasonable. Prospects of crops good in the Patuakhali and Perozepur subdivisions, but poor in the Sudder and Bhola subdivisions. Price of common rice varies from 11 to 17 seers per rupee. Supply of fodder and water sufficient.
	19	Mymensingh	„ 28, '91	0·54	Weather—moderately cold. Damage has been caused by the recent hail shower in the Sudder only. Prospects of crops fair on the whole. Rice sells at 14 seers a rupee. Condition of cattle good, and supply of fodder and water sufficient.
RAJSHAHYE DIVN.	20	Dinagepore Thakurgaon	„ 28, '91 ...	Nil Nil	Weather—cool and cloudy. Prospects of winter rice continue bad as before. Cultivation of *rabi* crops still in progress. Price of rice at Sudder 13 seers per rupee and at Thakurgaon 10 seers. Condition of cattle good. Supply of fodder and drinking water sufficient.
	21	Rajshahye Nattore Nowgong	„ 28, '91	Nil Nil Nil	Weather—seasonable. Prospects of *aman* continue unchanged. Condition of *rabi* crops good. Prospects of ganja favourable. Price of common rice varies from 12 to 15 seers per rupee. Supply of fodder and water sufficient. No cattle-disease.
	22	Rungpore Nilphamari Kurigram Gaibanda	„ 28, '91	Nil Nil Nil Nil	Weather—unseasonably hot with cold mornings. Rice harvest has commenced. A slightly better outturn is expected than previously estimated. Prices have fallen slightly in the Nilphamari and Gaibanda subdivisions. The general average is 12 seers for *aus* rice but old *aman* rice sells at 9 seers. Prospects of *rabi* crops and sugarcane favourable. Fodder sufficent.
	23	Bogra Sherpur Nowkhilla	„ 28, '91	Nil Nil Nil	Weather—cool in the morning and hot in the day. Prospects of *rabi* good. An average outturn of 8 annas of *aman* expected. Fodder and water ample except in the jurisdictions of the western thanas where insufficiency of drinking water reported. Common rice selling at 13¼ seers a rupee.
	24	Pubna	„ 28, '91	Nil	Weather—cool. State and prospects of *aman* paddy much the same as before; outturn expected to be 10 annas. *Rabi* crops doing well. Price of common rice stationary, being 13 seers per rupee. Condition of cattle good. Supply of water and fodder sufficient.
	25	Darjeeling	„ 28, '91	Nil	Weather—fair. Paddy on high lands is being cut. Low land paddy ripening, but ears are small. Mustard and *kalai* doing well. No disease among cattle. Fodder and water-supply ample. Prices of common rice:— Srs. (per rupee) Silliguri ... ... 11 Phansidowa ... ... 9 Nuxalbari ... ... 10½ Darjeeling ... ... 9 Kalimpong ... ... 9 Pulbazar ... ... 10 Jore Bungalow ... ... 10 Nagri ... ... 8 Sonadah ... ... 10 Kurseong ... ... 10 Kharibari 9
	26	Julpigoree	„ 28, '91	Nil	Weather—seasonable. Prospects of *haimanti* paddy unfavourable. Common rice sells at 10 seers a rupee. Fodder and water-supply sufficient. No cattle-disease.
BEHAR.					
BHAGULPORE DIVN.	27	Monghyr Beguserai Jamui	„ 28, '91	Nil Nil Nil	Weather—fine and seasonable. Prospects of *rabi* crops continue favourable in Beguserai and parts of the Sudder subdivision; only 8 annas have been sown in Jamui owing to want of moisture. Prospects of paddy unchanged. Prices of common rice vary from 11 to 15 seers per rupee in different parts of the district. Fodder and water-supply at present sufficient.
	28	Bhagulpore	„ 28, '91	Nil	Weather—seasonable. Harvesting of *aghani* rice commenced. Prospects of *aghani* rice and *rabi* crops unchanged. Prospects of *kurthi* reported to be fair and those of *tori* (mustard) very indifferent in the Maddapore subdivision. Yield of sugarcane in the Banka subdivision is fair. Fodder plentiful. Price of common rice 13¼ seers per rupee.
	29	Purneah Kishengunge Arrareah	„ 28, '91	Nil Nil Nil	Weather—much cooler. *Aghani* prospects unfavourable as previously reported. Some *aghani* is being reaped. *Rabi* generally doing well, but rain will soon be necessary, especially for wheat. Fodder and water sufficient. No cattle-disease. Prices of common rice in the Sudder subdivision from 9 to 13 seers, in Kishengunge 10 seers, and in Arrareah 13 seers, per rupee.
	30	Maldah Chanchal Shibgunge Gajole	„ 28, '91	Nil Nil Nil Nil	Weather—cool, but a little cloudy since yesterday (27th). Harvesting of winter rice has commenced in some places. The Collector on tour in the tract east of the district estimates the outturn from enquiries and personal observation to be not less than 8 annas. Prospects of *kalai* and other *rabi* crops continue favourable. Common rice sells at from 10 to 15 seers per rupee. Supply of fodder and water adequate. Condition of cattle good.
	31	Sonthal Perghs.	„ 28, '91	Nil	Weather—seasonably cool; cloudy at times. Winter rice is being harvested everywhere; outturn about 12 annas on average. Rain wanted for standing *rabi* crops. Price of common rice 16 seers per rupee in the Sudder subdivision. Fodder and water-supply sufficient.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
	BEHAR—(concld.)		
	Patna Division.		
31	Patna Nov. 28, '91 Barh ... Behar ... Dinapore ...	Nil Nil Nil Nil	Weather—clear and getting cold. Paddy still being harvested. *Rabi* sowing still in progress. Those already sown have germinated well. Rain urgently wanted. Poppy sowings almost completed. Prices of food-grains almost stationary.
33	Gya „ 28, '91 Aurungabad ... Jehanabad ... Nawada ...	Nil Nil Nil Nil	Weather—cold with cloudy mornings. Paddy being harvested. Sowing of *rabi* and poppy still going on in some places, but rain urgently wanted. Prices of food-grains almost stationary. Supply of fodder and water for cattle yet sufficient.
34	Shahabad „ 28, '91 Buxar ... Bhabuah ... Sasseram ...	Nil Nil Nil Nil	Weather—cold nights and mornings, days warm. Paddy harvest proceeding. Prospects of *rabi* crops still fair; but rain is much wanted, and insects have done some damage. Prices rising in Bhabuah, but show a tendency to fall in Sasseram, where new rice is coming into the market. Poppy promising.
35	Durbhunga „ 28, '91	Nil	Weather—getting cool. *Rabi* coming on well where there is moisture. Paddy is being harvested in places. Rain urgently wanted for *rabi* crops. First poppy sowings have been a failure; second sowings going on. Supply of fodder for cattle sufficient. Price of common rice varies from 12 to 13½ seers per rupee.
36	Mozufferpore „ 28, '91 Hajipore ... Sitamarhi ...	Nil Nil Nil	Weather—seasonable. Paddy is being harvested. Average outturn for Sudder subdivision 5 annas, for Sitamarhi subdivision 6 and 7 annas, and for Hajipur subdivision 3 annas. *Rabi* sowings still going on in many places. Reports on the state of *rabi* are not encouraging. Rain most ureguntly wanted both for *rabi* and poppy. *Rahar*, sugarcane and other standing crops are in good condition. Prices stationary. Fodder and water for cattle plentiful.
37	Sarun „ 28, '91	Nil	Weather—warm for the time of the year. *Rabi* doing well. Poppy sowings continue. Fodder and water sufficient. Prices of common rice:— Srs. Ch. Sudder ... ... 13 0 Sewan ... ... 16 8 } per rupee. Gopalgunge 14 6
38	Chumparun „ 28, '91	Nil	Weather—seasonable. *Rabi* is being sown. State of standing crops fair. Supply of fodder and water for cattle sufficient.
	ORISSA.		
	Orissa Divn.		
39	Cuttack „ 28, '91	Nil	Weather—seasonable. *Laghu* paddy is still being harvested. Tobacco is being transplanted. Price of common rice has gone up at head-quarters, the rate being 13 seers 12 chittacks per rupee, against 14 seers 7 chittacks in the preceding week. Cattle-disease reported from places. In the part affected by the late cyclone, food-grains are not easily available in the local markets.
40	Pooree „ 26, '91 Khurda ... Banpur ... Pipli ... Gop ...	Nil Nil Nil Nil Nil	Weather—seasonable. *Laghu* paddy being reaped. *Sarad* paddy partly in ear and partly ripening. Common rice sells at from 12½ seers to 19 seers per rupee. Cattle-disease reported from pergunnahs Kurlo, Kuspalla, and Banpur.
41	Balasore „ 28, '91	Nil	Weather—seasonable. Harvesting of winter rice continues. Prospects good. Rice selling at Balasore 19 seers and at Bhadrak 20 seers per rupee.
	CHOTA NAGPORE.		
	South-West Frontier Agency.		
	Chota Nagpore Divn.		
42	Hazaribagh Nov. 28, '91 Giridih ...	Nil Nil	Weather—cold and bright. Harvesting of paddy not yet complete; estimated outturn 12 annas. *Rabi* sowings completed. Common rice selling at from 13 to 16 seers per rupee. Fodder and water-supply sufficient. Cattle-disease reported from thana Jageswar.
43	Lohardugga „ 28, '91 Palamow (up to 23rd) ...	Nil Nil	Weather—a little cloudy. Rain badly wanted for *rabi* crops. Harvesting of winter rice continues. Price of common rice 15 seers per rupee. Ample fodder for cattle.
44	Singbhoom „ 28, '91	Nil	Weather—cloudy since yesterday (27th). Harvesting of paddy continues with the same satisfactory results as reported in previous week. Prices stationary. No cattle-disease. Fodder plentiful.
45	Manbhoom „ 28, '91 Govindpore ...	Nil Nil	Weather—less cool than seasonable. Prospects of winter crops good. Rice selling at 20 seers per rupee. Fodder and water-supply still sufficient.

Published for general information.

* Mean of 6 days. | † Mean of 5 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last

The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

...or the week ending Saturday, the 28th of November 1891.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	Of week. Mean for district.	Of week. Normal mean.	DISTRICT OBSERVATIONS. Rainfall. Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 16th October 1891. Mean for district.	Since 16th October 1891. Normal mean.	Since 16th October 1891. Variation.	Of week. Average number of rainy days.	Of week. Normal number of rainy days.	Representative station.	District.	Meteorological Division.

Explanation.—......indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the 1st December* 1891.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 28TH OF NOVEMBER 1891.

DURING the previous week the weather conditions in the south of the Bay had been decidedly disturbed for a considerable period, but up to the close of that period no storm had been formed, and indeed on the 21st, or the last day of that week, conditions were much less disturbed than they had been, and on the Saturday there were no indications even of the existence of any barometric depression of importance, and still less of the formation of a storm. It is probable, however, that on the morning of this day a storm was gradually developing over the area in the Bay where pressure had been persistently low for several days, for the observations received on the morning of Sunday 22nd indicated very clearly that a cyclonic storm had formed to the west-south-west or south-west of Diamond Island, and apparently not very far away from land, the storm being well on the east side of the Bay. After its formation the storm commenced to move rather rapidly in a north-easterly or north-north-easterly direction. The centre of the cyclone passed to the west of Diamond Island about 5 A.M. of the 23rd, and during the passage of the storm near Diamond Island, even though the centre of the storm was not by any means near the land—for the lowest barometric reading recorded there was not lower than about 29.6 inches—that station reported winds of hurricane force with a tremendous sea, and for part of the night the wind velocity averaged 45 miles an hour. As the storm approached nearer the land the direction of its advance became more easterly, and during a large part of the 23rd it was advancing in a north-easterly or east-north-easterly direction, and perhaps when it struck the coast on the night of the 23rd or the morning of the 24th it was even travelling in an easterly direction. There are no meteorological observatories on the Burma coast between Diamond Island and Akyab, a distance of about 350 miles; but, so far as can be judged, the storm crossed the coast about midway between the two stations, though in the absence of any neighbouring observatory it is impossible to say the precise point of the coast crossed by the storm or what the depression of the barometer was near the centre of the storm. From the wind velocities recorded at Diamond Island, which are some of the highest ever registered at that station, it is clear the storm was a very severe one, and that such was the case is also proved by the experience of various vessels which were involved in the cyclone and which suffered damage from it. Directly, however, the storm passed inland and into the Arakan Hills, it must have commenced to break up rapidly, for at 8 A.M. of the 24th there was very little evidence of the existence of the storm at all, though pressure was still low over Burma, and by the morning of the 25th all trace of the existence of the former fierce cyclone had disappeared. The storm was probably of small diameter only though very fierce; it had also an exceedingly short life history, and the amount of rainfall brought up by it was comparatively small and was mainly confined to Burma.

From the 26th to the 28th, or for the remainder of the week, there was again ample evidence of the existence of a low-pressure area in the south of the Bay probably between the Andamans and the Madras coast; but this did not develop in any way, although the strong easterly and north-easterly winds which continued to blow at Diamond Island at this time pointed to the existence of squally unsettled weather generally in the south and east of the Bay.

As is usual, the disturbed weather in the Bay reacted on the general weather conditions in Bengal, and again the week has been one in which the cold weather conditions have not been at all fully developed. During the existence of the storm, and to a smaller extent at the close of the week, the skies became more clouded than usual, the air became damp, and temperature rose and became very much above the normal; pressure also fell for a considerable period, but the storm was too far away to affect the general pressure in Bengal to any material extent. As might be expected, the weather was more affected in the southern and south-eastern districts than elsewhere, and at a few stations in South-East Bengal a few light showers were reported; but these were of little practical importance. Elsewhere the whole province has again been rainless during the week.

Pressure.—The mean pressure for the week has been slightly below the normal over the greater part of the province, but the defects have been largest at the southern stations, where they generally equal from 0·02" to 0·03". At the northern stations in the province the defects are either very small and of only a few thousandths of an inch, or in several cases very slight excess amounts have been registered.

Temperature.—The mean temperature for the week has been from 2° to 3° in excess of the normal in South, West, East and North Bengal, and in Chutia Nagpur and South Behar. In Orissa the excess has been 1·6° and in North Behar 0·6°. For the whole province, therefore, the mean temperature for the week has been 2·1° in excess of the normal. The distribution of temperature during the week and its variation from the normal are best seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with their normal

values for the same period. The excess temperature, it will be seen, has been almost equally marked in both day and night temperatures :—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 28th November 1891.

	Normal mean maximum temperature for the week ending 28th November.	Actual mean maximum temperature for the week ending 28th November 1891.	Variation of actual mean from the normal. Rainfall.—The only stations at which falls in excess of a tenth of an inch have fallen during the week have been Rangamati, Agartolah (1·35 inches), Mymensingh (0·54 inch during a dust storm accompanied by rain and hail), and Netrokona. Elsewhere the whole province has been practically rainless.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 28th of November 1891 :—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.						RAINFALL.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew.

METEOROLOGICAL OFFICE, INDIA,
The 30th November 1891.

MEMORANDUM.

Report on the Monthly Statistics of Deaths registered in forty-five districts of Bengal for the month of August 1891.

THE total number of deaths registered in forty-five districts of Bengal during the month of August 1891 amounted to 142,154, against 116,479 in August 1890, and an average of 120,573 in the corresponding month of the previous five years, 1886—90. These figures represent an annual death-rate of 25·80, 21·12 and 21·96 per 1,000, respectively, of the aggregate population of those districts, which is 65,859,534. The death-rate of August 1891 is 3·84 higher than the mean rate of the corresponding month of the past five years, 1886—90, and is also higher than the rate of the corresponding period of any of the past five years with which comparison is instituted, *vide* the figures below—

	August 1886.	August 1887.	August 1888.	August 1889.	August 1890.	Monthly average of five years, 1886—90.	August 1891.
Number of deaths	113,678	137,368	108,530	126,815	116,479	120,573	142,154
Ratio per mille per annum	20·04	24·96	19·68	23·04	21·12	21·96	25·80

It will also be seen from the following table that the death-rate of the forty-five districts during August 1891 is greater than the previous months of the year except January, March and April:—

Months.			*Number of deaths.*	*Ratio per mille.*
January	...	..	143,492	26·04
February	...	...	137,553	24·96
March	...	...	168,185	30·60
April	...	...	161,980	29·52
May	...	...	125,975	22 92
June	...	...	140,594	25·56
July	...	...	121,977	22 20
August	...	...	142,154	25·80

The following table exibits the registered results as they occurred among the different sexes and the several classes of the community which comprise the population of the Bengal Province. As usual, more males died than females. The ratio of deaths among the sexes, calculated on the proportion the mortality bears to the total male and female population of the province, is as 116 is to 100; but, individually considered, in only three districts, viz, Dinagepur, Darjeeling, and Noakhali, the death-rates among females is greater than that among males. Of the several classes of the community, in proportion to population, death is greater among the Hindus, next among Buddhists, then among the Other classes and Mahomedans. Christians suffered the least:—

	Sexes.			Classes.				
	Males.	Females.	Ratio of male deaths to every 100 female deaths, calculated on the proportion such mortality bears to the total male and female population.	Christians.	Hindus.	Mahomedans.	Buddhists.	Other classes.
Number of deaths	75,832	66,322	...	152	90,000	38,607	168	3,267
Ratio per mille per annum ..	27·84	23·88	116	18·72	27·00	21·72	25·32	23·40

The following table shows the proportions of deaths registered during the month of August 1891, above 25 per mille, arranged in order of sequence, and compared with the ratios of the corresponding month of 1890:—

Districts.		Ratio per *mille* during— August 1891.	August 1890.	*Districts.*		Ratio per *mille* during— August 1891.	August 1890.

It will be seen from the statement appended to this memorandum that the highest death-rate occurred in Gya, 54 36 per mille per annum, and the lowest in Mymensing, 14·28 per 1,000 of population. In eighteen districts the death-rates were above 25 per mille, in sixteen between 20 and 25, and in the remaining 11 below 20. In the districts which show a lower death-rate than 20 per mille per annum, registration of deaths does not appear to have been accurately carried on.

The total mortality from the several registered death-causes during the month under review is compared in the following table with the mortality from those causes in the corresponding month of 1890, and the average of the previous five years, 1886—90:—

	Ratio per *mille* during—		
	August 1891.	August 1890.	Monthly average of five years, 1886—90.
Cholera	2·64	1·32	2·04
Small-pox	·12	·08	·04
Fever	18·00	15·24	15 00
Dysentery and diarrhœa	·60	·48	·72
Injury	·72	·72	·72
Other causes	3·48	3·00	3·00

Compared with the figures of both the past periods, there is a considerable increase in the mortality of August 1891 under the heads cholera and fever.

The deaths from *Cholera* numbered 14,548, which is equivalent to an annual rate of 2·64 per 1,000 of population, against 20,049 (ratio 3·60 per mille) in the preceding month. The greatest severity of this disease was felt in Gya and Shahabad, which returned death-rates of 17·76 and 17·64 per 1,000 per annum, respectively, then in Sarun, where the death-rate was 8·40, in Patna 7·32, Chumparun 6·, Mozufferpore 4 80, Monghyr 4·20, Durbhanga 3·24, Bhagulpore 3 24, Lohardugga 2·64, and in Hazaribagh 2·52. From three districts, viz., Noakhali, Tipperah, and Singbhoom, the disease was entirely absent.

Small-pox carried of 659 persons (ratio ·12 per mille per annum), against 1,335 (ratio ·24) in the month before. Midnapore and Cuttack returned the highest small-pox death-rate (1·20 per mille per annum) each, followed by Pooree ·84 per mille. Nine districts, viz., Birbhum, Serampore, Rajshahye, Rungpore, Pubna, Darjiling, Noakhali, Tipperah, and Bhagulpore, were entirely free from this disease.

Fever caused 99,028 deaths (ratio 18· per 1,000 per annum), against 77,775 (ratio 14·16) in the preceding month, and *dysentery and diarrhœa* proved fatal in 3,668 instances (ratio ·60 per mille per annum), against 3,272 (ratio ·48) in the previous month. All the districts suffered from the latter ailments. The greatest mortality rates from fever were recorded in Darjiling (30·12), Gya (29·16), Dinajpur (28·80), Maldah (27·72), Julpaiguri (26·16), Shahabad (25·56), Rajshahye (24·96), Monghyr (24·60), Patna (24·12), Hazaribagh (23 64), Jessore (22·68), Murshedabad (21·48), Chumparun (21·24), and Bhagulpore (20·76). Darjiling also returned the highest death-rate from dysentery and diarrhœa, viz., 11·16 per mille; Howrah and Balasore stand next to Darjiling with a death-rate of 3·36 per mille each, followed by Pooree 3·.

Injury proved fatal in 4,204 instances (ratio ·72 per mille), against 3,945 (ratio ·60) in the previous month, and the mortality from *all other causes* not specified amounted to 19,747 (ratio 3·48 per mille), against 15,601 (ratio 2·76) in the preceding month. Pooree returned the highest death-rate from the unspecified diseases coming under the head "All other causes," viz., 11·76 per 1,000 per annum, next Sarun (10·44), then Patna (9·).

With regard to mortality according to *Age*, infants under one year of age, as usual, perished in the largest numbers, viz., at the rate of 187·20 per 1,000 of population per annum, next came old persons (60 years and upwards) with a death-rate of 59·16 per mille. The lowest death-rate occurred among persons between 10 and 15 years of age, viz., 13·08 per 1,000 per annum.

Detailed information regarding the mortuary statistics of the forty-five districts of Bengal during the month under review will be found in the statement appended.

W. H. GREGG, *Dip. Publ. Health, Camb.*,
Sanitary Commissioner for Bengal.

The 27th November 1891.

Statement showing the Results of the Registration of Deaths in the Districts in Bengal for the month of August 1891.

Increase.

	Tons.
Coal	873
This is due to greater import for storage.	
Cotton piece goods—	
(1) European	10
Due to Durga Poojah requirements.	
Grains—	
(4) Others	63
Due to greater import of indigo seed.	
Jute—	
(1) Raw	88
Due to greater despatch of pressed jute from Jiaganj.	
Oils—	
(2) Kerosine	24
This is due to E. I. Railway rate being high carried by steamer to Azimganj and thence by railway to Nalhati.	
Oil-seeds—	
(2) Mustard and rape	56
Due to greater import for high demand.	
Salt	32
This is due to greater import to intermediate stations.	
Tobacco	35
There was no traffic in this head last year.	

Decrease.

	Tons.
Grains—	
(2) Rice	26
Less exported owing to local rate being high.	
Railway plant and rolling-stock	
Less materials carried.	
Sugar—	
(2) Undrained	26
Due to less import owing to dull market rate.	

R. G. Mookerjee.
Manager, Nalhati State Railway.

Weekly Return of Traffic Receipts on Indian Railways.

EAST INDIAN RAILWAY.

WORKS OF PUBLIC UTILITY CONSTRUCTED DURING THE YEAR 1890.

No. 3543M.P.I.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Mis. Pub. Improvements.

Dated Calcutta, the 3rd December 1891.

READ—

Statement of works of public utility constructed by private individuals in the several districts of Bengal during the year 1890.

READ AGAIN—

Statement of similar works constructed during 1889, and the Resolution thereon.

REMARKS.—The works of public utility constructed by private individuals in 1890 were as follows :—

	Number.	Cost.
		Rs.
Public buildings	9	45,948
Roads	5	1,425
Bridges	2	650
Embankments or bunds	5	8,519
Tanks	239	1,82,902
Wells	33	9,700
Ghâts	5	27,300
Irrigation channels	2	1,156
Other works	7	23,815
		3,01,415
Petty works costing below Rs. 200 each ...	...	34,729
Total ...	307	3,36,144

2. The total number of works costing more than Rs. 200 each which were constructed during the year under review, and the amounts contributed, including donations for petty works, as compared with those of the previous two years, are shown below :—

Year.	Number of works costing between Rs. 200 and Rs. 500 each.	Number of works costing more than Rs. 500 each.	Total number of works costing Rs. 200 and upwards each.	Total expenditure on works costing Rs. 200 and upwards each.	Add cost of petty works under Rs. 200.	Total contributions.
				Rs. A. P.	Rs. A. P.	Rs. A. P.
1888 ...	331	132	463	3,20,492 9 0	74,749 8 0	3,95,242 1 0
1889 ...	484	354	838	5,58,277 2 0	90,856 13 9	6,49,133 15 9

Total ...	307	3,01,415

4. Of the works enumerated in paragraph 1, the following are specially noted:—

Public buildings.—Under this head, a sum of Rs. 45,948 was contributed. Of this amount, Surat Mandal gave Rs. 1,200 for a mosque at Bagula, in the Nadiya district; Babu Sarut Chundra Ray Chowdhury gave Rs. 7,000 for a school building in the town of Gaibandha, in the Rangpur district; Moulvie Khoda Bux, Khan Bahadur, gave Rs. 32,000 for a library at Chowhatta, in the Patna district; and Babu Jadu Lal Marwari gave Rs. 3,000 for a serai at Bhogwan Bazar, in the Sarun district.

Roads.—The total of Rs. 1,425 under this head is made up mostly of small amounts, the largest being Rs. 400 given by Panjoo Howladar for a road in Char Hogla, in the district of Backergunge.

Bridges.—Rs. 650 only were contributed for two bridges—one costing Rs. 350 at Dhoomnagar, in the Champaran district, and the other costing Rs. 300 near the Panka river, in the Monghyr district, which were constructed, respectively, by Roopan Kahar and Nanku Kampti.

Embankments or bunds.—Of Rs. 8,519 contributed, Rs. 5,441 were given by Mr. William Maling Grant for a bundh at Deegalpahari, in the Sonthal Pergunnahs. This gentleman also gave Rs. 1,624 and Rs. 929 for two other bundhs in the same district.

Tanks.—Under this head the large sum of Rs. 1,82,902 was contributed. The following contributions are specially noted:—Babu Nil Madhub Hazra, Burdwan district, Rs. 2,000; Babu Dwarka Nath Chakravarti, Hooghly district, Rs. 5,000; Sheikh Tofeluddin, Hooghly district, Rs. 4,000; Ranee Mon Mohiny Dabya, Rajshahai district, Rs. 30,000; Meherulla Sarkar, Rajshahai district, Rs. 2,000; Babu Tara Chand Saha, Pabna district, Rs. 4,540; Manaraddi Choudhuri, Tipperah district, Rs. 2,500; Doolhin of Bettiah, Champarun district, Rs. 5,000; and Babu Anaroodha Jha, Champarun district, Rs. 4,000.

Wells.—Rs. 9,700 were spent in constructing wells. Rs. 600 were contributed in the district of Pabna for one well; Rs. 700 in the district of Maimensingh for two wells; Rs. 1,800 in the district of Shahabad for six wells; and Rs. 4,250 in the district of Monghyr for sixteen wells. The other wells for which contributions were given during the year are distributed among the districts of Dinajpur, Rajshahai, Gaya, Chumparun, Sarun, and Cuttack.

Ghâts.—The Jute Mills Company of Gouripore gave Rs. 2,000 for a pucca bathing ghât on the riverside at Gouripore, in the 24-Pergunnahs district, with a pucca road leading to it; Kaimuddi Bepari gave Rs. 800 for a masonry ghât to the Government tank at Bhola, in the Backerganj district; Babu Jadu Lal Marwari gave Rs. 1,800 for a pucca ghât on the river Gogra at Rattanpurwah, in the Sarun district; and Babu Mahabir Pershad gave Rs. 22,000 for a bathing ghât on the river Daha at Sewan, in the same district.

Irrigation channels.—Only two irrigation channels or dhars were constructed during the year, and both in the Sonthal Pergunnahs—one at Doondia at a cost of Rs. 247, and the other from Deegalpahari bundh to Tilabooni at a cost of Rs. 909. This latter sum was contributed by Mr. William Maling Grant.

Other works.—Under this head are included repairs and improvements. Babu Janoki Ballab Sen gave Rs. 20,000 for excavating the dry bed of the Ghaghat river, in the Rungpore district; His Highness the Maharajah of Kuch Behar gave Rs. 2,350 for repairing the Patgram and Morangahat road and the emigration roads and bridges thereon in the Jalpaigori district, and Rs. 240 for removing and improving the hât site at Patgram; Babu Jadu Lal Marwari gave Rs. 700 for improving a tank at Bhogwan Bazar, in the Sarun district; Babu Bhokta Ram Rai gave Rs. 200 for repairing a tank at Panrora, in the Sonthal Pergunnahs district; and Babus Beer Coomar, Bhanja and Ram Churn Singh gave Rs. 325 for repairing a bundh at Doondia, in the same district.

RESOLUTION.—The donations for works of public utility have diminished considerably both in number and amount, and the Lieutenant-Governor hopes that the decrease noticed is a temporary one, and that future reports will show

a decided improvement both in the number of works constructed and the sums contributed for them. To those who have contributed towards such works during 1890 the Lieutenant-Governor tenders his acknowledgments for their public spirit and liberality, and in doing so His Honour desires to express a hope that the good example set by them will be followed by those who can afford to contribute towards works of usefulness for the benefit of the poorer classes in the country.

Letters of acknowledgment will be forwarded by the Government to those who have constructed works costing over Rs. 500. The contributors of works costing Rs. 500 and under will, as usual, receive an acknowledgment from the Commissioner or the Magistrate of the division.

ORDER.—Ordered that a copy of this Resolution and of the statement be forwarded to the Board of Revenue, Lower Provinces, and to all Commissioners of Divisions; to the Commissioner of Chutia Nagpur, and to all Superintending Engineers of Public Works Circles in Bengal, for information.

Ordered also that a copy of this Resolution and of the statement be forwarded to the Revenue and Judicial Departments of this Government for information.

Ordered also that this Resolution and the statement be published in the Supplement to the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

F. J. JOHNSTONE,

Joint-Secretary to the Government of Bengal.

Statement of works of public utility constructed by private individuals during the year 1890.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 5th December, 1891.

No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
BURDWAN DIVN.				
1	Burdwan Culna Cutwa Raneegunge	Dec. 5, '91	Nil 0·06 Nil Nil	Weather—seasonable. Harvesting of *aman* going on. Prices of common rice:— Srs. Sudder ... ... 15½ } Raneegunge ... ... 15½ } per rupee. Cutwa ... ... 15 } Culna ... ... 14 }
2	Bankoora	„ 5, '91	Nil	Weather—cloudy and rather warm for the season. Harvesting of winter rice and sowing of *rabi* crops continue. Condition of cattle good. Supply of fodder and water sufficient. Common rice selling at 18 seers per rupee at Bishenpore and 17 seers at the Sudder market.
3	Birbhum Rampore Haut	„ 5, '91 ...	Nil Nil	Weather—fair and cool. Harvesting of winter rice in progress. *Rabi* sowings continue and prospects good. Common rice selling at from 14½ to 18½ seers per rupee. Supply of fodder and water sufficient.
4	Midnapore	„ 5, '91	Nil	Weather—getting cooler every day. Harvesting of *haimanti* paddy going on. *Rabi* crops and indigo doing well. Fodder sufficient. Prices of common rice:— Srs. Sudder ... ... 18 } Contai ... ... 20 } per rupee. Tumluk ... ... 16 } Ghatal ... ... nearly 16 }
5	Hooghly Serampore Jehanabad	„ 5, '91	Nil Nil Nil	Weather—fair; rather warm for the season. *Aman* rice on high land has suffered for want of rain; total outturn 8 to 10 annas. Prospects of sugarcane and potatoes fair. Fodder and water-supply sufficient. Prices of common rice:— Srs. Sudder ... ... 12 } Serampore ... ... 13 } per rupee. Jehanabad ... ... 16 }
6	Howrah Uluberia	„ 5, '91 ...	Nil Nil	Weather—fine. *Aman* crop on higher lands has suffered from drought; otherwise there is a prospect of an average harvest. Sugarcane good. Price of common rice 14 seers per rupee. Cattle are healthy. Fodder and water-supply adequate.
PRESIDENCY DIVN.				
7	24-Perghs.	„ 5, '91	Nil	Weather—seasonable. Harvesting of *aman* has commenced. Sowing of winter crops still continues. Prices stationary. No cattle-disease reported. Supply of fodder and water sufficient.
8	Nuddea Kushtea Meherpore Chuadanga Ranaghat	„ 5, '91	Nil Nil Nil Nil 0·04	Weather—rather warm. Sky often clouded, but no immediate sign of rain. Harvesting of *aman* nearly finished; outturn poor. Condition of *rabi* crops continues bad for want of rain. Common rice selling at from 12 seers 12 chittacks to 15 seers per rupee. Condition of cattle good and supply of fodder and water sufficient.
9	Khoolna Bagirhat Satkhira	„ 5, '91	Nil Nil Nil	Weather—seasonable; occasionally cloudy. Prospects of *aman* fair. Reaping of *chhotan* paddy going on. Prospects of *rabi* crops not very good. Prices of common rice range from 13 to 16 seers per rupee. Fodder and water sufficient.
10	Jessore Jhenidah Narail Bongong	„ 5, '91	0·04 Nil Nil Nil	Weather—seasonable. Harvesting of *aman* paddy going on. Prospects of winter crops not favourable. No cattle-disease reported. Supply of water and fodder for cattle sufficient.
11	Murshedabad	„ 5, 91	Nil	Weather—seasonable. Harvesting of winter rice going on. *Rabi* crops are still being sown in Kandi and Sudder subdivisions. Fodder available. Ten head of cattle died of small-pox in Kandi subdivision.
CHITTAGONG DIVN.				
12	Chittagong	„ 5, '91	Nil	Weather—warm for the season; cloudy sometimes. State and prospects of winter rice crop fair. Prices stationary. Condition of cattle good. Fodder sufficient.
13	Noakhally	„ 5, '91	Nil	Weather—somewhat cloudy and unseasonably warm. *Aman* harvest progressing. *Rabi* crops coming up. Condition of cattle and supply of fodder and water good. Price of rice fairly stationary.
14	Tipperah	„ 5, '91	Nil	Weather—seasonable. Prospects of crops fair. Fodder sufficient. No cattle-disease reported from any part of the district.
15	Chittagong Hill Tracts.	„ 3, '91	0·29	Weather—seasonable. Gathering of cotton and harvesting of plough-paddy continue. Sowing and transplanting of winter crops almost over. Common rice sells at 12 seers 15 chittacks per rupee.

Division	No	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concluded.*					
DACCA DIVN.	16	Dacca	Dec. 5, '91	Nil	Weather—seasonable. Harvesting of *aman* rice going on. Prospects appear favourable. Fodder available. Common rice selling at from 13 to 17 seers per rupee. Condition of cattle good.
	17	Furreedpore Goalundo Madaripore	„ 5, '91	Nil Nil Nil	Weather—seasonable. Harvesting of *aman* paddy in progress. Cultivation and sowing of winter crops continue. Condition of cattle good and foddor available. Price of rice stationary.
	18	Backergunge	„ 5, '91	Nil	Weather—seasonable. Prospects of crops good in Patuakhali and Perozepore subdivisions, but poor in Bhola and Sudder subdivisions. Price of common rice varies from 11½ to 17 seers per rupee. Supply of fodder and water sufficient.
	19	Mymensingh	„ 5, '91	Nil	Weather—seasonably cold. Prospects of crops fair except in Jamalpore subdivision. Harvesting of *aman* crop continues. Common rice sells on average at 14½ seers per rupee. Condition of cattle good. Supply of water and fodder on the whole sufficient.
RAJSHAHYE DIVN.	20	Dinagepore Thakurgaon	„ 5. '91 ...	Nil Nil	Weather—cool. Prospect of winter rice not good. Cultivation of *rabi* crops still going on. Price of rice at Sudder 11 seers and at Thakurgaon 10 seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.
	21	Rajshahye Nattore Nowgong	„ 5, '91	Nil Nil Nil	Weather—seasonable. Prospects of winter rice the same as before. Prospects of *rabi* crops good. Price of common rice varies from 12 to 16 seers per rupee. No cattle-disease reported. Supply of water and fodder sufficient.
	22	Rungpore Nilphamari Gaibanda Kurigram	„ 5, '91	Nil Nil Nil Nil	Weather—hot with cold mornings. Harvesting of *aman* going on. Prospects unchanged. Ordinary common rice is being sold at from 9 to 12 seers per rupee. Prospects of *rabi* crops favourable. Fodder sufficient.
	23	Bogra Sherpur Nowkhilla	„ 5, '91	Nil Nil Nil	Weather—seasonable. Prospects of *rabi* continue to be good. A yield of more than 8 annas of *aman* cannot be expected. No want of fodder and water. Common rice selling at 13½ seers per rupee.
	24	Pubna	„ 5, '91	Nil	Weather—seasonable. *Aman* paddy has been reaped for the most part, with an average outturn of 7 or 8 annas for the whole district. *Rabi* crops doing well, but require more rain. Tobacco expected to be a 12-anna crop. Sugarcane doing well Common rice selling at 13 seers per rupee. Supply of fodder and water sufficient. No cattle-disease.
	25	Darjeeling	„ 5, '91	Nil	Weather—fair. Reaping of high land paddy going on; low land paddy continues to ripen, and grain is getting hard. For want of rain in time an outturn of 10 annas is expected. *Kalai*, potatoes, and *turi* at Silliguri progressing well. No disease among cattle. Fodder and water-supply sufficient. Prices of common rice :— Srs. Silliguri ... ... 11 Phansidewa ... ... 9 Kurseong ... ... 10 Kalimpong ... ... 9 Darjeeling ... ... 10 Pulbazar ... ... 11 Jore Bungalow ... ... 10 Sonadah ... ... 10 Nagri ... ... 8 } per rupee.
	26	Julpigoree	„ 5, '91	Nil	Weather—seasonable. Harvesting of *haimanti* paddy commenced in places; ears small and poor outturn expected owing to insufficient rain. Transplantation of tobacco continues. Prospects of *rabi* crops favourable. Rice sells at 10 seers per rupee at head-quarters and 8 seers at Alipore. No cattle-disease. Foddor and water-supply abundant.
BEHAR.					
BHAGULPORE DIVN.	27	Monghyr Beguserai Jamui	„ 5. '91	Nil Nil Nil	Weather—clear and seasonable. *Rabi* crops doing well in Beguserai. Prospects unchanged in Jamui. Some damage to *rabi* from insects reported in the Sudder. Harvesting of winter rice has commenced in Jamui. Sowings of poppy completed in several villages, but retarded in some where difficulties of irrigation exist. Common rice selling at 13 to 15½ seers per rupee in Sudder, 12 to 14½ seers in Jamui, and 11 seers in Beguserai. Fodder and water-supply sufficient.
	28	Bhagulpore	„ 5, '91	Nil	Weather—seasonable. Harvesting of winter rice going on. Prospects of rice and *rabi* not improved. Prospects of *kurthi* fair. Sowing of linseed nearly finished. Fodder sufficient. Price of common rice 13½ seers per rupee.
	29	Purneah Kishengunge Arrareah	„ 5, '91	Nil Nil Nil	Weather—cooler. *Aghani* rice and *kurthi* are being cut. *Tori* (mustard) in flower. State of *rabi* crops still generally good, but rain needed. Price of rice at Arrareah 14 seers, Kishengunge 10 seers, and Head-quarters 11 seers per rupee. No cattle-disease. Fodder and water-supply sufficient.
	30	Maldah Chanchal Shibgunge Gajole	„ 5, '91	Nil Nil Nil Nil	Weather—moderately cool, but a little cloudy at intervals. Reaping of winter rice has commenced in Shibgunge, Nawabgunge, Gomastapur, and Gazole thanas; outturn estimated to be not less than 8 annas. *Kalai* and other standing crops thriving. Sowing of *boro* paddy has begun in some places. Common rice sells at 11 to 15 seers per rupee. Supply of fodder and water ample. No cattle-disease.
	31	Sonthal Perghs.	„ 5, 91	Nil	Weather—seasonable, but cloudy at times. Winter rice is still being reaped; outturn estimated to be 12 annas in Jamtara, Pakour, and Dumka, [illegible] annas in Deoghur, 9 annas in Godda, and 8 annas in Rajmahal. *Rabi* crop as far as sown is yet fair, but rain is urgently wanted. Price of common rice 16 seers in the Sudder subdivision. In Deoghur most tanks are reported dry, otherwise fodder and water-supply sufficient.

No.	District and date of return.	Rainfall at Sudder station in inches	Character of the weather and state and prospects of the crops.
	BEHAR—(concld.)		
	Patna Division.		
32	Patna Dec. 5, '91 Barh ... Behar ... Dinapore ...	Nil Nil Nil Nil	Weather—cool and clear. Harvesting of paddy and sowing of *rabi* and poppy almost completed. *Rabi* and poppy have germinated well and are being irrigated from wells and reservoirs. No distress reported from any quarter. Prices of food-grains almost stationary.
33	Gya „ 5, '91 Jehanabad ... Nawada ... Aurungabad ...	Nil Nil Nil Nil	Weather—cold and sometimes cloudy. Paddy is being harvested. Wheat and linseed are being injured by insects. Sugarcane is being crushed. Rain urgently wanted for *rabi* and poppy. Prices almost stationary. Supply of fodder and water for cattle yet sufficient.
34	Shahabad „ 5, '91 Buxar ... Sassaram ... Bhabua ...	Nil Nil Nil Nil	Cold weather has set in. Paddy harvest nearly over; general outturn will not exceed half an average crop. *Rabi* crops doing fairly well in spite of short rainfall. *Arhur* and mustard in flower. Poppy germinating. Sugarcane is being cut and pressed. Prices tend upwards.
35	Durbhunga „ 5, '91	Nil	Weather—cool and occasionally cloudy. Paddy being reaped. High land paddy mostly cut, but the yield is almost nil. *Rabi* suffering from want of moisture. Prices continue stationary. Fodder and water plentiful.
36	Mozufferpore „ 5, '91 Hajipore ... Sitamarhi ...	Nil Nil Nil	Weather—seasonable. Rice is being harvested everywhere. *Rabi* in low lands and where it is irrigated is doing fairly well, but if rain does not come soon the crop will be a bad one. Other standing crops doing well. Poppy sowings on unirrigated lands have mostly failed, but on irrigated tracts progressing very well. Prices stationary. Cattle in good condition. Fodder and water sufficient.
37	Sarun „ 5, '91	Nil	Weather—warm for the season. Paddy outturn 4 annas for the whole district. *Rabi* doing well. Poppy sowings continue. Fodder and water sufficient. Prices of common rice:— Srs. Sudder ... ... 13 } per rupee. Sewan ... ... 16½ } Gopalgunge ... ... 14½ }
38	Chumparun „ 5, '91	Nil	Weather—seasonable. Harvesting of *aghani* rice commenced in places. *Rabi* sowings still going on. Prospects fair. Supply of fodder and water sufficient. Poppy sowings almost completed; prospects said to be good, but in places seedlings have been destroyed by heat during the day, which has been greater than usual at this time.
	ORISSA.		
	Orissa Divn.		
39	Cuttack „ 5, '91	Nil	Weather—seasonable. *Laghu sarad* is being harvested. *Guru sarad* attaining maturity. Transplantation of tobacco going on. *Rabi* crops growing. A shower of rain wanted in parts of Banki for *rabi* crops. Common rice sells at 13 seers 2 chittacks per rupee. Cow-pox and rinderpest reported in parts. Otherwise condition of cattle good. Fodder-supply sufficient.
40	Pooree „ 3, '91 Khurda ... Banpur ...	Nil Nil Nil	Weather—cloudy and cool. *Laghu* being reaped and *sarad* ripening. Miscellaneous crops doing well. Common rice sells at from 14 to 19 seers per rupee. Cattle-disease reported from Bogunia, Khurda, and Banpur.
41	Balasore „ 5, '91	Nil	Weather—seasonable. Harvesting of winter rice continues. Prospect good. Rice selling at Balasore 13 seers and at Bhudrak 20 seers per rupee.
	CHOTA NAGPORE		
	South-West Frontier Agency.		
	Chota Nagpore Divn.		
42	Hazaribagh Dec. 5, '91 Giridih ...	Nil Nil	Weather—bright and clear. Harvesting of paddy nearly completed; estimated outturn 12 annas. Common rice selling at from 14 to 18 seers per rupee. Rain urgently wanted for *rabi* crops. Poppy doing fairly. Fodder and water-supply sufficient.
43	Lohardugga „ 5, '91 Palamow (up to 30th Nov.)	Nil Nil	Weather—getting cold. Harvesting of winter rice continues. Rain badly wanted for *rabi* crops. Price of common rice 15 seers per rupee. Ample fodder for cattle.
44	Singhbhoom „ 5, '91	Nil	Weather—clear; warm for the season. Harvesting of paddy continues with full outturn. Cold-weather crops doing well.
45	Manbhoom „ 5, '91 Govindpore ...	Nil Nil	Weather—seasonable. Prospects of crops continue good. Outturn of rice crop estimated at over 10 annas. Rice selling at from 15 to 21 seers per rupee. Fodder and water-supply still sufficient.

STATISTICAL DEPARTMENT,
The 7th December, 1891.

C. E. BUCKLAND,
Offg. Secy. to the Govt. of Bengal.

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of November 1891.

	Inches.	Date.	Hour.
The mean pressure of the month	29·934		
The average pressure of November from 24 years' registers ...	29·970		
The highest pressure in the month	30·148	30th	10
The lowest pressure in the month	29·707	6th	6
The range of pressure	0·441		
	Hours.		
The total number of hours of bright sunshine during the month	242·0		
The maximum possible number of hours of sunshine ...	330·8		
	ϴ		
The mean temperature of the month	73·6		
The average temperature of November from 24 years' registers	74·8		
The highest temperature in the month	86·8	2nd & 3rd	
The lowest temperature in the month	60·1	20th	
The range of temperature during the month	26·7		
The mean daily range of temperature	17·7		
The greatest range of temperature in one day	22·6	20th	
	Per cent.		
The mean humidity of the month	75		
The average humidity of November from 24 years' registers ...	72		
	Inches.		
The mean vapour tension of the month	0·615		
The average vapour tension of November from 9 years' registers	0·616		
The mean cloud proportion of the month	2·18		
The average cloud proportion of November from 14 years' registers	2·61		
The total rainfall of the month	0·51		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	0·50		
The average fall of November from 48 years' registers ...	0·65		
The greatest fall in 24 hours	0·49	6th	
	Days.		
The number of rainy days in the month	3		
The average number of rainy days in November from 24 years' registers	2		
	ϴ		
The mean maximum equilibrium temperature of solar radiation during the month	136·6		
The mean difference of sun and air temperatures	53·6		
The greatest sun temperature	146·5	27th	
The greatest excess of sun over air temperature	63·4	27th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	59·4		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	6·0		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	8·5	2nd	
	Miles.		
The mean movement of the wind per day	81·9		
The greatest movement of the wind in one day	289·0	6th	
The greatest movement of the wind in one hour	19·0	6th, 11 to noon.	

The number of hours with winds from each of the 8 points—

N. 296, N.E. 149, E. 70, S.E. 13, S. 14, S.W. 21, W. 10, N.W. 103, Calm 44.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore ·003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 1·6° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0·6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

C. LITTLE,

For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, INDIA;
Calcutta, the 7th December 1891.

Meteorological Report of the Province of

Meteorological Division.	District.	Representative stations.	Station Observations. Air Pressure. Highest, 8 A.M., barometer reading of month.	Lowest, 8 A.M., barometer reading of month. SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF NOVEMBER 1891.

THE main features in the meteorology of November have been—

1. The formation of two very severe cyclones in the neighbourhood of the Andaman Islands. The first originated probably a little to the east of the Andamans on the 1st, then moved north-westwards till it almost reached the Ganjam coast. It then recurved and moved in a northerly direction along and close to the Orissa coast, then it moved in a north-easterly direction, crossing the Sunderbuns to the east of Saugor Island, then travelled through East Bengal into Assam and Upper Burma, where it filled up and disappeared. The second storm originated on the 21st to the west or west-north-west of Diamond Island, and afterwards travelled in a north-easterly or north-north-easterly direction, crossing the Burma coast about midway between Diamond Island and Akyab late on the night of the 23rd or the early morning of the 24th. Both these storms were very severe and caused several disasters at sea and on land.

2. In addition to these two cyclones which caused exceptionally stormy weather in the Bay, diffused disturbances or feeble barometric depressions have also existed in the south of the Bay, usually between the Andamans and Madras coast, for a considerable portion of the month, but beyond giving unsettled weather in the Bay with its accompanying unsettled weather in Bengal, the disturbances did not materially affect the weather and did not develop into storms.

3. The first of the two cyclones gave good general rain of about twice or three times the normal amount to South-West and East Bengal and parts of North Bengal, and exceptionally heavy rain to Orissa, which received nearly five times the usual fall; Chutia Nagpur and South Behar also received showers, but North Behar was quite rainless.

4. Owing to the two cyclones and to the continued periods of disturbance in the Bay, the weather in Bengal has been unsettled for a considerable part of the month, and the usual north-east monsoon or cold weather conditions have only set in very partially.

5. Temperature has therefore been rather largely in excess in all districts of Bengal, except Orissa. The usual excess has been about two to two and a half degrees in South Behar and Chutia Nagpur, and from one to one and a half degrees in South-West, East and North Bengal and North Behar, but in Orissa the excess is less than half a degree. In Assam the mean temperature has been almost normal.

6. Humidity and cloud proportion have also been decidedly in excess of the normal.

7. The variations of pressure during the month have been considerable, but the mean pressure has not been far removed from the normal. Distinct defects amounting to about 0·02" have been recorded in Orissa and the neighbouring parts of South-West Bengal, while on the other hand, at many of the northern stations, slight excess pressures have been recorded, so that for the whole province of Bengal the mean pressure has been almost normal. In Assam also pressure has been very nearly normal.

Meteorological summary of the month.—In the report for October, it was stated that squally whether had formed in the south of the Bay on the last day of that month, but that, though the disturbed weather existed as far north as about 11°N. Lat., there was nothing to show that the conditions were developing or had formed any definite storm. On the 1st of November the changes which took place at the coast stations round the Bay were small. Pressure was falling very slowly only over the whole Bay; light to moderate north-easterly winds were blowing at the stations on the east coast, and north-westerly winds generally at the western stations, while moderate to heavy rain was falling along the Madras coast from Cuddalore southwards. Though the coast stations in no way showed the formation of a barometric depression, it is probable that one was forming, or even had formed, on this day close to the Andaman Islands. It was probably not of much intensity when the meteorological observations were taken on this morning, though it must have developed rapidly during the day, for reports received from Port Blair in the Andamans show that a rather severe cyclone passed over that station during the night of the 1st and on the morning of the 2nd instant, causing a large amount of damage. The wind directions reported from that station indicate that the centre of the storm passed over it between 2 and 3 A.M. of the 2nd, when there was a lull in the storm for about 40 minutes, while the total duration of the storm was about 7 hours. Even at this period it was a very violent storm, and caused much destruction of life and property. As, however, the Andaman Islands are not connected by telegraph with the main land, no information was available from Port Blair as to the formation of the storm. On the morning of the 2nd November the meteorological observations taken at the coast stations round the Bay showed the existence of bad weather. There had been a general, but only moderate, fall of pressure all round the Bay, which was largest at Diamond Island and in the south of the peninsula, and winds at Diamond Island, which had previously been N. N. E. and of light force, at 8 A.M. of the 2nd had become E. N. E. and were strong in force. So far as can be ascertained from the observations at the coast stations, the centre of the storm was to the south-west or west-south-west of Diamond Island, or to the west or west-north-west of the Andamans, on the morning of the 2nd, but probably a long distance (perhaps 300 miles) from land. The observations at the coast stations on this day did not point to the storm being more than of moderate intensity. On the 3rd the storm had distinctly moved in a north-westerly direction, and its centre was probably in the latitude of Nellore

in about 14° N. Lat. and 87° E. Long., and still at a long distance from land. From the 2nd to the 3rd the storm does not appear to have increased in intensity as judged by the observations taken at the coast stations, for though fairly strong winds were blowing at some of the west coast stations, yet in the rear of the storm winds had rapidly decreased in force, and moderate winds only were blowing at Diamond Island, the velocity having decreased from 13 miles an hour reported on the morning of the 2nd to 9 miles reported on the morning of the 3rd instant. From the 3rd to the 4th, however, the storm very rapidly increased in intensity and became a violent cyclone, and wind velocity at Diamond Island on this day showed the increase in intensity of the storm by rising up to 18 miles an hour. The cyclone had also again advanced in a north-westerly direction, and its centre at 8 A.M. of the 4th was probably opposite Vizagapatam, or to the south-east of Gopalpur, and about perhaps 200 miles from land. The storm centre apparently passed close to the coast near Gopalpur on the early morning of the 5th, and the meteorological observer at that station reported that the centre of a cyclone passed over that station between 2 and 5 A.M. of the 5th, though the observation is doubtful and may prove incorrect when the history of the storm is worked out in detail. At this time the cyclone appears to have altered the direction of its advance, and to have taken up a northerly direction. It then advanced slowly close to the coast of Orissa passing near Pooree, and the meteorological observer at Pooree has reported that that station was visited by a heavy cyclone from 10-25 P.M. of the 4th to 1-30 P.M. of the 5th, receiving the very heavy rainfall of 13·61 inches, and that during the storm house-property was seriously damaged and some lives were lost. The storm was very close to False Point on the afternoon of the 5th, and the centre was off that station, but probably very close to land between 4 and 5 P.M. It gave hurricane winds at that station from 9 A.M. to 8 P.M. The direction of the advance of the storm must, however, have again changed at this time, and the storm evidently commenced to recurve towards the north-east. The centre was to the south of Balasore between 8 and 11 P.M. of the 5th, but at a long distance from it, and it passed to the south of Saugor Island about 2 A.M. of the 6th, and also at some distance from the land. At 2-30 A.M. on the 6th the storm centre almost passed over the F. L. V. *Canopus* at the intermediate station, and the reports from that station show that it was one of the most intense cyclones on record. At 8 A.M. of the 6th the storm had again advanced in a north-easterly direction, and its centre was to the south-east of Saugor Island. The centre passed about 80 to 120 miles to the south-east of Calcutta about noon of the 6th, and afterwards a little to the north of Burrisal between 5 and 8 P.M. of the same day; but the rapidity of the north-easterly advance of the storm had at this time greatly increased, and by the morning of the 7th the storm had left Bengal altogether, and was probably in Sylhet or Cachar. It had also rapidly decreased in intensity, and on this day was of little importance. On the 7th any residual low pressure, due to the disintegrated storm, was probably in Upper Assam or Upper Burma, but the storm had then practically ceased to exist.

The lowest pressure during the passage of the storm, of which any record has yet been received from any of the meteorological observatories, was about 28·15 inches at False Point. Observations made on some of the vessels in the north-west angle of the Bay, which were involved in the storm, particularly on board the ship *Lena*, appear to show that a pressure of about 28 inches or even 27·9 inches was experienced.

The cyclone was accompanied by a very complete cyclonic circulation of winds, apparently even from its formation close to the Andamans, and the storm, though by no means so large as many cyclones have been, was attended by extremely fierce and destructive winds which, according to some observers, were as fierce if not more fierce than they have ever previously experienced. One of the highest recorded wind velocities was the average velocity of 59 miles an hour at Pooree, just before the time when the telegraphic communication with that station ceased during the night of the 4th. Judging, however, by the fact that this was only the average hourly velocity for 3 hours, and that this occurred before the full force of the storm reached the station, it is probable that in the squalls and close to the calm centre the velocity of the wind must have run up to at least 80 or 90 or even 100 miles an hour. The strength of the wind is also shown by the number of vessels in the north-west angle of the Bay which were dismasted by the force of the cyclone, and by the damage done in the Andamans at a time when the cyclone could not have attained its full force.

The storm brought up rain to all the districts through which it passed, but on the whole the rainfall was smaller in amount than is usual in large and fierce cyclones. Orissa received a very heavy rainfall, and one station, Pooree, reported 13 61 inches during the storm, while Kendraparah received about 15 7 inches, and so on; but the falls were much smaller in South Bengal than in Orissa, and in Sylhet and Assam the falls had become very light. With the approach of the storm into the north-west of the Bay, the weather conditions in Bengal at once completely changed. Fine settled weather of north-east monsoon character had obtained at the commencement of the month, but from the morning of the 3rd the sky rapidly clouded in the southern districts till it became almost severcast over the whole province, and from the morning of the 4th light rain commenced in Orissa. The rainfall was heavy over the whole of Orissa on the 5th and 6th, and on the latter date rather heavy rain commenced in South Bengal, and moderate rain continued to fall on the 6th and 7th in East Bengal and over the southern districts of North Bengal. Chutia Nagpur and the Sonthal Pergunnahs districts in South Behar also received light-to moderate rain on the 5th and 6th instant. It will thus be seen that the weather conditions in Bengal

for the first seven or eight days of November were entirely controlled by the advance of the cyclone towards the province, and by its subsequent passage through the southern half of it, and one of the beneficial effects of the storm was to give rain to all districts except Behar and part of North Bengal.

Another rather remarkable feature in connection with the cyclone was the rapidity with which the disturbed weather which accompanied it disappeared and was replaced by fine settled weather of the ordinary cold season type. So rapid, indeed, had been this change, that by the morning of the 8th, fine weather with almost cloudless skies was reported from all districts except Assam, and only at one or two stations, such as Sibsagar, Bhogotpur and Gopalpore, was any rain received. The meteorological changes during the next two or three days were not important; and weather remained of ordinary cold weather character up till the 12th, when, however, there were clear indications that another barometric depression had formed in the Bay to the south-west of Diamond Island or to the west of the Andamans, and so far as could be ascertained from the observations made at the coast stations, it was giving squally, unsettled weather over the centre and south of the Bay. Indeed, all the conditions pointed to the possibility of formation of another cyclonic storm. Immediately with the occurrence of the disturbance in the Bay, the sky commenced to cloud over in all districts of Bengal except Behar and part of North Bengal. A few light showers were also reported in East Bengal, principally from the Chittagong district, but the only falls of importance were 0·90 inch at Rangamati and 0·66 inch at Satkanya. Over Bengal generally temperature rose rather rapidly, and humidity also increased largely, while the barometer fell steadily, but not by more than about 0·03 inch to 0·04 inch. On the 13th the depression to the west of the Andamans appeared to have slowly increased in intensity, but its position was unchanged, and on this day it was certainly influencing the weather in Bengal very largely. The sky became heavily clouded in all districts, except Behar, Chutia Nagpur and Orissa; the air became very damp, and numerous showers were reported in parts of East and South-West Bengal, particularly in the Furreedpur, Dacca, Tipperah, Jessore, Khoolna, and Nuddea districts. Temperature also again increased and became above the normal by amounts which were usually between 3° and 5°, while pressure again fell moderately over the whole province.

The depression in the Bay, however, filled up almost entirely on the 14th, and thus weather began rapidly to improve in Bengal, and the sky cleared to a large extent, though still a few local rain-showers fell at some of the stations in East Bengal, and which falls were reported on the morning of the 15th instant. The disturbed conditions in the province, indeed, had so rapidly disappeared, that on the 15th instant at almost all stations the sky had become nearly cloudless, and at the same time humidity decreased and the air became generally fairly dry, so that from this day practically ordinary cold weather or north-east monsoon conditions had again set in over the province. The meteorological changes in Bengal on the next three days were unimportant; but on the 18th, to the east of the centre of the Bay, however, there were distinct indications of the formation of a new depression, and strong easterly winds set in at Diamond Island, pointing to the existence of squally or somewhat stormy weather in the eastern part of the southern half of the Bay. The indications of the existence of this depression were more marked on the morning of the 19th, but the depression did not then concentrate to form a definite storm, for on the 20th and 21st the depression had practically disappeared, though probably squally weather generally obtained in the south of the Bay. The unsettled weather in the Bay as usual affected the weather in Bengal, and pressure fell moderately to rapidly, while temperature rose decidedly. The sky became a little more clouded, and humidity a little higher, but except for a few drops of rain at Cox's Bazar and Darjeeling, the whole province remained rainless.

On the 21st conditions appeared again much less disturbed than they had been, and there were no indications even of the existence of any barometric depression of importance, and still less of the formation of a storm. It is probable, however, that on the morning of this day a storm was gradually developing over the area in the Bay where pressure had been persistently low for several days, for the observations received on the morning of the 22nd indicated very clearly that a cyclonic storm had formed to the west-south-west or south-west of Diamond Island, and apparently not very far away from land, the storm being well on the east side of the Bay. After its formation the storm commenced to move rather rapidly in a north-easterly or north-north-easterly direction. The centre of the cyclone passed to the west of Diamond Island about 5 A.M. of the 23rd, and during the passage of the storm near Diamond Island, even though the centre of the storm was not by any means near the land—for the lowest barometric reading recorded there was not lower than about 29·6 inches—that station reported winds of hurricane force with a tremendous sea, and for part of the night the wind velocity averaged 45 miles an hour. As the storm approached nearer the land, the direction of its advance became more easterly, and during a large part of the 23rd it was advancing in a north-easterly or east-north-easterly direction, and perhaps when it struck the coast on the night of the 23rd or the morning of the 24th it was even travelling in an easterly direction. There are no meteorological observatories on the Burma coast between Diamond Island and Akyab, a distance of about 350 miles; but, so far as can be judged, the storm crossed the coast about midway between the two stations, though in the absence of any neighbouring observatory it is impossible to say the precise point of the coast crossed by the storm, or what the depression of the barometer was near the centre of the storm. From the wind velocities recorded at Diamond Island, which are some of the highest ever registered at that station, it is clear the

storm was a very severe one, and that such was the case is also proved by the experience of various vessels which were involved in the cyclone and which suffered damage from it. Directly, however, the storm passed inland and into the Arakan Hills, it must have commenced to break up rapidly, for at 8 A.M. of the 24th there was very little evidence of the existence of the storm at all, though pressure was still low over Burma, and by the morning of the 25th all trace of the existence of the former fierce cyclone had disappeared. The storm was probably only of small diameter though very fierce; it had also an exceedingly short life history, and the amount of rainfall brought up by it was comparatively small and was mainly confined to Burma.

From the 26th to the 28th of November there was again ample evidence of the existence of a low-pressure area in the south of the Bay, probably between the Andamans and the Madras coast; but this did not develop in any way, although the strong easterly and north-easterly winds which continued to blow at Diamond Island at this time pointed to the existence of squally unsettled weather generally in the south and east of the Bay.

As is usual, the disturbed weather in the Bay reacted on the general weather conditions in Bengal, and again for the last ten days of the month the cold weather conditions were not at all fully developed. During the existence of the storm, but to a smaller extent at the close of the month, the skies were more clouded than usual, the air became damp, and temperature rose and became very much above the normal; pressure also fell for a considerable period, but the storm was too far away to affect the general pressure in Bengal to any material extent. As might be expected, the weather was more affected in the southern and south-eastern districts than elsewhere, and at a few stations in South-East Bengal a few light showers were reported; but these were of little practical importance. Elsewhere the whole province continued rainless up till the close of the month.

Pressure—During the first week was governed by the existence of the cyclone and by its movements, which at the stations near its path as at False Point gave a fall of pressure of nearly two inches. The general average pressure for the first week was, however, only a twentieth of an inch in defect at the stations in the south-west of the province, while at the northern stations the defects were only about half this amount. In the second week the mean pressure was almost normal, but in the third week it was generally below it by from one to three hundredths of an inch. The cyclone in the last week was too far from Bengal to affect the pressure materially, and the mean pressure for this period was only slightly in defect; but the defects were largest at the southern stations, where they equalled from 0·02″ to 0·03″. Therefore the mean pressure for the whole month was in distinct defect by about 0·02″ at the southern stations, particularly in Orissa and the neighbouring parts of South-West Bengal, but at the central stations, pressure was almost normal, and at the northern stations in very slight excess. For the whole province, therefore, the mean pressure for November has been almost normal, and the same has been the case in Assam.

Temperature—In the first week was about 0·6° above the normal: in the second week the excess was 0·8°, while in the third week the excess had increased to one degree. In the fourth week this excess had largely increased and equalled no less than 2·1°. For the whole month the mean temperature in South Behar and Chutia Nagpur has equalled about two to two and-a-half degrees above the normal, while in South-West, East and North Bengal and South Behar the excess has been from one to one and-a-half degrees. The smallest excess has been registered in Orissa, where it has equalled 0·3°. For the whole of Bengal the mean excess has equalled 1·4°. In Assam, on the other hand, the excess has been only 0·1°.

Rainfall.—The rainfall of the month was almost entirely brought up by the action of the cyclone in the first week. The falls in Orissa have averaged no less than six and a quarter inches, or nearly five inches more than usual. In East Bengal the amounts have equalled nearly two inches, or three quarters of an inch more than usual. In South-West Bengal the falls have averaged an inch, or nearly three times the normal, and in North Bengal six-tenths were received or about four times the usual fall. In South Behar and Chutia Nagpur the falls have only equalled about a tenth of an inch, or very decidedly less than usual.

The following table gives in a condensed form the rainfall information for each of the seven large meteorological Divisions of Bengal for the present year up to the close of November. The numbers there given, as in the case of the former months of the year, are the actual average rainfalls in each month in each Division, expressed as a percentage of the normal fall for the period, and the last column also gives the total rainfall up to the end of November expressed as a percentage of the normal amount:—

METEOROLOGICAL DIVISIONS.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	Actual rainfall of first eleven months of 1891 expressed as a percentage of the normal fall for the period.
Orissa	11	167	424	36	134	28	74	189	180	21	452	113
South-West Bengal...	53	193	308	50	170	61	94	84	71	17	297	90
East Bengal ...	2	311	93	130	151	71	100	65	51	32	171	86
North Bengal ...	78	377	239	77	140	53	117	46	37	46	353	77
North Behar ...	171	283	590	19	172	94	83	65	35	39	Nil	79
South Behar ...	253	159	734	30	165	88	85	83	56	45	55	89
Chutia Nagpur ...	163	91	506	30	148	47	97	93	102	18	41	94

These falls have, however, been very unequally distributed. In Orissa, while the Pooree and Cuttack districts received an average fall of about eight inches, Balasore district received less than four. In South-West Bengal, the Saugor Island district received two and a half inches, Jessore, Khoolna, Berhampur, West Burdwan and Beerbhum between one and one and a half inches, and Nuddea, Bankoorah, Burdwan, 24 Pergunnahs, Howrah and Hooghly about half an inch. In East Bengal, Comilla received nearly four and a half inches; Dacca and Chittagong Hill Tracts from two to two and a half inches, and Chittagong, Backergunge, Noakhally, Furreedpur and Mymensingh from one to two inches. In North Bengal the falls were still more irregular; the district of Bogra received more than two inches, Pubna and Rajshahye a little more than an inch, while Maldah, Dinagepur, Rungpur and Darjeeling districts received less than a fifth of an inch, and Julpigoree and Cooch Behar practically no rain at all. The whole of North Behar was rainless. The whole of South Behar was also practically rainless, except in the Sonthal Pergunnahs district, where an average amount of 0·46 inch fell. In Chutia Nagpur, the Hazaribagh, Lohardugga and Manbhoom districts received falls varying up to a fifth of an inch, while in the Singbhoom district the fall equalled half an inch.

In Assam, during the month, Silchar received 2·08 inches, Sibsagar 1·10 inches, and Dhubri only 0·07 inch.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the month of November 1891 :—

Meteorological Divisions.	Temperature.						Rainfall.							
	Highest observed during month.	Lowest observed during month.	Averages for month.			Average mean of month above or below normal mean of month.	Of month.			Rainy days.			Since 16th Oct. 1891.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

'or the week ending Saturday, the 5th of December 1891.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	Of week. Mean for district.	Of week. Normal mean.	District observations. Rainfall. Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 16th October 1891. Mean for district.	Since 16th October 1891. Normal mean.	Since 16th October 1891. Variation.	Of week. Average number of rainy days.	Of week. Normal number of rainy days.	Representative station.	District.	Meteorological Division.

Explanation.—......indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the 8th December* 1891.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 5TH OF DECEMBER 1891.

DURING the first half of the previous week a cyclone had formed in the Bay and had advanced in a north-easterly direction, crossing the Burma coast between Diamond Island and Akyab. Even after the disappearance of the cyclone there was a feeble area of disturbance to the south of the centre of the Bay, which continued to exist up to the close of the week These disturbed conditions were again present on the 29th, or the first day of the present week, but from the 30th they rather rapidly disappeared, and on the 1st conditions became more normal, and weather became more settled.

As usual during the existence of any disturbance in the Bay, weather in Bengal at the commencement of the week was rather abnormal Temperature on the 29th was unusually high for the season, the excess in the mean temperature at some stations ranging up to five and six degrees, while humidity and cloud proportion were also higher than usual, and at one or two stations a few drops of rain were reported. Pressure, however, was still falling by very small amounts on the 28th, but on the 30th it rose by moderate amounts, and this increase caused pressure to be rather largely in excess of the normal. A moderate fall then set in on the 1st of December which continued on the 2nd, but on the 3rd pressure was again rising, though it fell again on the 4th and 5th; but the changes were so small that even up to the close of the week pressure was still very slightly in excess of the normal. These changes for the second half of the week were indeed only of the usual oscillatory character accompanying fine weather, though undoubtedly the tendency of the changes was to produce a lower pressure. Temperature also has been generally falling very slowly during the week, and even at its close the mean temperature was usually above the normal by an average amount of from 2° to 4°. Wind directions have been fairly normal, and a light northerly and north-westerly current has blown over the whole province. Cloud proportion has been generally decidedly higher than usual, particularly in the southern districts, while humidity has also been moderately large; but except for two or three light showers of absolutely no importance, which occurred in South-West Bengal at the beginning of the week, rainfall has been absent from the province. It will therefore be seen that again the week has been one in which the usual cold season conditions have only been feebly developed.

Pressure.—The mean pressure for the week has been rather largely above the normal, the usual excess equalling from 0·04° to 0·06°. This excess has been smallest in South-West Bengal and Orissa and largest in North Bengal and Behar.

Temperature.—The mean temperature has been from about 2° to nearly 5° in excess of the normal in the different divisions of the province, the largest excess being in South Behar, where it has equalled 4·6°. For the whole province the mean temperature has been three degrees above the normal.

The distribution of temperature during the week and its variation from the normal are best seen in the table below, where the average maximum, minimum and mean temperature for the week at nine typical stations in different districts of the province are compared with their normal values for the same period. The excess temperatures, it will be seen, have been fairly equally distributed during both the day and night:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 5th December 1891.

	Normal mean maximum temperature for the week ending 5th December.	Actual mean maximum temperature for the week ending 5th December 1891.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 5th December.	Actual mean minimum temperature for the week ending 5th December 1891	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 5th December.	Actual mean daily temperature for the week ending 5th December 1891.	Variation of actual mean from the normal.

Rainfall—Has been practically entirely absent from the whole province for the week.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 5th of December 1891 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th Oct. 1891.

The total fall from 1st January to 5th December 1891	46·93
The average fall of the corresponding period for 24 years, S.-G.'s Office ...	65·19

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓ ; dew.

C. LITTLE,
For Meteorological Reporter to the Govt. of India.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;
Calcutta, the 7th December 1891.

* Includes 17,424 tons and 4,503 tons during 1891 and 1890 respectively carried for Revenue, for which no "Up" and "Down" registers maintained.

† Railway plant and rolling-stock 7,974 tons and 5,645 tons for the year 1891 and 1890 respectively, for which no "Up" and "Down" registers maintained.

Comparative statement of the principal commodities carried over the Eastern Bengal State Railway during the month of September 1891.

INCREASES.

	Tons.
Coal	17,661
For railway and flotilla consumption principally.	
Cotton piece-goods	3,128
Probably due to increased demand from up-country stations for sale during the poojahs.	
Rice	2,049
Larger despatches from Sara Ghât, Kooshtea, and Goalundo.	
Jute, screwed	7,405
Haldibari, Darwani, Mymensingh to Karaid, and Serajgunge contributed to this increase.	
Jute, unscrewed	20,767
Principally in despatches from Domar, Darwani, Rungpur, Atrai, Raninagar, and Serajgunge, due to a favourable market.	
Kerosine oil	1,611
Due to opening of the Budge-Budge Branch.	
Oil-seeds	2,838
Due to good crops and an improved market. Kasba, Jattrapur, Alamdanga, and Goalundo contributed to this increase.	
Railway plant and rolling-stock	2,329
Probably due to repairs and renewals.	
Salt	2,840
Principally in despatches from Chitpore.	
Tea	2,312
Good season.	
Tobacco	1,084
Haldibari, Domar, Saidpur, and Kaunia contributed principally to this increase.	

CALCUTTA, *the 7th December* 1891.

Government Resolution, No. 1243L.R., dated 9th November, 1891, on the cadastral survey of Behar.

Mr. E W. Collin's report No 200A., dated 7th July, 1891, on the survey-settlement of the Srinagar-Banaili Estates.

In paragraph 13 of the Government Resolution No. 1243L.R., dated the 9th November 1891, published at pages 1895-99 of the Supplement to the *Calcutta Gazette* of the 18th idem, on the subject of the resumption of survey and settlement operations in North Behar, it was declared that an account would

shortly be published of what the surveys and records-of-rights in some large estates had cost, and the returns which they had produced to the landlords. Four such estates have recently been surveyed and settled, viz., the Churaman, Maldwar, Shankarpur and Srinagar-Banaili Wards' Estates, and the following paragraphs contain the main results of the operations.

2. *Churaman Estate.*—The mehals comprised in this estate are situated entirely within the Dinajpur district. They do not form a compact tract of country, but contain villages which lie scattered about the district and are interlaced with other estates. The survey and settlement operations were undertaken while the estate was under the Court of Wards. The total area of the estate, as ascertained by the survey, is 169,936 acres, of which 114,802 acres were surveyed by non-professional agency under the old procedure, and the remaining 55,134 acres, which were held by the late ward jointly with other co-sharer landlords, were surveyed and settled under the provisions of Chapter X of the Bengal Tenancy Act. The financial result of the operations was that a considerable area was recovered from the wrongful possession of other zemindars, and an additional rental of Rs. 4,621, or about 3·8 per cent. of the entire rental, was obtained chiefly from the rental of lands recovered from other proprietors. The cost of the operations amounted to Rs. 89,154 or 8 annas and 4 pies per acre, the rather high rate per acre being due to the scattered nature of the estate. As to apportionment of cost, a report is awaited from the local officers in respect to the area surveyed under the old rules.

The benefits of the operations to the zemindar and to the ryots are thus summarised by the Settlement Officer:—

I have mentioned what increase in the rental has been effected by the settlement. But an increased rental is not the only gain to the landlord. That is, indeed, a trifling gain compared with others. There was no such thing as a complete rent-roll for any of the mehals previous to the survey; and in the landlord's books and papers the areas of tenants' holdings were conspicuous by their absence. The landlords had no idea of the quantity of waste land, and how much of that again was culturable and how much unculturable. All these details have now been definitely ascertained and recorded; the amount of the rentals can no longer be a matter of speculation, and peculation of portions of the realizations by the patwaris will no longer be easy. It is impossible now for the zemindars' amin to quarrel with the ryots over the local *rassi*, and put down the areas of the holdings in accordance with his caprices; for the local standard bigha in each village has been definitely ascertained and authoritatively recorded. The record of rights will give the landlords every facility for effecting a legal enhancement of rent in the future, in accordance with rise in prices, and the boundaries, as demarcated and plotted in the maps, will, it is hoped, be effectual in preventing future litigation with neighbouring landlords. The amounts respectively payable by the landlords and tenants towards meeting the cost of the survey and settlement have not yet been declared by the Government under section 114 of the Tenancy Act, but a statement has been submitted showing the amounts for which the landlords and tenants are severally liable. In that statement the sum of 5 annas 3 pie to the acre is shown to be the share of cost chargeable to the landlords, and this sum I consider to be a very cheap price for the advantages gained by them.

As regards the tenants who will have to bear a share of the costs of survey and settlement, it is hardly necessary to point out in detail the manifold advantages the survey has effected on their behalf. The settlement may be said to have opened their eyes. They have, I believe, for the first time understood what their legal rights and status are, and now these have been safeguarded by the settlement. All of them, except the lower strata of the two unintelligent classes, the Palis and the Dessis, have eagerly sought their khatians, and asked whether these would be binding on the landlords. Was it true that the settled and occupancy ryots could not be ejected by the landlords at their will? Could they, under any circumstances, legally refuse to pay enhanced rental? Would the question of their local *rassi* crop up when the landlords shall send an amin to measure their holdings, or was it settled for good? Should they pay to the patwaris anything more than the amounts recorded in their khatians? These and several other questions which they have asked show that they have taken a keen and intelligent interest in the settlement proceedings. A large number of tenants of each village attended the amin during the measurements, and they have all more or less understood the process of measuring their holdings and the calculation of their areas. The awakening of this intelligence, and the greater interest and attachment to their holdings which this must necessarily cause, not to mention the legal protection which the khatians afford them, are benefits for which the sum of four annas to the acre—the amount of cost shown in the apportionment statement as chargeable to the ryots—does not appear to be at all too high.

As regards the litigation created by the survey, it is reported that 105 petitions were registered in the Settlement Officer's Office: 84 were disposed of summarily and 21 were tried as suits under section 107 of the Act; of these six were uncontested. No appeals were presented against the Settlement Officer's decision.

3. *Maldwar Estate.*—The survey-settlement was undertaken by the Court of Wards. The mehals constituting this estate are situated in the two districts—Dinajpur and Purneah. They do not form a compact block, but contain several villages which lie scattered widely apart from each other. As ascertained by the survey, the estate contains an area of 93,082 acres, of which 58,267 acres are cultivated, 15,942 acres cultivable, and 18,873 acres waste. The total cost of the survey and record of rights was Rs. 60,751, of which Rs. 36,113 were incurred on survey and Rs. 24,638 on settlement, the rates per acre being 5 annas 10 pies for survey and 4 annas 2 pies for settlement. The high cost of the survey was due partly to the scattered positions of the villages, and partly to the irregular supply of coolie labour, the obstruction of ryots, the passive opposition of neighbouring zemindars, the inexperience of newly-trained amins, and the insufficient support accorded to the latter by the officials of the estate.

The total cost has been apportioned as follows:—

	Rs.
Landlords	38,149
Tenure-holders	492
Ryots	22,110
Total ...	60,751

There are in the estate 13,163 rent-paying holdings, occupied by 9,421 ryots. Fair rents were settled in 6,217 cases by the mutual consent of the landlord and tenant, the result being an enhancement of Rs. 4,508, which was obtained by assessing excess land found in the possession of the ryots, after deducting 20 per cent. from the area resulting from the present survey, on the ground of close measurements. The assessment of this excess land was made at the average rate for land of the same class in the village. As regards the remaining 6,946 holdings, the existing rents were recorded. Thus for the entire estate the total new rental is Rs. 95,714, so that the enhancement is 4·71 per cent. on the previous rental (Rs. 91,206), 7·6 per cent. on the total cost of the work, and 11·8 per cent. on the proprietors' outlay.

The following account of the attitude of the tenantry is given by the Settlement Officer :—

The settlement operations were conducted without any friction or difficulty. During the early part of the operations the tenantry showed indifference by their absence from the scene of operations. The attitude shortly, however, changed from indifference and obstruction to one of eagerness and hearty co-operation. It has been stated that the impression had got abroad among the tenantry that the Settlement office was a branch of the manager's office, and that the rents were to be enhanced unusually high, and that they would gain no advantage in any way from the effects of the settlement. But when the erroneous nature of the impression was fully explained to them, they took great interest in the work. One application only was made by the tenants of lot Senua to the Commissioner of the Division in his executive capacity, stating that the manager was doing "zulum" in order to make them agree to pay enhancements. The application was sent to me for disposal. Their rents have not been enhanced in this settlement, although the manager pressed for enhancement, as I found that the ryots of this particular lot Senua had paid a high enhancement a few years ago during the time of the late proprietor, Baboo Budhi Nath Chaudhuri.

There were altogether 1,243 suits and objections. Of these, 495 were disposed of summarily, and the rest were tried by the Settlement Officer in accordance with the procedure of a Civil Court. There were six appeals preferred before the Special Judge, of which three were dismissed, two allowed, and one was still pending when the Settlement Officer's report was submitted.

4. *Shankarpur Estate.*—The Shankarpur Estate consists of villages and parts of villages widely scattered over the districts of Dinajpur, Bogra, Rajshahye, and Maldah, the principal portion being in Dinajpur, and has been under the management of the Court of Wards since 1873.

The aggregate area of the estate, as ascertained by the survey, is 157,802 acres, and the total cost of the survey-settlement was Rs. 1,31,729, of which Rs. 89,611 were for survey and Rs. 42,118 for settlement, the rates per acre being 7 annas and 3 pies and 3 annas and 6 pies respectively. The high cost of the survey is attributed to the scattered nature of the property, the necessity for measuring lands of other estates interlaced with those belonging to the

ward, and the sickness which prevailed among the establishment. The cost has been apportioned as follows:—

	Rs.	A.	P.
Ward	60,485	0	0
Co-sharer landlords and their patnidars	47,522	8	0
Ryots	23,721	8	0
Total	1,31,729	0	0

The total number of holdings in the estate is 32,607, the average size of a holding being 3 acres. The Board reported that rents were settled mainly by amicable arrangement between the management and the tenants, an allowance of 20 or 25 per cent. of the excess areas found in their possession being made to the tenants on account of the closer measurement of the professional survey, and the rest of the excess lands being assessed at the rates paid for similar lands in the village. The result has been an enhancement of the rental of the estate from Rs. 90,573-5-6 to Rs. 1,07,619-12-2, or nearly 19 per cent. on the previous rental, 13 per cent. on the total outlay, and 16 per cent. on the landlord's outlay, the increase on the ward's share being from Rs. 49,305 to Rs. 59,022. The average rate of rent on the cultivated area is stated to be Rs. 1·9-3 per acre.

The following extract from the Settlement Officer's report sums up the result of the operations:—

No obstruction or friction was met with in carrying out the settlement operations. The adoption of the English standard bigha for assessment in the estate Jehangirpore created dissatisfaction among the tenants, but it was removed by the granting of a larger allowance arranged amicably between the tenants and manager. The manager of the estate had taken an active part in conducting the demarcation, and rendered me assistance in the work of settlement generally.

Soon after the commencement of the present survey all the ryots appeared to have been frightened on seeing their lands measured by chain instead of *rassi*, which was used in the previous settlements, and to think of the probable enhancement that might result from the new mode of survey and settlement under the Tenancy Act, and under that impression several tenants filed *istafanama* of their holdings in the Munsif's Court of Balughat and were willing to run away. To remove such sensation among the illiterate tenants, I had to take much trouble to explain to them the provisions of the law whenever I visited the villages to test the amins' work. I gave them assurance that their due claims would by no means be overlooked. But at last, when they came to understand, after the settlement of a few *tarafs* had been completed, that the intention of Government by the present settlement was to protect the tenants from the exercise of the illegal proceedings of their zemindars of depriving the ryots of their legal rights to hold the lands, and to prevent further litigation between the tenants respecting their holdings—at the same time to prepare correct records to enable the landlords to realize their just dues—they began to appreciate and take interest in the matter by attending the amins regularly to point out their lands and to clear up the errors that crept in the records during the khanapuri. They appear now to have been satisfied with the concessions allowed to them for different systems of measurement. The fact that the tenants have appreciated the benefit of the present survey and settlement is apparent from the earnestness with which they came forward with applications to have their lands measured that came under cultivation since the survey. The reduction of *istafanamas* and increase of transfer of holdings since the completion of settlement of villages clearly shows how the tenants liked the proceedings. * * * * * * The cost-rate of the Shankarpur settlement cannot be considered as an index to the probable cost for such operation in a healthy district, in which the estates are compact and the survey records are properly prepared.

Of 2,265 petitions filed, 918 were summarily settled, and the remaining 1,347 objections were tried as civil suits by the Settlement Officer. Of the latter, 467 suits were amicably settled; in 14 cases the plaintiffs were permitted to withdraw from the suits, and 866 objections were regularly contested. Twenty-one appeals were preferred against the decision of the Settlement Officer, of which 6 were dismissed, 3 decreed, and 2 remanded for retrial; and the remaining 10 were pending when the settlement report was submitted.

5. *Srinagar-Banaili Estates.*—These estates are situated in the districts of Bhagalpur, Monghyr, Purneah, Maldah and Darbhanga, and are owned jointly by the Srinagar Ward and Raja Pudmanand Singh of Banaili. The villages in Bhagalpur and Monghyr lie in comparatively compact blocks, but the estates in the three other districts are much scattered. Proceedings were initiated, with the object of ascertaining and recording existing rents, on an application from the Court of Wards, in which Raja Pudmanand Singh, the co-sharer in the greater part of the property, joined. The total area surveyed

was 447,189 acres, but the total area settled was only 426,652 acres, the remainder having been excluded from settlement on account of lands belonging to other proprietors having been found interlaced with the surveyed area, and for other reasons. The cost of survey was Rs. 1,32,328, and that of settlement is estimated to be Rs. 1,62,000, the total cost of the operations thus being Rs. 2,94,328 or annas 10-6 on the total area surveyed. The causes which have rendered the settlement expensive and protracted are reported to be the scattered nature of the estates, disputes as to the standards of measurement and as to existing rents, the large number of objection petitions filed, the necessity of making a fresh copy of the records for the proprietors, and the remand during 1890 of 14 boundary disputes for retrial. As regards apportionment of the cost, it has been decided that the ryots should pay 2 annas an acre on the area of their holdings, the balance being paid by the landlords according to their several interests; but as the operations are not yet quite concluded, it is not possible to state the exact sum payable by the parties concerned.

The following extracts from the Settlement Officer's report show the results of the survey-settlement:—

Excluding the pergunnah of Akbarabad and a small area in the Kotwalli pergunnah, in the Maldah district, the records of which are not yet complete, the result of the record and settlement of rentals shows that the nominal rent-roll has increased from a demand of Rs. 4,68,328 to Rs. 4,69,498, or an increase of Rs. 1,170, equal to an increase of 23 per cent. There has been an increase of rental in Bhagalpur and Maldah, and a decrease in Monghyr, Purneah, and Darbhanga. The decrease is a decrease in the rent-demand, and is due not to any arbitrary reduction of rent or rates of rent, but to the settlement of disputes as to existing rates. There has been a real increase of Rs. 22,020, that is to say, the total rental, after striking out the disputed claims, has been increased by that sum in consequence of the settlement. The record and settlement of rents has performed two functions: firstly, the rent-roll has been cleared of disputes, and, secondly, an increase of Rs. 22,020, equal to 4·7 per cent., has been obtained. With regard to the first point it is to be remembered that the landlords' rent-roll was known to be in confusion, and the rent demand was never collected in full. The object of the settlement was to clear up these disputes, and not to effect an enhancement of rents. I have noted some of the causes of the confusion which was greatest in the Nohatta tehsil of the Bhagalpur district. It arose chiefly from the system of letting out villages in lease, under which the lessees endeavoured to enhance the rates or, at least, to gain an addition to the rental during the period of their leases.

* * * * * * * *

The value of the settlement is not to be tested by the increase of rent obtained. This increase is small, amounting to 4·7 of the ascertained rent demand. It gives a return of a little over 7 per cent. on the outlay. The object of the settlement was, however, not to enhance rents, but to clear up the confusion in the rent-roll, and to enable the rent to be punctually collected. The effect of the decision of disputes as to rents may be judged by the fact that in 1886-87 the rent collections of the Srinagar Estate were only 63 per cent. of the demand, whereas in 1889-90 112 per cent. of the demand, and in 1890-91 125 per cent. was collected. Apart from the adjustment of the rent demand, the records will enable the estates to prevent unauthorised encroachments and additions to holdings. This result will be especially valuable in the Purneah district, where, in the absence of any records or measurement papers, the raiyats had taken possession of large areas without payment of rent, and in many cases had converted lands into rent-free tenures supported by deeds of sale and other documents, which the landlords were unable to disprove. In future, the proprietors will be in a position to prevent any further accretions to such rent-free tenures as now exist.

As regards the attitude of the parties concerned, the Settlement Officer reports as follows:—

The attitude of the landlords and tenants towards the survey and settlement was varied. At first there was considerable opposition from both sides. The local agents of the estates gave little help, and the raiyats were naturally afraid of the proceedings. Matters improved when the present manager was appointed, but a great deal had of necessity to be left to the inferior agents, who often appeared unreasonable in their claims and disposed to press demands which they were unable to prove. The fact that the landlords only gained decrees in 59 per cent. of the contested cases shows that the claims of the landlords were in many cases unreasonable. The raiyats, as a rule, showed no disposition to hold aloof from the proceedings. They readily came to the Settlement Officer's camp to have the entries explained, and appeared to take great pains to have their records correctly prepared. The large number of objections filed is a proof of the interest taken in the proceedings. The Collector of Bhagalpur, who is responsible for the Court of Wards' estate, has throughout the operations rendered me much assistance. The only instance of organized opposition has occurred in the Akbarabad pergunnah of the Maldah district, where the proceedings are still delayed in consequence of the refusal of the raiyats to have the entries in the records tested. The dispute arose over the standard of measurement, and when this was judicially decided after an appeal to the Special Judge, the raiyats still held aloof, and claimed that all should

be recorded without proof as raiyats at fixed rents. It has been pointed out to them that if they can prove such rights, they will be registered, but few of them are able to do so, and hence they have adopted an attitude of sullen opposition. Measures are being taken by the officer left in charge of the operations to complete the records of the area in dispute, which consists of 22 villages and about 12 square miles.

There was a considerable amount of litigation in this estate, due to long-pending disputes and the confusion in the landlords' records. The case-work of the Settlement Officer was as follows:—

(1) Objection suits under section 106 of the Bengal Tenancy Act		2,852
(2) Suits under section 104(2) for settlement of fair rents	...	632
(3) Boundary disputes	...	368
Total	...	3,852

Of the suits under section 106, 1,743 were brought to trial and decided, and of the 632 suits for fair rents, 477 eventually came to trial. There were also about 20,000 petitions of objection against entries in the record, and these were all heard and the entries corrected, if necessary, on the spot.

The following is a statement of the appeals preferred against the decision of the Settlement Officer:—

Appeals to the Special Judge against decisions under section 104(2) and section 106 of the Bengal Tenancy Act.	271	123	34	68	13	18	15

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF DISTRICT BOARDS DURING THE YEAR 1890-91.

MUNICIPAL DEPARTMENT—LOCAL SELF-GOVERNMENT.

Calcutta, the 11th December 1891.

RESOLUTION No. 2803.

READ—

The reports from the several Commissioners of Divisions on the working of District Boards in Bengal during the year 1890-91.

Read also—

The Resolution reviewing the Divisional Reports on the working of District Boards in Bengal during the year 1889-90.

Commissioner of Rajshahye, 24th August 1891.
Commissioner of Dacca, 27th August 1891.
Commissioner of Patna, 2nd September 1891.
Commissioner of Presidency Division—Report, 5th September, and Statements, 16th September 1891.

The date fixed for the submission to Government of the District Board reports is 31st July, but only three out of the eight reports were received on or about the prescribed date. Those shown on the margin were submitted especially late. The Lieutenant-Governor trusts that steps will be taken to ensure the earlier preparation of these reports in future.

2. The year under review was the fifth in which the Bengal Local Self-Government Act, III (B.C.) of 1885, was in operation. As in the preceding year, there were 38 District Boards, in whom the administration of local affairs was primarily vested, and 106 Local Boards working in subordination to them. The area under their jurisdiction was 109,429 square miles, and the total population, as returned by the local officers, 59,313,428. This figure, however, will be subject to correction when the returns of the last census have been finally compiled. All the District Boards were presided over by the Chairman, who is the Magistrate of the district. Some of the District and Local Boards completed their three years' term of existence during the year, and were reconstituted. The system of election, which was extended to the district of Mymensingh in 1889, was brought into operation there during the year, and is said to have aroused a fair amount of interest throughout the district, except in three thanas of the Jamalpur sub-division, where the elections were a failure. Regarding the elections held in Backergunge, Mr. Savage, the Magistrate, writes—

"The interest taken in the elections varied greatly in different thanas. Generally speaking, the Hindu voters had more idea of what they were voting for than the Mussalman voters had. The latter indeed, in general, only came forward because it was the wish of their zemindars they should do so; and if left to themselves I doubt whether any of them would have taken the trouble to attend at the poll. The members were in general either zemindars or talukdars with local influence, or pleaders and others put forward by them."

3. *Constitution of District Boards.*—On the 31st March last the 38 District Boards contained in all 755 members, exclusive of the Chairmen. The decrease in the strength of members is due to the reduction of the maximum strength of the Midnapore District Board from 36 to 24, of the Bhagulpore District Board from 40 to 30, and of the Rungpore Board from 30 to 20. All of which, as was remarked in paragraph 7 of the Resolution on the working of District Boards during the year 1888-89, had been found inconveniently large for actual work. The numerical strength of the Tipperah District Board was increased by five members with a view to provide a sufficient number for the Standing Committees. Of the 755 members on 31st March 1891, 148 held their seats *ex-officio*, 284 were nominated by Government, and 323 were elected by the Local Boards. Of the entire number, 220 were official and 535 non-official members. The number of Europeans or Eurasians and natives of the country respectively was 163 and 592. The average number of meetings held by each District Board was 12, which shows that the instructions conveyed in paragraph 7 of

the Resolution reviewing the reports on the working of the District Boards in Bengal during the year 1888-89, regarding the holding of meetings at least once a month, were attended to during the current year. The largest number of meetings (19) was held by the District Board of Durbhunga; the Noakhali and Sarun District Boards come next with 18 meetings each; while the Pubna, Dinagepore, Mymensingh, and Furreedpore District Boards show 17 meetings each.

4. The Boards that met least often were Hooghly, Jessore, Rajshahye, and Julpaiguri (8 meetings each), and the Nuddea, Khulna, Mozufferpore, Rungpore and Dacca District Boards (9 meetings each). The Chairman of the Hooghly District Board pleads that there was no business for more meetings. On this the Commissioner remarks that "if little districts like Beerbhoom and Bankoorah can find enough work for 15 meetings, there ought to be no trouble in the case of Hooghly. Where a Board finds its affairs managed for it, the attendance is apt to fall off, and this is just what has happened at Hooghly." The Chairman of the District Board of Jessore states that through an oversight the new Board was not actually formed until June, and that there was no meeting either of the new or the old Board from April to June. The Commissioner of the Division, however, does not consider the number of meetings sufficient when it falls below one in every month, or that the attendance indicates an eager interest on the part of the members when half of them are generally absent at every meeting. In the case of the other districts mentioned above no attempt has been made to explain why so few meetings were held.

5. Taking all the Boards together, the average attendance of members at each meeting was 9·68 against 8·98 in 1889-90. It was best in Rungpore, 24-Pergunnahs, Rajshahye, Backergunge, Dacca, Midnapore, Shahabad, and Chittagong, and worst in the four districts noted in the margin, where it was below one-third of the actual strength of the Boards.

Dinagepore	5·05
Julpaiguri	5·62
Gya	5·7
Chumparun	5·7

No reason is assigned for the small attendance in Gya and Dinagepore. The short attendance in Julpaiguri is attributed to an outbreak of cholera in the district and to the unusually heavy rains during the year. In Chumparun it is said to be due to the fact that many of the members live at a long distance from the head-quarters, and will only attend when some matter of special interest is before the meeting. As regards Rungpore, the Chairman writes—

> "The attendance of members at Board's meetings was not as large as it should have been. An average number of 12 present out of 20 members leaves much to be desired. I am glad to report, however, that the degree of interest shown in the public duties continued to increase during the year under report. The discussions of the meetings were often keen and evoked a considerable display of intelligence and grasp on the part of most of those who took part therein."

The attendance of the official members was bad in 24-Pergunnahs, Backergunge, Rajshahye, Dinagepore and Burdwan. The attendance of the non-officials was on the whole fair, except in Julpaiguri, Maldah, Chumparun, and Gya. In the worst cases of continuous non-attendance on the part of individual members action was taken under the provisions of section 18 (*c*) of the Act. The Commissioner of Rajshahye writes that the non-official members were everywhere, except in Julpaiguri, more regular in attendance than they were the year before; while the official members showed greater apathy everywhere except in Julpaiguri. In Chittagong, on the other hand, each official attended on an average about one meeting more than each non-official member.

6. *Constitution of Local Boards.*—Appendix I (*b*) shows the constitution and attendance of the Local Boards. The 106 Local Boards had, on the 31st March 1891, a total strength of 1,206 members, excluding the Chairmen. The extension of the elective system to the district of Mymensingh necessitated an increase in the number of members fixed for the several Local Boards in the district from 44 to 64. The number of members of the Arrah Local Board was reduced from 30 to 20, agreeably to paragraph 8 of the Resolution on the working of District Boards during 1888-89; but the Midnapore Local Board having been reconstituted only lately, it was decided to postpone the reduction of its strength till the next general

elections of 1892. Of the 1,206 members on the 31st March 1891, 115 were officials and 1,091 non-officials. In proportion to the total number of members, the European and Eurasian element is even more sparsely represented on the Local Boards than it is on the District Boards, there being only 94 out of 1,206.

7. The Local Boards held 882 meetings, or 94 more than in 1889-90. The largest number of meetings was held by the Local Boards of Rampore Hât and Pubna (18 each); Durbhunga comes next with 16 meetings. No less than 89 Local Boards failed to meet once a month. The Local Boards that met least often were those noted in the margin. The number of meetings held in Tipperah, the only district in the Chittagong Division where these Boards exist, is said to correspond fairly with the work and powers entrusted to the Board. The fewness of the meetings of the Hajipore Local Board is attributed to the fact that, in order to avoid delay in the despatch of business, much of the routine work was performed by the Chairman or Vice-Chairman, with the express or implied consent of the Boards. The Commissioner, however, does not consider this explanation satisfactory. The average attendance at the meetings of the Local Boards was 5·41 against 5·69 in 1889-90. On this subject Mr. Toynbee, the Commissioner of Orissa, writes:—

Mehorpore	2
Dum-Dum	3
Hajipore	3
Bissenpore	4
Midnapore	4
Jessore . ..	4
Basirhat	4
Munshigunge ..	4
Tipperah ...	4
Pooree	4

"Mr. Allen, the Chairman of the Pooree District Board, makes the following pertinent remarks :—'As the Local Board had not much work to do, only four meetings were held. If Local Boards would meet more frequently in order to discuss local requirements, and to prepare schemes for the consideration of the District Board instead of leaving the whole initiative with the official Chairman of the District Board, they might become far more useful than they are now.' This is very true. The excuse of 'no business' is a very common one, but it cannot be accepted. The whole object of the existence of the Local Boards is to make work for themselves and the District Boards by bringing local wants to notice and arranging to meet them in the best possible manner. Thus only can real Local Self-Government exist in more than name."

8. The following table classifies the members of the several District and Local Boards according to their professions and occupations:—

		Government servants.		Zemindars, talukdars and zemindars' servants.		Pleaders and mukhtears.		Planters.		Missionaries.		Other occupations.		Total number of members.

It will be seen from this statement that the measure of representation obtained by different classes on the District Boards corresponds fairly on the whole to the degree of influence which each class commands in the country. In the Local Boards the zemindari element, as might be expected, largely predominates, while Government servants, who on District Boards almost equal the representatives of the landholders and outnumber the pleader class, are on Local Boards largely outnumbered by both of these classes. The Commissioner of the Presidency Division states that the Mahomedans, as compared with the Hindus, are not numerically fairly represented, but that good representatives of them are on the Boards. The Commissioner of the Orissa Division remarks that pleaders and Government servants form more than 50 per cent. of the

members, a figure quite out of proportion to their actual numbers. The Commissioner of the Presidency Division writes—

"It will be seen that of the total number of members in the division, the percentage of zemindars is, as it should be, the largest, and next to it is that of pleaders and mukhtears, which I cannot consider satisfactory, as such men are seldom really interested in local affairs, and think more of the pleasures of administration and patronage than of the work which has to be done"

9. *Powers of Local Boards.*—There has been no change in the powers delegated to the Local Boards. They continue to administer the grants for village roads, pounds, ferries, and primary education, and in some places the supervision of dispensaries, sanitation and medical relief is also entrusted to them. The Bankoora Local Board is stated to object to taking over money for any purpose—a position which the Commissioner rightly describes as "a strange shrinking from responsibility." In Howrah the Boards wish to have their powers enlarged, but the Magistrate has withheld his consent on the ground that the small size of the district renders any such delegation unnecessary. The Commissioner of Burdwan thinks that the management and control of pounds might unobjectionably be made over to all the Local Boards in his Division. The abuses so often connected with them would then, in his opinion, stand a better chance of being exposed and remedied. The Chairman of the Commillah Local Board suggested the delegation of additional powers to the Board, on the ground that the care of village roads is not sufficient to occupy the time of the members: but the Magistrate of the district thought it undesirable to withdraw the duty of supervising primary education, pounds, and ferries from the District Board. On this Mr. Oldham, the Commissioner of the Division, remarks—

"The Chairman of the District Board does not seem to put this quite correctly. There is no question of withdrawing the duty of supervising primary education from the District Board, but of giving the management of its details to the Local Board within its local area. I think the complaint of the Chairman, Local Board, is just and constitutional, and will ask the District Board to consider it."

The Commissioner of the Presidency Division finds no conspicuous instances of Local Boards having worked well and taken interest in the administration of the matters placed under their charge. It is admitted that the Boards at Meherpore and Kooshtea did not work satisfactorily, and though Bussirhat did well in the matter of pounds, the action of the Local Boards generally is described as very far from efficient as regards pounds and ferries, and the Commissioner says that the principal sign of energy apparent is the demand for increased funds for village roads. In Mozufferpore the District Board found it necessary to withdraw from the Local Boards the control over educational matters which had been delegated to them.

The question of the working of Local Boards is not dealt with in the reports so fully as might perhaps have been expected, and on the incomplete evidence available, the Lieutenant-Governor is unwilling to record any final expression of opinion. The problem of distributing administrative functions between district and local authorities is one of considerable difficulty, and can only be solved by experience. Speaking generally, the Lieutenant-Governor would wish the Local Boards to be treated in a liberal manner and given as extensive powers as circumstances in each case appear to render possible. Experiment alone can determine the best mode of dividing authority between them and the District Boards. In next year's reports the subject should be handled at greater length.

10. *Union Committees.*—No Union Committees have yet been appointed, and the correspondence that has taken place on the subject shows a great divergence of opinion on the part of the officers who have been consulted. It is clear, however, that it would be premature to initiate a new administrative departure of this kind before the relations of District and Local Boards have been finally settled and have stood the test of several years' experience. Sir Charles Elliott therefore does not anticipate that any immediate necessity is likely to arise for appointing Union Committees.

11. *Financial results.*—The year opened with a balance of Rs. 19,33,291 (corrected figures) while the receipts during the year amounted to Rs. 58,67,818.

The total amount available for expenditure was thus Rs. 78,01,109. The principal items of income and expenditure for this and the preceding year are given below:—

	Income.	1889-90. Rs.	1880-91. Rs.
I.	Land Revenue	15,945	33,837
VI.	Provincial Rates	34,32,574	33,38,524
XII.	Interest	609	569
XVII.	Police (including pounds)	3,94,694	4,43,775
XIX.	Education	30,561	33,496
XX.	Medical	7,625	7,035
XXI.	Scientific and other Minor Departments	1,648	1,425
XXX	Miscellaneous	1,39,874	1,31,538
XXXII.	Civil works (including ferries)	3,28,314	3,73,379
	Contributions	11,02,398	8 13,129
	Debt	8,19,261	6,91,111
	Total	62,73,403	58,67,818

	Expenditure.	1889-90. Rs.	1880-91. Rs.
1.	Refunds	13,601	4,936
18.	Administration	2,58,533	2,65,885
20.	Pounds	23,589	29,618
22.	Education	10,04,140	10,01,855
24.	Medical	42,546	58,519
26	Scientific and other Minor Departments	5,219	3,665
29.	Superannuation allowances and pensions	1,209	23,828
30.	Stationery and printing	48,057	46,446
32.	Miscellaneous	43,365	46,686
33.	Famine Relief	2,59,967	1,21,034
41.	Railways	Nil.	171
43.	Minor works and navigation	4,373	7,763
45.	Civil works	38,42,381	39,37,161
	Contributions	Nil.	6,145
	Debt	6,25,260	5,75,891
	Total	61,72,240	61,29,603

INCOME.

12. *Land Revenue.*—Of the total income under this head, Rs. 10,227 represent canal tolls realized in Chittagong, and Rs. 15,461, the proceeds of trees, grass, &c., sold by the Boards. Compared with the previous year, in which it fell off by Rs. 2,213, the Chittagong canal revenue shows an increase of Rs. 862. The fluctuation is said to be due to silting and silt clearing. The increase of Rs. 17,892 in the total realized under this head of Land Revenue is due in some measure to the fact that in the Chittagong Division certain collections which were last year credited to Miscellaneous were treated as Land Revenue in the year under review.

13. *Provincial Rates.*—The income derived from Road Cess declined from Rs. 34,32,574 to Rs. 33,38,524. In some districts the decrease is ascribed to bad collections; in others to the heavy expenditure incurred in the establishment entertained for revaluation of cess-paying property. The income from this source is, however, expected to rise as revaluation operations progress. The entire subject has been discussed at length in reviewing the Board's Cess Report.

14. *Pounds.*—The receipts from pounds show an increase from Rs. 3,94,594 to Rs. 4,43,775, which is shared by the 21 districts named in the margin. The remaining districts show a decrease. The increase is variously attributed to the larger number of pounds established; to higher bids at auction; to farmers paying in with greater punctuality; and to the collection of outstanding balances. The decrease is put down to the high floods of the year which submerged the fields and stopped both cattle-trespass and the impounding of cattle; to change in the system of keeping accounts; to closing of pounds; to keen competition during the previous year which acted injuriously on the collections of 1890-91; to

Bhagulpore. | Purneah. | Rajshahye. | Dinagepore. | Rungpore. | Bogra. | Beerbhoom. | Midnapore. | Backergunge. | Dacca. | Mymensingh. | Patna. | Gya. | Nuddea. | Jessore. | 24-Pergunnahs. | Khulna. | Balasore. | Chittagong. | Tipperah. | Noakhally.

non-settlement of pounds for want of bidders; and to the default on the part of the farmers.

In Moorshedabad the administration of pounds was entrusted as an experiment to the Local Boards, with the result that the annual settlements fell off, and a considerable balance was left unrealised at the close of the year. The District Board has since resumed the management, and the income of the pounds is said to have recovered. In the 24-Pergunnahs it is stated that the collections of the year were the largest ever credited to the District Board, owing partly to enhanced rents at which some of the pounds were settled, and partly to the realization during the year of a portion of the outstanding balances of the previous year. The Burdwan Local Board is reported to have in two years raised the number of pounds under them from 67 to 171, while the rest of the district has only 54. The Commissioner remarks—

> No other district in the division indulges in such a number, and the carelessness in accepting lessees is evidenced by the poorness of the collections. The Chairman thinks the number should be revised and reduced, and he should take measures in this direction.

In the Shahabad district the receipts from pounds being on the decrease, the Board recently introduced the system of triennial settlement with proper provisions in the lease for keeping the buildings in an efficient state of repair by the lessees. The system of inspection of pounds by Sub-Inspectors of Police introduced in this district is said to have worked well. All the pounds were inspected by the police officers in consequence of which their general condition has improved. At the public auction of pounds in Noakhally, some bidders were found to be fictitious, and prosecutions were instituted against them under section 185 of the Penal Code. An inspector of pounds and ferries has been appointed in this district since the close of the year. In Tipperah the services of the pound sub-inspector experimentally appointed have been retained for one year more, as the revenue rose with the appointment of an establishment for the stricter supervision of pounds. The Chittagong District Board is about to try the same plan. In the districts of Dacca and Furreedpore an inspector was appointed during the year to supervise the management of ferries and pounds by the farmers. In the Cuttack district the inspection of pounds by Sub-Inspectors of Schools having been objected to by the officers of the Education Department, the District Engineer has been asked to arrange for their inspection by himself and his subordinates. In some districts the system of payment by regular instalments is not enforced. It is regulated according to the different seasons at which crops are most liable to damage from cattle trespass. The Chairman of the Pooree Local Board remarks that "pounds under direct management bring in practically no income, while those that have been farmed pay something and are better managed." The question of farming pounds has recently formed the subject of correspondence with the Government of India, and the Lieutenant-Governor has now under consideration the necessity of introducing certain safeguards against the abuse of the system on the part of the lessees.

15. *Education.*—The total receipts from this source increased from Rs. 30,561 to Rs. 33,496. Compared with the previous year, the receipts in all the districts of the Chittagong Division show a considerable increase, of which more than two-thirds were in Chittagong, consisting of the fees derived from four Model Schools (Middle Vernacular) which were taken over by the District Board from the Education Department. The receipts from the Model Schools in Beerbhoom and Howrah during the year 1889-90, which amounted to Rs. 1,775, were not credited to the respective District Funds. This accounts for the large increase noticeable in the figures shown against those two District Boards for 1890-91. The increase in Pooree is due to the rates of school fees in Board schools having been raised during the year, and in Purneah to the subscriptions raised for the establishment of a technical school. The increase in Backergunge and Moorshedabad has not been explained. The decrease which occurred in Shahabad was due to the refund to Government of a sum of Rs. 606 on account of surplus balance of middle schools, while in Durbhunga it was due to the abolition of two middle schools. A similar decrease in Midnapore is attributed partly to the removal of the middle vernacular

school from Gurbetta to Jagardanga and partly to the falling off in the number of pupils of the Board schools at Samsabad and Daulia. The small fluctuations in the other districts call for no remark.

16. *Medical.*—The total income of Rs. 7,035 under this head was chiefly derived from contributions, and, compared with the previous year, it shows a decrease of Rs. 590.

17. *Miscellaneous.*—The receipts under this head fell from Rs. 1,39,874 to Rs. 1,31,538. Fees, fines, and forfeitures yielded only Rs. 1,15,095 against Rs. 1,27,154 in the preceding year, while the proceeds of staging bungalows rose from Rs. 7,502 to Rs. 10,188.

18. *Ferries.*—The income from this source increased from Rs. 2,84,164 to Rs. 3,38,558. The increase is shared by all the districts except Cuttack, Balasore, Durbhunga, Chumparun, Gya, Burdwan, Howrah, Dinagepore, Bogra, Pubna, and Julpaiguri. The decrease in Cuttack is due to the loss incurred on the resale of certain ferries, the farmers of which defaulted, and in Balasore to the opening of the Coast Canal and the consequent diversion of pilgrim traffic from the Juggurnath Road. The falling off in the receipts in Durbhunga is said to be more apparent than real, as a sum of Rs. 5,938, which was paid by the farmers as their security money for the year under report, was received and credited in 1889-90. The decrease in Chumparun is partly attributed to the same cause, and partly to the fact that the demands for the last quarter of the year for the two combined ferries—Sukhua and Hussoni—were outstanding at the close of the year. In Hooghly it is due in part to the abolition of tolls on Hooghly bridge, which has lessened the receipts of the ferry at Fulta, and in Burdwan to a considerable falling off of the receipts of the Mejhia ferry on account of the opening of the Bengal-Nagpore Railway. The falling off in Pubna is attributed to the high floods which kept the ferries closed for a length of time and diminished the income of ferry farmers, who in consequence failed to pay up their dues. In Dinagepore and Bogra the decrease is said to be owing to there being no competition among the farmers, and in Julpaiguri to ignorance of the rule that one-fourth of the rents paid in advance by the pound farmers during the preceding year, and entered as deposits, has to be transferred to the accounts of the succeeding year. The decrease in Gya is too small to require any explanation. The increase in Patna is attributed to the combination of ferries on both sides of the Ganges, and the division of the proceeds between the opposite districts, which was carried into effect during the year. In the case of the 24-Pergunnahs the Commissioner remarks:—

> Although there was an increase in the demand, the close of the year showed a decrease of Rs. 4,026 as compared with the year preceding. The Chairman does not consider this branch of the Board's work satisfactory. He observes that great laxity has been allowed in the recovery of ferry rents, and that for years past the actual collections have fallen very short of the demand; that the stipulations as to security have been so worked that the so-called security deposit has come to be only an advance payment. The Chairman reports that this is now being attended to.

The Chairman of the District Board of Moorshedabad observes "that the receipts from this source would have been much greater during the year, as the ferries were all settled at very high rents, the bidders expecting large profits from the concourse of pilgrims for the *Ardhodoy Joga*, and having offered larger rents than ever; but their anticipations were disappointed by the high floods."

Ferries in Howrah are reported to have suffered greatly from the competition of river steamers. The silting up of the mouth of the Gyeghatta canal, which is now fordable for nine months in the year, has entailed on the District Board an annual loss of nearly Rs. 6,000. The Noakhali District Board is said to have got into difficulties with some defaulting farmers, and, owing to irregular lettings, lost their cases in the legal proceedings which ensued. The steam ferry between Naraingunge and Munshigunge continued to be managed by the District Board of Dacca. There was, however, a decrease in the receipts from the ferry, which is ascribed to the fact that no *Nangulbund Snan* took place during the year, that the *Kartick Baruni* fair was not so flourishing as in previous years, and that the steam-launch was laid up for about a month and a half for survey and repair.

19. *Contributions.*—The contributions to District Boards from Provincial revenues amounted to Rs. 8,12,454 against Rs. 10,98,148 in 1889-90. The large

increase in the previous year was chiefly due to the inclusion of the contributions of Rs. 1,36,728 and Rs. 37,108 made to the District Boards of Durbhunga and Mozufferpore, respectively, towards expenditure on relief works, and to the grants made for previous years to the District Boards of Furreedpore, Cuttack, and Tipperah, and to the several District Boards in the Burdwan Division having been drawn in 1889-90.

20. *Debt.*—The receipts under this head, which besides loans include deposits made by farmers of pounds and ferries as security for payment of revenue, and advances given by the Boards for the execution of works to be recovered by subsequent adjustment, fell from Rs. 8,19,261 to Rs. 6,91,111. The decrease was very large in the districts of Patna, Mozufferpore, and Durbhunga, and in the case of the two latter districts is mainly due to the fact that an unusually large sum advanced for famine relief works was adjusted in the preceding year. In Patna it was due to the fact that the ferries and most of the pounds were leased out in the year 1889-90 for three years, and security deposits were taken in that year, in consequence of which no deposits were received during the year under review.

21. *Loans.*—No loans were granted during 1889-90. The Dinagepore District Board drew in 1890-91 the first instalment, Rs. 40,000, of a loan of two lakhs from Government for the construction of permanent bridges on the district roads. The Julpaiguri District Board borrowed from Government Rs. 25,000 for the construction of four large bridges on the Central Emigration road, an important feeder to the Haldibari railway station. A loan of Rs. 80,000, to be paid by two equal instalments, was granted during the year to the District Board of Patna for the purpose of completing the construction of bridges on the roads from Buktearpore to Behar, and from Masourhi to Pabhera. The first instalment was received by the Board in December 1890.

EXPENDITURE.

22. *Administration.*—The charges under this head amounted to Rs. 2,65,885 against Rs. 2,58,533 in the preceding year. The creation of new posts, the grant of annual increments to employés, enhanced payments by way of percentage for the establishment of the offices of account and control, and heavier charges for the travelling expenses of members of District Boards under section 53 of the Act, are the main causes referred in explanation of the increase.

23. *Pension and Provident Fund Rules.*—In the original orders which were published by this Government on the 29th October 1889 regarding pensions to Local Fund employés, the creation of a Provident Fund was distinctly held out to local bodies as the first of the alternatives before them for consideration; and in a subsequent circular, dated the 12th January 1891, the special advantages of this system both as regards efficiency and economy were explained at length. A set of Model Rules for the administration of Provident Funds for the employés of District Boards was prepared with the approval of the Government of India and circulated for the guidance of local bodies. These rules were to apply only to those whose whole service has been or will be under the District Board, while employés transferred from pensionable service under Government or under the late Road Cess Committees were to come under the Pension Rules. Provision was accordingly made in the rules for the administration of the Provident Fund for the levy of a contribution from every employé of the former class at the rate of 6¼ per cent. of his salary. The District Boards of Patna, Mozufferpore and Monghyr have already adopted the Provident Fund for those employés whose whole service has been or will be under the Board, and it is believed that other local authorities will follow their example.

24. *Pounds.*—The expenditure under this head amounted to Rs. 29,618, being Rs. 6,029 in excess of that incurred during the year 1889-90. This small increase is probably due to the appointment of pound-inspectors in certain districts.

25. *Education.*—The educational expenditure of District Boards during the year under report amounted to Rs. 10,01,855 against Rs. 10,04,140 in the previous year, showing a decrease of Rs. 2,285. The following table summarises the statistics as they are presented in Appendix C of the Commissioners' reports:—

	Schools maintained by District Boards.			Schools aided by District Boards.			Total expenditure from District Funds.

On comparing the figures given in this table with those contained in Subsidiary Table III of the General Report on Public Instruction, which purports to show the expenditure from District Funds on schools maintained by public and private bodies, it appears that the statistics of schools and scholars agree, but the amounts set down as expenditure differ, so that the total outlay of the District Boards on education is represented by the Director of Public Instruction to be Rs. 9,67,105, while by the Boards themselves, as detailed in the above table, it is stated at Rs. 9,83,805. The last figure again differs by Rs. 18,050 from the total expenditure on education as shown under head 22 of Form III annexed to the District Board reports. The discrepancies between the Director's report and the District Board reports in the matter of educational expenditure are believed to be due to some extent to the fact that when the departmental returns were sent in no allowance was made for outstanding cheques issued by the District Board, payments of which had not been received by the schools. In some districts again the departmental figures include the pay and pension contribution of the education clerk attached to the Board's office, this charge being omitted in the district accounts. But these explanations do not cover all the cases in which the figures disagree, and they fail to account completely for the discrepancies observed between Form III and Appendix C of the District Board reports. Arrangements will be made in future to secure agreement between the

statistics used in these reports, which deal with the same set of facts and ought to present them in the same form. An authoritative series of figures will be compiled in consultation with the Director of Public Instruction, and no departure from them will be permitted.

The statistics of the Patna Division show an increase of 386 schools and 3,273 pupils during the past year, mainly under the head of private schools, which rose from 974 with 8,925 pupils to 1,388 with 13,395 pupils. At the same time there was a decrease of 15 lower primary schools and 35 pupils. Upper primary schools have increased by 7 schools and 68 pupils. Middle vernacular and middle English schools show a falling off of 2 schools and 184 pupils, and 11 schools and 572 pupils, respectively. In the Burdwan Division, Burdwan and Beerbhoom lost both primary schools and pupils during the year, while there was a gain in the remaining districts. In the Dacca Division the total numbers of schools and pupils, respectively, have decreased from 6,602 and 166,895 in 1889-90 to 6,383 and 152,869 in 1890-91. The decrease occurred mainly under the head of primary schools for boys in Mymensingh, Dacca, and Furreedpore. In Backergunge there was an increase of 1,047 in the number of Boards' primary schools for boys, owing to the fact that "some of the unaided successful schools received grants during the year, and this stimulated the increase in the number of both upper and lower primary schools." In the Chittagong Division the number of secondary schools remained stationary, while primary schools increased from 4,318 with 91,660 pupils to 4,558 with 97,975 pupils. In the case of Noakhali the increase in the number of lower primary schools is attributed to the resumption of the system of granting rewards for the mere attendance of day labourers in night schools. This had been done away with in the previous year by reason of the temptation it offers to falsify registers of attendance, and the Commissioner hopes that the Board will not maintain what he considers an unsatisfactory method of granting rewards. In the Presidency Division there was a decline in the number of aided middle English and girls' schools as well as in that of lower primaries, while the aided middle vernacular schools and upper primaries show a slight increase. In the Bhagulpore Division there has been a slight increase of institutions and scholars under the heads of secondary and upper primary schools, along with a very marked decrease both in the number and attendance in lower primary schools. In Bhagulpore district the decrease amounts to 320 schools and 5,121 pupils. This is attributed to some of the patsalas having been reduced to the elementary class for failure to adopt the departmental standard, or because they had less than ten pupils, to want of energy on the part of the inspecting pundits, and to the employment of gurus as census enumerators. Whatever may have been the cause, it indicates, as the Commissioner remarks, a want of success in this branch of the District Board's administration. In the Orissa Division, Pooree alone shows a decrease both in the number of schools and pupils. The Chairman observes:—"The state of education in the district is lamentable. Money is wasted on stipends and grants-in-aid, while no attempt has been made to carry out the Government policy to replace fixed salaries by payment by results." On this the Commissioner remarks that in his experience the system of payment by results has not been so practically successful in some parts of Bengal as to enable him to support the Chairman's view. It is possible that in a backward district like Pooree, where the people are indifferent to education and naturally indolent, a system of stipends combined with vigorous inspection may be better than payment by results. But whatever system is adopted, it is essential that constant and careful inspection should be insisted on.

26. In reviewing the report of the Director of Public Instruction for 1890-91, the Lieutenant-Governor touched upon the necessity of laying down a minimum scale of expenditure on primary education to which all District Boards should attain. It seemed to him that the proportion that the expenditure on primary schools bore to the total expenditure of the District Boards on all purposes might fairly be taken as a standard of what might be expected from individual Boards. In 1890-91 the total expenditure of all the District Boards, excluding debt, amounted to Rs. 55,53,712, and their expenditure on primary education, as shown in the statement given in paragraph 25, to Rs. 4,37,270, or 7·8 on the total of their expenditure. This being so, it seems to the Lieutenant-Governor that District Boards may reasonably be required to devote to primary education not less than 7 per cent. of their total expenditure, excluding debt

heads. The following statement shows for each District Board in Bengal their total expenditure for 1890-91, their actual expenditure on primary education, and the figure which, at the ratio of 7 per cent., is the minimum that should be set aside in future for primary education :—

Division	District Board.	Total expenditure, excluding debt, in 1890-91.	Expenditure on primary education in 1890-91.	Expenditure on primary education at 7 per cent. on total expenditure.

	Total ...	55,53,712	4,37,270	3,88,761

Excluding the Dacca Division, for which separate district figures are not given, it will be seen that in the districts of Bengal Proper the expenditure on primary education exceeds the amount required by the standard now laid down everywhere except in Dinagepore, Julpaiguri, and Chittagong. In these three districts the minimum of 7 per cent. should be worked up to, but it is not meant to suggest that the more liberal grants made by the other districts should be reduced. In all districts of the Patna Division, on the other hand, and in Monghyr, Bhagulpore, and Purneah, the expenditure on primary education is invariably below the standard indicated, and in some cases, as in Darbhanga and Shahabad, the disproportion is very marked. The Lieutenant-Governor trusts that no time will be lost in raising the contribution to primary education in these districts. During his recent tour in Behar he has met the members of the District Boards at all the stations which he visited, and has personally explained to them the especial importance, in a backward province like Behar, of developing primary education on a regular system, so that the natives of Behar shall have a fair chance in the struggle for employment within their native districts.

There has been no change in the educational functions delegated to District Boards. The Deputy Inspector of Schools has been appointed to be an *ex-officio* member of all the District Boards, and the Lieutenant-Governor notices with satisfaction that the relations of the Boards with that officer have, with one exception, been cordial.

27. *Special schools.*—In Bankoorah the same number (6) of advanced Arabic and Persian schools was maintained. The number of pupils in them was 108. The number of Sanskrit *tols* also remained the same, but the number of boys decreased from 331 to 305. In Hooghly it is reported that there are 16 Sanskrit *tols* with 132 pupils and 11 Arabic and Persian schools with 106 pupils. There were also other elementary schools. The Commissioner remarks :—"These schools seem to be old-established ones which have hitherto escaped notice owing to their not sending in any returns. They neither receive nor ask for any assistance, and are content to enjoy a healthy independence." There is a music school at Chatnah in the Bankoorah district with 13 pupils who learn instrumental music: it is self-supporting, the Board contributing only one rupee as an inducement to furnish returns. There is a *madrassa* at Gya for the training of Mahomedans. The Chairman of the District Board of Chittagong submitted a scheme for a technical school to be started from the Khas Mehal grant and aided by the District Board, but it is reported that the plan did not altogether meet with the Director's approval. The District Board of Noakhali have awarded a scholarship of Rs. 10 a month tenable for five years at the Sibpur Engineering College to a Noakhali boy who passed the first examination in Arts. The Commissioner submits the following report regarding the artisan school established at Commillah to teach boys carpentry and blacksmith's work:—

"During this short time the school has attracted 19 pupils—14 in the carpentry and 5 in the blacksmith's class—and both the classes have acquired a fair knowledge. The District Board has founded twenty scholarships of the value of Rs. 4 each for the encouragement of these artisan pupils, a certain number being reserved for Tripuras (*Tipperahs*). Fifteen of these have been awarded. A trained master-carpenter and a blacksmith have been entertained on salaries of Rs. 40 each. The total expenditure towards the maintenance of the school amounted to Rs. 1,405, including the cost of apparatus."

The District Board also have founded two scholarships of Rs. 15 each tenable at the technical branch of the Sibpur Engineering College to be awarded to two natives of the district on their contracting to serve under the District Board after the completion of their College career. The District Board of Purneah have sanctioned the establishment of a technical school similar to that established at Rungpore for the purpose of training mechanics, surveyors and workers in wood and iron.

28. *Female Medical Education.*—The Bankoorah and Burdwan Boards renewed their offers of scholarships of Rs. 20 and Rs. 8 respectively, but no candidates were forthcoming. The Burdwan District Board also, acting in concert with the local Municipality, employed a midwife on Rs. 12 a month for a part of the year in connection with the Burdwan dispensary. Sarat Kumari Mittra, mentioned in the last year's Resolution, continued to hold her scholarship in Midnapore, and has passed her final examination. Sreemati Koilash Bashini Dasi, who held the Rungpore scholarship of Rs. 15 per mensem, has also passed the final examination, and is under an agreement to practise in the district for five years. The District Board of Gya expended during the year a sum of Rs. 839 on their establishment for the training of midwives. The District Board of Sarun have established a scholarship of Rs. 10 a month tenable at the Bankipore Temple Medical School for female students of Sarun. A naturalised Bengali lady offered herself, but the Board desired to obtain the services of one who is a Behari by race. The District Board of Shahabad had also before them a proposal to found a scholarship for the training of midwives. In Patna two special scholarships worth Rs. 10 each were created by the Board last year to attract female students, but none have come forward. The District Board of Rajshahye received some applications from Calcutta for the scholarship offered by that body for the promotion of female medical education, but it was decided to reserve it for a resident of the district. The Tipperah District Board have founded two scholarships of Rs. 15 each tenable at the Campbell Medical School, Calcutta, for females of that district. The Board have also provided an additional monthly allowance of Rs. 80 for the establishment of a lady doctor at Commillah. The Cuttack District Board continued their scholarship of Rs. 100 a year to the most

deserving female student attending the local medical school. The Lieutenant-Governor accepts these arrangements as evidence that the Boards are disposed to recognise their obligations in the matter of female medical education. If in some cases their efforts have not met with a very ready response, it must be remembered that the idea of providing skilled female medical attendance for the women of this country is comparatively a new one, that the class of women from among whom such practitioners can be drawn is at present extremely small, and that a mass of prejudice exists on the subject which greatly enhances the difficulty of adding to their number.

29. *Medical.*—The total outlay under this head amounted to Rs. 58,519, showing an excess of Rs. 15,973 over that of the preceding year. The increase is noticeable under all the heads except "Sanitation charges" and "Lunatic Asylums." There has been an increase of two in the number of dispensaries maintained by District Boards. The dispensary at Bhola in Backergunge was placed under the management of the Board, with effect from the 1st April 1890, and the Jessore District Board took over charge of the dispensary at Narail during the course of the year. In addition to the maintenance of their regular dispensaries, several District Boards contributed towards the support of institutions which were not under their direct control. The Gya District Board contributed Rs. 1,000 to the Lady Dufferin's Fund towards the maintenance of a lady doctor. The Shahabad District Board gave Rs. 300 towards the support of the Nasrigunge Dispensary. The District Boards of Patna, Shahabad, and Sarun spent Rs. 7,862 on sanitation and medical relief. The Durbhunga District Board sanctioned a sum of Rs. 600 as a contribution towards the maintenance of the old dispensary at Tajpur, the income of which had fallen off considerably owing to the transfer of the sub-divisional head-quarters to Somastipore. The District Board of Burdwan contributed Rs. 600 towards the maintenance of the Municipal Dispensary in the town. The Bankoorah District Board contributed Rs. 1,000 towards the maintenance of the local municipal dispensary. The Beerbhoom District Board contributed Rs. 992 as half cost of the maintenance of the Suri Charitable Dispensary and Rs. 360 to the Rampore Haut Charitable Dispensary. The District Board of Pubna entertained temporary medical officers to attend sufferers from cholera, which broke out in an epidemic form in the district, and contributed to the cost of medicines. They had also in their employ two midwives for a part of the year. The District Board of Rungpore, besides contributing in part towards the maintenance of the Kurigram, Gaibandha, and Nelphamari Dispensaries, gave Rs. 300 as subsidy to the Nelphamari Charitable Dispensary and purchased medicines and incurred other charges incidental to a violent outbreak of cholera. Srimati Jogamaya Dasi, the midwife employed by the Rungpore District Board, is favourably reported on. The Chairman writes that she is clever, knows her work, and is in great request among the ladies of the district. The District Board of Dinagepore spent a large sum in constructing a building at Thakurgaon for the accommodation of indoor patients. The District Board of Backergunge made a grant of Rs. 1,200 to the Municipal Dispensary at Barisal during the year; besides sending native doctors and medicine to various localities in thanas Gournadi, Bhandaria, Sarupkati, and Matbaria, where there was an outbreak of cholera. The total outlay on account of medical relief thus given amounted to Rs. 885. In Furreedpore a sum of Rs. 225 was spent in aiding the charitable dispensaries at the Sudder station and Goalundo and in administering relief in cholera-stricken areas of the district. In Mymensingh the contribution of Rs. 600 per annum to the Nasirabad Municipality for medical purposes was increased to Rs. 900. Besides this amount, the District Board has placed the services of one midwife at the disposal of each of the Local Boards except that at Netrokona. The District Board of Mymensingh has recently awarded a medical scholarship to one Id-un-nissa, a Mahomedan young lady, on the condition that she returns to practise at Mymensingh if required to do so by the District Board. The Board have also resolved to open a new dispensary at Dewangunge. The District Board of Monghyr contributed Rs. 130 and Rs. 50 monthly towards the maintenance of the dispensaries situated at the head-quarters of the district and the sub-division of Beguserai respectively. A grant of Rs. 1,000 was also made by the Board to the Jamui Dispensary for providing additional accommodation for indoor patients. The Purneah District Board expended a sum of Rs. 96 in affording medical relief to the people in the tracts affected with cholera. This

District Board has also agreed to contribute to the Purneah Municipality a sum of Rs. 700 per annum towards the pay of an Assistant Surgeon to be employed in the charitable dispensary. As, however, no Assistant Surgeon could be procured during the year, the amount was expended agreeably to the recommendation of the Inspector-General of Hospitals in providing a ward for the better class of patients. The Maldah District Board paid Rs. 900 during the year to a dispensary opened at Mathoorapore by Mr. G. Hennessy. The District Board of the 24-Pergunnahs paid Rs. 130 in scholarships to two female students studying medicine in the Campbell Medical School at Sealdah. The same Board have also, at the request of the Commissioners of the Bussirhat Municipality, sanctioned a contribution of Rs. 150 per annum towards the cost of the maintenance of the Municipal Dispensary. The Nuddea District Board contributed Rs. 120 to the maintenance of a dispensary at Chooadanga, and spent about Rs. 200 in removing corpses from the road from Krishnaghur to Bogoola, on which a large number of pilgrims died on their way back from Nabadip during the late *Ardhaday* festival. The District Board of Cuttack have resolved to open a dispensary at Nayabazar at an annual expenditure of Rs. 800, and to provide a building for it at a cost of Rs. 1,500. The action of the District Board of Tipperah, in opening ten new dispensaries during the year, shows a creditable interest in medical progress and a just sense of one of the chief wants of the people of Bengal. These dispensaries are said to have been carefully looked after by the Civil Surgeon and to have given a good outturn of work. The District Board also offer to aid in setting up a dispensary at any important place where local subscriptions are forthcoming to prove that the residents really desire such an institution. The Lieutenant-Governor hopes that other District Boards will see their way to follow the good example that has been set by the people of Tipperah in this matter. A lady doctor was engaged during the year by the Chittagong District Board on a salary of Rs. 100 a month. She has been provided with a house and is allowed Rs. 30 a month for conveyance. She attends all patients in the dispensary free of charge, and is also allowed to take private practice, for which it is understood her fee is Rs. 4 for each visit. The District Board have also decided to start eight dispensaries in the interior, on the Tipperah system, provided that a certain amount of local help is given. The Lieutenant-Governor has perused with much satisfaction this record of the measures adopted by the several District Boards to extend medical relief in various forms, and he trusts that they will continue to persevere in their good work. He also hopes that the eight District Boards named in the margin, which incurred no expenditure during the year under this head, will realize their obligation to contribute to the cost of hospitals and dispensaries, and take steps in that direction at an early date.

Howrah.	Moorshedabad.

30. *Sanitation.*—Details of the works undertaken for the improvement of sanitation in the districts of Bengal during the past year are given in Appendix IV. The Noakhali District Board expended the largest amount on these works. The Lieutenant-Governor regrets to notice that no real sanitary improvement was effected during the year in any of the districts of the Presidency Division. The Commissioner of the Division writes:—

"The improvement of water-supply is a duty which the Boards must not be allowed to neglect. The objection has been made that if a tank is re-excavated for one group of villages, the whole of the rest of the district will complain. The objection may be gradually met by impartially improving the water-supply of different parts of a district in turn, and I hope that, when a beginning is once made and an example shown, wealthy individuals and Village Committees may initiate works, and the Boards may be able to confine themselves to giving grants-in-aid. Here, again, I submit that if Village Union Committees were organised as proposed seven years ago, we should have bodies directly interested in a supply of good drinking water, and in a position to ask the District Boards for help. I do not see why Local Sub-divisional Boards should be expected to interest themselves in such a matter any more directly than the District Board. The first essentially necessary step to be taken is to obtain absolute rights over a tank and its banks so as to prevent pollution, and the best place to select for operations is where two or three small tanks adjacent to one another can be deepened and thrown into one large one. The work can often be made remunerative by reclaiming low lands with the earth excavated, by leasing out fishery rights, and by planting fruit trees on the banks, though not so near as to allow leaves to fall into the water. The Boards will be advised to undertake operations on these lines."

The Cuttack District Board is said to have been trying to improve the supply of drinking water in the interior for the last two or three years, but the landowners will not co-operate, and the finances of the Board will not admit of their acquiring land for the purpose. Eight tanks and four khals are reported to have been excavated during the year in Tipperah by way of sanitary improvement; but it is not stated from what source the expenditure was met. The Commissioner of Chittagong makes the following pertinent remarks on the subject:—

"This is no doubt the part of their functions which District Boards find most difficulty in administering. The Tipperah Board, for instance, has a population of, by the last census, over 1,700,000 of souls under it. To provide sanitary improvements which would benefit one hundredth part of this population is impossible. The point is not only what to do without favouritism, but where to begin. The funds only allow of a few scattered model measures. Some alternative model schemes framed by experts and carried out to detail would, I am sure, be welcomed by every Board in the Province."

The Mozufferpore District Board have lately asked several zemindars and planters in the district to undertake the reclamation of tanks and wells in their neighbourhood, and have allotted in their budget for the current year Rs 5,000 for general purposes of sanitation. Since the close of the year the District Board of Pooree have resolved to contribute Rs. 2,000 to the Juggernath Road Fund for improving the sanitation of the chutties along the Juggernath road.

31. The question of rural sanitation is one of extreme difficulty in Bengal, not merely because the financial resources of the District Boards are wholly inadequate to the work to be done, but also because no village agency exists competent to carry out the simpler measures which are necessary to guard against the pollution of the village site, and the fouling of the water-supply. Having regard to the necessary limitations to which the action of the District Boards is subject, the Lieutenant-Governor considers that the best principle for them to adopt is that suggested by the Commissioner of Chittagong. Clearly the Boards cannot execute all the sanitary works that are needed. But they can set examples as opportunity offers by cleaning tanks, digging or cleaning out wells (especially along the chief roads), and by promoting general knowledge of the measures which tend to improve the healthiness of a locality. If their sanitary works are well and cheaply done, using materials available on the spot and not of too elaborate a character, it may be hoped that neighbouring landholders will be led to undertake works of the same kind, and that the villagers may themselves combine to carry out petty local schemes with or without the assistance of the Board. Small grants-in-aid for cleaning tanks and drainage channels might be found to encourage local effort in such cases. It should also be an object to distribute such works impartially, as the Commissioner of the Presidency Division suggests, in different parts of the district, in order to diffuse as widely as possible the knowledge of what the District Board is doing and what its intentions are.

32. *Miscellaneous.*—The expenditure under this head increased from Rs. 43,365 in 1889-90 to Rs. 46,686 in 1890-91. In three districts rewards were paid for the destruction of wild animals and snakes, viz., in Purneah Rs. 40, in Rungpore Rs. 443, and in Sarun Rs. 328. On this subject, the Chairman of the District Board of Rungpore writes:—

"I was obliged to reduce the rewards for tigers in order to prevent their extermination. The balance of nature must not be ruthlessly disturbed. Tigers have their uses in keeping down deer and pigs on the vast Brahmaputra churs, many of which have large tracts not yet fit for cultivation."

The District Board of Burdwan set apart a sum of Rs. 200 for the payment of rewards, but no portion of this was spent.

33. *Famine Relief.*—The Sarun District Board spent Rs. 12,206 in affording relief to the sufferers from the heavy flood of August 1890. Of this sum, however, only Rs. 1,618, which was spent on charitable relief, has been entered under head 33 of the Accounts; Rs. 9,345 spent on relief works, and Rs. 1,243 on establishment have been debited to roads. The District Board of Furreedpore advanced loans to the extent of Rs. 1,400 for a similar purpose. The destruction of crops by the floods of August 1890 was also severely felt in certain tracts of the Pubna district. Employment was provided by the District Board for the sufferers; but it is reported that the people did not resort to the work freely owing to the feeling that coolies' work would be degrading to them

At one time signs of distress appeared in some parts of the Bussirhat sub-division in consequence of the unusually high floods in the river Ichamati; but as it did not appear necessary to start relief works, no further steps were taken in the matter. In the district of Nuddea relief works had to be opened, owing to the floods in the Bhagirathi, during the year. The Board sanctioned for the work Rs. 9,500, of which Rs. 7,976 were spent up to the end of October last. Of the balance, Rs. 1,164 were spent on completion of the works afterwards. The number of labourers of all classes employed on the relief works started by the District Board of Nuddea was 54,095, the daily total on an average being 886·8. It is said that the District Board exhausted its funds on these works. The amounts of Rs. 1,12,221 and Rs. 4,466 entered under the head Famine Relief for Durbhunga and Mozufferpore represent merely adjustments of the previous year's accounts.

34. *Civil Works.*—The following table shows the Public Works expenditure under the several heads as compared with that of 1889-90:—

Year.	Original works.	Repairs.	Establishment.	Tools and plant.	Water-supply and water-works.	Drainage works.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1889-90 ...	11,71,942	19,43,732	5,57,345	33,893	20,960	5,347	37,33,219
1890-91 ...	11,82,488	20,16,659	5,65,446	29,759	38,232	51,482	38,83,996

Although the Patna Division shows, as in the preceding year, the largest outlay on Original works, this item has gradually decreased from year to year. This is said to be due to the small expenditure in Gya and Shahabad, where the outlay aggregates only 56 and 57 per cent., respectively. The most expensive work undertaken was the renewal of the bridges on the Buktearpore-Behar road at a cost of Rs. 56,000. The Dinagepore District Board continued their policy of improving the existing roads by constructing permanent bridges. During the year 46 bridges and culverts with an aggregate waterway of 582 running feet were constructed at a cost of Rs. 66,738.

35. The following statement shows the length of roads maintained by the several District Boards, with their cost per mile, divided roughly into first and second class: in the former class are placed roads which are metalled or partly metalled and wholly bridged, in the latter all the rest except the purely village roads:—

District.		Miles of Road.		Cost per mile.	
		1st class.	2nd class.	1st class.	2nd class.

	Chumparun	...	84	955	50	10	0	24	2	3

The average cost of maintaining each mile of first class road for all the districts taken together was about Rs. 380, and of second class roads about Rs. 51. The average cost per mile of roads of the first class was highest in Howrah (2,492), Tipperah (1,167) and Maldah (1,152), and lowest in Chumparun (Rs. 50-10), Mozufferpore (Rs. 63-9), and Durbhunga (Rs. 93-11). Roads of the other class were cheapest in Bankura (Rs. 12), Gya (Rs. 16-12), Shahabad (Rs. 18-1) and Rungporo (Rs. 18-8).

36. *Village Roads.*—The total outlay on village roads amounted to Rs. 4,51,900, or Rs. 82,948 more than that of the year 1889-90. The expenditure was largest in Tipperah (Rs. 29,814), Mymensing (Rs. 26,161), and Sarun (Rs. 25,885), and smallest in the three districts marginally named.

		Rs.
Julpigoree	...	737
Beerbhoom	..	726
Bogra ...	...	807

The cost of maintaining a mile of village road has been in many districts higher than the cost of maintaining a mile of district road. It ordinarily means merely surface repairs of a surface track, but some of the village roads are partly embanked and bridged, and then repairs are more expensive. The amount required for these repairs is generally expended through the Local Boards. In Burdwan it is reported that nearly the whole of the amount allotted for village roads was spent, and that no case of improper expenditure was brought to notice. A village road inspector was appointed to look after the village roads under the Sudder Local Board. The Lieutenant-Governor has read with much pleasure that, in the Munshigunge sub-division of Dacca, the grants for village roads were in some instances supplemented by private subscriptions, and that the lands required for the construction of these roads were given gratis in all cases. In Behar and some districts of Western and Central Bengal, and also, it is believed, in Darjeeling, a certain number of village roads are annually repaired through the agency of planters and other private gentlemen, and the Lieutenant-Governor is happy to learn that these gentlemen generally render great assistance to the Local Boards by their co-operation, and by undertaking to repair numerous village roads in the neighbourhood of their estates. The District Board of the 24-Pergunnahs have, in view of the limited

funds placed at their disposal, found it difficult to satisfy the growing demand for village communications. On this subject the Commissioner of the Chittagong Division writes :—

"Village roads have a special importance in this division, because the distinction between them and the scheduled roads is very fine indeed. Many of the latter have a surface width of from six to four feet. Again, village roads are found 12 and 15 miles long. The fact that there are only 10 miles of metalled road in the division outside the municipalities illustrates the physical position."

37. *Water communications.*—A sum of Rs. 1,962 was expended by the Pubna District Board on the maintenance of the Telkupi khal. The District Board of the 24-Pergunnahs expended a sum of Rs. 330 in maintaining the 17 miles of khal under them. Four important khals were deepened during the year in Tipperah. In Backergunge the improvement of the khal leading from the Barisal river to Lakutea Dono was undertaken and completed within the year, and that of another khal, running from the Torki river to Goila bheel, which was taken in hand last year, was also finished during the year under report. The total outlay on both these khals amounted to Rs. 4,713. In Mymensingh a sum of Rs. 310 was spent on the improvement of the Sandhikona khal and the Kuirai river in the Netrokona sub-division. More might usefully be done in this way in the districts of Eastern Bengal.

38. *Steam river service.*—The steam ferry between Naraingunge and Moonsheegunge, referred to in paragraph 18 above, continued to be managed by the District Board of Dacca. In Backergunge a monthly subsidy of Rs. 500, minus deductions on account of late arrivals, was paid by the District Board for the daily service between Barisal and Khoolna. The steamer service between Barisal and Noakhally was kept up during the year. During the floods there was steam communication between Maldah and Rajmehal, and also between English Bazar and Rampore Beauleah. The daily steamer service between Rampore Beauleah and Damukdea, and between Pubna and Kooshtea, was maintained throughout the year. The Rajshahye District Board paid a subsidy of Rs. 4,600 for the maintenance of the former, and the Pubna District Board Rs. 3,975 for the latter.

39. *Miscellaneous Public Improvements.*—In Monghyr three beacons were constructed on the Munpathal rocks in the river Ganges to indicate the position of the rocks, which are covered by water in the rains and become dangerous to navigation.

40. *Public Works Establishment.*—The percentage of the cost of establishment on the total expenditure on public works during 1890-91 in the several districts is shown below—

District	Percentage	District	Percentage
24-Pergunnahs	11·2	Durbhunga	25·8
Nuddea	16·7	Dacca	15·9
Jessore	15·7	Furreedpore	12·2
Khoolna	16·8	Backergunge	13·4
Moorshedabad	20·5	Mymensingh	12·4
Chittagong	21·9	Burdwan	10·3
Noakhali	16·8	Hooghly	13·4
Tipperah	9·2	Howrah	9·2
Cuttack	20·3	Bankoora	22·9
Pooree	19·9	Beerbhoom	15·0
Balasore	19·0	Midnapore	17·3
Patna	13·3	Julpaigori	8·9
Sarun	15·9	Rungpore	12·2
Shahabad	15·9	Dinagepore	11·2
Gya	18	Rajshahye	19·3
Chumparun	18·1	Pubna	17·3
Mozufferpore	19·5	Bogra	18·3

The figures for the several districts in the Bhagulpore Division have not been supplied, but it is reported that the expenditure incurred on the establishment is below 20 per cent. of the amount expended on the works. In five districts, viz. Durbhunga, Bankoora, Chittagong, Moorshedabad and Cuttack, the percentage exceeded the limit prescribed in the second proviso of section 33 of the Act. It was highest in Durbhunga and lowest in Julpaigori. As compared with the previous year, there was an increase in the

cost of the establishment in the districts named below, viz., Hooghly, Bankoora, Beerbhoom, Midnapore, Khoolna, 24-Pergunnahs, Moorshedabad, Dacca, Backergunge, Mymensingh, Cuttack, Pooree, Patna, Durbhunga, Rajshahye, Pubna, and Rungpore. In the remaining districts there was a decrease.

41. *Drainage.*—The drainage channel from Dinagepore to Gouripore was maintained at a cost of Rs. 500 by the Dinagepore District Board. The Rungpore drainage project, which was commenced in 1889-90, was nearly completed during the year. The total length is 25 miles, and the area benefited by it is reported to be at least 200 square miles. A sum of Rs. 49,898 was expended on the work during the year.

42. *Railway feeders.*—The earthwork on the railway feeder from Haripal to Bandarhatty was completed during the year, but the metalling has not yet been put on, as the earthwork is not sufficiently consolidated. The Monghyr District Board completed during the last year the three railway feeder roads, Beguserai to Garhara, Indupore to Barhia, and Darhara to Latiha. Of these the first-named is said to be of much importance, in that it forms a direct communication from Beguserai sub-divisional cutcherry to the railway station. In Purneah a feeder road, half a mile in length, connecting the Koosiorgaon railway station with one of the district roads, has been constructed at a cost of Rs. 162. In Dacca good progress was made in the railway feeder road connecting the Sripur station of the Dacca State Railway with Gosinga, an important mart on the river Lakhiya. Another feeder road from Tongi station was continued as far as Kaligunge.

43. *Tramways.*—None of the projects referred to in paragraph 37 of the Resolution on the working of District Boards in Bengal during 1889-90 were taken in hand during the year.

44. *General remarks.*—The following extracts contain the opinions of the Commissioners of Divisions on the general administration of the District Boards:—

Mr. Quinn, the Officiating Commissioner of the Bhagulpore Division, quotes with approval the opinion of Mr. Wace, the Chairman of the Bhagulpore Board, to the effect that it is doubtful policy to put a Local Board under a non-official Chairman, who cannot go about the district like the Sub-divisional Officer, and exercises less check on subordinates. In the District Board also the ablest men are tied to head-quarters by their habits and their business, and little or no work is done by individual members outside the committee-room. Happily, says Mr. Wace, they are wise enough to trust in matters requiring local knowledge, those who know the interior of the district. In Education, "too much money goes in establishment, and the inspecting pundit does less for his pay than any other servant of the Board." The Finance Committee, on the other hand, "do excellent service in administering the funds allotted to them and watching the expenditure." Mr. Quinn himself adds:

> The work of the several District Boards was carried on smoothly and with a fair degree of efficiency during the past year. The system of entrusting the control of the primary education grant to Local Boards is, I think, of doubtful expediency. The Bhagulpore local authorities have, as remarked in a former part of this report, been unsuccessful in the promotion of primary education, and the Inspector of Local Works is of opinion that the road works under the control of the District Board would be better and more expeditiously executed if the District Engineer were allowed a free hand. I am disposed to agree in this opinion. There is also a tendency here and elsewhere, on the part of the Finance Committee, to assume too much of the functions of an executive body, which should, I think, be discouraged. I am happy to observe that the disposition towards undue expenditure on establishment by the unnecessary increase of salaries which was noticed in the last report has not manifested itself in the year under review.

Mr. Westmacott, the Officiating Commissioner of the Presidency Division, quotes the opinion of the Chairman of the District Board of the 24-Pergunnahs, who doubts whether Local Boards are of much use. They have no independent sources of income, and their duties are limited to expending fixed allotments on works in which no discretion is allowed them. On the other hand, they cost something for establishments and office expenses. Mr. Baker believes therefore that the work would be done more efficiently and economically if it were entrusted wholly to the District Board. Mr. Westmacott's own view is—

> That Village Union Committees would prove a more efficient agency for carrying out any measures of real Local Self-Government than sub-divisional Local Boards can be. I cannot now find a reference to a report in which I stated this view comparatively recently, but I

have before me a copy of the report already alluded to, which I submitted on the 31st March 1884 to Sir Rivers Thompson's Government, after forming 180 Committees in 33 thanas and 10 sub-divisions. I believe that those Committees would have worked well. Their only fault was, in my opinion, that they were much too large, comprising about 2,500 households each. I should have preferred making them very much smaller, knowing, as I do, the difficulty of getting a Bengal villager to extend his interests beyond the limits of his own village. In introducing Self-Government, I would begin with the village as a unit, and gradually get the villagers to combine to support joint-schools, pounds, roads, hospitals, and so work up to sub-divisional Boards. In starting with District Boards and working downwards, I think we began at the wrong end of the chain. I do not, however, think it too late even now to organize Village Union Committees, and entrust them with local administration under the existing Boards, and if this is done, I feel confident that Self-Government will show a vitality which it has not shown yet. In another generation we might hope to find men seeking election to be members of the Boards, who, as members of Union Committees, had been trained in the administration of public affairs in which they felt a strong personal interest in the place of men without training, the majority of whom seek election, not so much for the furtherance of local interests, as because they wish for a share in the administration and patronage of the district and sub-division. I will not, however, enlarge upon this subject now.

Mr. Forbes, the Officiating Commissioner of the Dacca Division, remarks:—

I only took charge of this division two months after the expiration of the year under report, and have not therefore had time to inform myself thoroughly as to the working of the different District Boards. I have been able, however, to pay a short visit to each of the districts under my charge, and from what opportunity I have had in this manner of forming a judgment, as well as from the reports of the district officers, I am of opinion that the different Boards have worked well and harmoniously—in short, in such a way as to fairly fulfil the expectations of the framers of the scheme. At the same time we must not conceal from ourselves the fact that their successful working hitherto has in a chief measure been due to the judicious guidance and the personal efforts of the official Chairmen, without whose constant and active control I fear the fabric would soon fall to pieces. In this matter, as well as owing to the fact that the supply of the sinews of war—the assessment and collection of the tax—is in the hands of the Government officials, the District Boards are in a much more advantageous position than that occupied by Municipal Committees, and to these two important differences must, in the main, be attributed their comparatively better working. The working of the Local Boards appears to have been somewhat uneven. In places they seem to have done well, but in others indifferently. The Magistrate of Furreedpore especially complains of irregularity in attendance at their meetings, and Mr. Jenkins considers that there is not much use in making over to the Local Boards any considerable allotments, as the members find difficulty in giving time to supervise the expenditure. I am inclined to agree in this, and also in Mr. Phillips' opinion that the making over the management of pounds and ferries to the Local Boards was scarcely a wise policy. In Backergunge the Local Boards are reported to have done much useful work. It must, however, be mentioned that in that district the Local Boards' Chairmen are all Government officials, viz., the respective sub-divisional officers.

Mr. Veasey, the Officiating Commissioner of the Burdwan Division, observes:—

I joined this division after the close of the year, but, so far as my experience goes, matters have worked smoothly, and it is but seldom that advice or warning becomes necessary. Very much depends on the personality of the Chairman, and I doubt if the time has yet come for the elimination of the official element, which means the product of official and special training in what is not to be acquired by intuition.

Mr. Lewis, the Commissioner of the Rajshahye Division, says:—

The District Boards have, on the whole, worked satisfactorily, and much good work has been done during the past year. Without detracting from the merits of the individual members of the respective bodies, however, I may add that a good deal of the success which has marked the past year's administration is due to the interest taken in the working of the Boards by the District Officers. Messrs. Price and Skrine have both rendered excellent service in this direction.

Mr. Oldham, the Officiating Commissioner of the Chittagong Division, makes the following remarks:—

All the Boards have done well and worked effectively and harmoniously. Their weak points are still, as was to be expected, in the matter of accounts and despatch. In Chittagong the members, with few exceptions, took considerable interest in the work. The work of this Board comes less before me than that of the two others. It has not developed its Committee system as fully as they, but its members have more work in their hands as individuals than those of the other Boards. In Noakhally the non-official members have on the whole, says the Magistrate, excelled the official members in point of zeal, without at the same time misdirecting their energies. A large amount of solid, substantial business has been discharged by the three Committees of the Board, the members of which have worked harmoniously with their professional advisers. The Noakhally Board has always seemed to me a very strong practical and business-like body. In Tipperah the Magistrate says that,

as regards the outturn of work, the year compares favourably with its predecessors. Much interest has been taken in sanitary improvements, and in affording medical aid in outlying parts of the district. The District Board acknowledges the praiseworthy attention the Civil Surgeon, Dr. Whitwell, bestowed on the management of dispensaries. The establishment of an artisan school in Commilla is a commendable beginning. The members devoted a reasonable amount of time to attending the meetings of the District Board, while the attendance at Local Boards was less satisfactory. The Chairman regrets that zemindars remain satisfied to leave the discharge of the duties connected with the important District Board in the hands of their legal agents, who have no time to devote to the personal inspection of public works. The work of this Board comes more before me than that of any other. It is the most ambitious and progressive of the three Boards, and must, I think, be also pronounced to be the most successful, except in the matter of public works, in which its agency, though good, is not so exceptionally good as that which the Chittagong and Noakhally Boards are so fortunate in having.

Mr. Stevens, the Commissioner of the Patna Division, reports as follows:—

On the whole, I think that the working of the Boards has been satisfactory, and that the introduction of the system of Local Self-Government into this Division has been fully justified by results. It was of course recognized from the first that the method of working must follow local conditions, and it was always expected that in Behar the Boards would have to lean on official guidance more than elsewhere. The law and rules have been sufficiently elastic to meet these local differences, and are adapted to a greater as well as to a lesser degree of development. As time goes on the honour of serving on the Boards, which is already appreciated, will become more and more highly esteemed, and doubtless, as education progresses, there will be an increasing number of country gentlemen fit and desirous to be candidates for office.

Mr. Toynbee, the Commissioner of the Orissa Division, makes the following observations:—

Mr. Allen, the Chairman of the Pooree District Board, writes:—"The District and Local Boards were reconstituted during the year. The latter got through the little work they had to do quietly and with tolerable efficiency. The former body met regularly and acquiesced readily in the measures proposed by the official executive. There was no obstructiveness, but, on the other hand, there was not much practical assistance, except that afforded by the Education and Finance Committees, and of these the latter was rather dilatory in getting through its monthly audits. The Board does not interfere with the District Engineer, who gets through his work satisfactorily, and it does not quarrel with the Deputy Inspector of Schools, whose suggestions are generally accepted and carried out; but there is little real interest among the non-official members in Local Self-Government." Mr. Cornish, the Chairman of the Balasore District Board, reports as follows:—"The District Board has perhaps worked as satisfactorily as it did in the previous year, but I cannot report as confidently on the working of the Local Boards. The Sadar Local Board sustained a great loss in the transfer last November of Dr. Zorab, its late Chairman. His great local knowledge, tact and patience commanded the respect and confidence of all classes, and enabled him to keep in check the miserable tendencies of petty party spirit which are ever threatening to bring discredit on Local Self-Government in Balasore. The Bhuddruck Local Board suffered from the arbitrary misconduct which led to the transfer of its former Chairman and from a double change of officers.

"I am glad to be able to note that during the year under report some attempt has been made to ensure better supervision of roads, schools, and pounds in the Sadar sub-division by the officials of the Sadar Local Board. This still requires to be more systematic and regular, but it is a great thing to have secured at least the beginning of some supervision by those to whom the responsibility is entrusted." Mr. Stevenson writes:—"The plant of Local Self-Government has not yet been naturalized. Even the educated class has yet to learn that if the people are to manage their own affairs, they, or rather their representatives, must be prepared to subordinate their personal convenience to the public good."

The burden of these remarks and of similar observations in the body of this report is somewhat discouraging. Local Self-Government in Orissa is evidently an exotic which has not yet become acclimatised. The official Chairmen apparently do all the work, and the Boards agree to their proposals and register their decisions without discussion There is happily an absence of anything like obstruction, active or passive; but this fact is due, I fear, rather to lack of interest and energy, than to a spirit of fairness and good sense.

During the various tours he has made since assuming charge of the Government of Bengal, Sir Charles Elliott has endeavoured to take every opportunity of looking into the work of the District Boards and personally discussing with the members of these bodies their views as to the requirements of their districts. What he has seen in this way, and what he has learned from the reports of experienced officers, go to strengthen his conviction that the success or failure of the system of Local Self-Government depends less upon the constitution and legal status of the Boards than on the practical capacity and good sense of the individual members who serve upon them, and on the amount of experience and local

knowledge which they contribute to the service of the executive. The precise form of the law under which local authorities are organized matters comparatively little; the spirit in which they exercise their functions matters a great deal. The question of amending the Local Self-Government Act has recently been under consideration, and although on a few minor points the law may be susceptible of some improvement, the Lieutenant-Governor has decided not to undertake any fresh legislation for this purpose at present. He finds everywhere a praiseworthy disposition on the part of the Boards to attend regularly to their duties and to pay due regard to the wishes of Government and the advice of their Chairmen and professional advisers. Special commendation is due to the work of the Finance Committees of the various Boards, who discharge duties of an important and laborious character, and of a kind which public bodies have not always shown an inclination to attend to in sufficient detail. The thanks of the Lieutenant-Governor are due to these gentlemen and to the District Boards generally for much excellent work done during the past year.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Offg. Secy. to the Govt. of Bengal.

APPENDIX I.

Form No. I (a.)

Statement showing the constitution of the District Boards in Bengal during the year ending 31st March 1891.

LIBERALITY OF RAJA BAIKUNTHA NATH DE, BAHADUR, OF BALASORE.

No. 2744, dated Calcutta, the 10th December 1891.

From—H. H. RISLEY, Esq., Offg. Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Commissioner of the Orissa Division.

I AM directed to acknowledge the receipt of your memorandum No. 283 L.F., dated the 29th October 1891, and enclosure, from the Magistrate of Balasore, forwarding a copy of a letter from Raja Baikuntha Nath De, Bahadur, in which he proposes to establish a charitable dispensary at his own cost at Soro on the Jagannath road, in the district of Balasore, and to guarantee the payment of Rs. 800 annually towards its cost for ten years, if the Pilgrims Lodging-house Fund for that district contribute a corresponding amount. It is proposed to call the institution the "Elliott Charitable Dispensary."

2. In reply, I am directed to say that the Lieutenant-Governor accepts the offer on the terms proposed; and I am to request that you will convey to Raja Baikuntha Nath De, Bahadur, an expression of His Honour's thanks for his liberality. The Inspector-General of Civil Hospitals will be requested to appoint a Civil Hospital Assistant of the third class to be in charge of the dispensary when it is opened. This letter will be published in the *Calcutta Gazette*.

LIBERALITY OF BABU KRISHNA MOHUN RUDRA SIRKAR OF IRPALA, IN THE MIDNAPORE DISTRICT.

No. 2746, dated Calcutta, the 10th December 1891.

From—H. H. RISLEY, Esq., Offg. Secy. to the Govt. of Bengal, Muncipal Dept.,
To—The Commissioner of the Burdwan Division.

I AM directed to acknowledge the receipt of your letter No. 655M., dated 6th November 1891, in which you state, in continuation of previous correspondence on the subject, that Babu Krishna Mohun Rudra Sirkar has deposited the sum of Rs. 13,500 in the sub-treasury at Ghattal in order to endow a charitable dispensary which he proposes to establish in his native village of Irpala, in the district of Midnapore. The donor proposes to call the institution after the name of his father, the late Babu Ram Prosad Rudra Sirkar, and stipulates that if at any future time Government finds it necessary to close the institution, he and his heirs shall have the right to withdraw the invested funds from the custody of Government.

2. In reply, I am directed to say that the Lieutenant-Governor accepts the donation on the terms proposed; and I am to request that you will convey to the donor an expression of the Lieutenant-Governor's appreciation of his liberality and public spirit. The Inspector-General of Civil Hospitals will be requested to appoint a Civil Hospital Assistant of the third class to the charge of the dispensary as soon as it is established.

LIBERALITY OF SYED MAHDI HOSSAIN KHAN OF PATNA.

No. 2775, dated Calcutta, the 13th December 1891.

From—H. H. RISLEY, Esq., Offg. Secy. to the Govt. of Bengal, Municipal Dept.,
To—The Commissioner of the Patna Division.

I AM directed to acknowledge the receipt of your letter No. 39Ct., dated the 29th November 1891, in which you report that Syed Mohomed Mahdi Hossain Khan of Patna has made a most liberal donation of Rs. 10,000 to form the nucleus of a fund for the establishment of a Female Medical Hospital in that city, and to request that you will be so good as to convey to Syed Mohomed Mahdi Hossain Khan the thanks of the Lieutenant-Governor for his munificent gift. This letter will be published in the *Calcutta Gazette*.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 12th December, 1891.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.			
Burdwan Divn.			
1	Burdwan Dec. 12, '91 Culna ... Cutwa ... Raneegunge ...	Nil Nil Nil Nil	Weather—cool. Harvesting of *aman* going on. Prices of common rice:— Srs. Sudder ... ... 15 Cutwa ... ... 15 Culna ... ... 14 Raneegunge ... ... 15½ } per rupee.

No difficulty of obtaining fodder and water-supply. Prices of common rice:— Srs. Sudder ... ... 13 Serampore ... ... 13 Jehanabad ... ... 16 } per rupee.
6	Howrah ,, 12, '91 Uluberia ...	Nil Nil	Weather—fine. *Aman* being harvested; an average crop except on higher lands. Sugarcane good. Price of common rice 14 seers per rupee. Health of cattle satisfactory. Fodder and water-supply adequate.
Presidency Divn.			
7	24-Perghs. ,, 12, '91	Nil	Weather—seasonable. Harvesting of *aman* paddy in progress. Prospects unchanged. Cultivation of winter crops progressing fairly. Prices stationary. Condition of cattle good. Fodder and water sufficient.
8	Nuddea ,, 12, '91 Kushtea ... Meherpore ... Chuadanga ... Ranaghat ...	Nil Nil Nil Nil Nil	Weather—seasonable. Harvesting of *aman* nearly over; outturn poor. *Rabi* crops not doing well for want of rain. Common rice selling at from 11½ to 16 seers per rupee. Condition of cattle good, and supply of fodder and water sufficient.
9	Khoolna ,, 12 '91 Bagirhat .. Satkhira ...	Nil Nil Nil	Weather—cloudy in the morning and fairly cold. Harvesting of *aman* called *chhotas* has commenced. Prospects of *aman* in general fair. Price of common rice from 14 to 16 seers per rupee. Fodder and water sufficient.
10	Jessore ,, 12, '91 Jhenidah ... Magurah ... Narail ... Bongong ...	Nil Nil Nil Nil Nil	Weather—seasonable. Harvesting of *aman* paddy continues. Rain wanted for winter crops. Supply of water and fodder for cattle sufficient. No cattle-disease reported.
11	Murshedabad ,, 12, '91	Nil	Weather—cool and fine. Harvesting of winter rice going on. *Kalai* doing well. Prospects of *rabi* favourable. No want of fodder for cattle.
Chittagong Divn.			
12	Chittagong ,, 12, '91	Nil	Weather—unseasonably warm. *Aman* ripening. Harvesting commenced in places. Probable average outturn estimated at 12 annas. Cultivation of vegetable crops going on. Prices stationary. Condition of cattle generally good. Fodder sufficient.
13	Noakhally ,, 12, '91	Nil	Weather—days hot and nights cold. *Aman* is being harvested. *Rabi* crops coming up. Cattle-disease reported from Feni. Supply of fodder and water good.
14	Tipperah ,, 12, '91	Nil	Weather—seasonable. Prospects of crops fair. Fodder sufficient. No cattle-disease reported from any part of the district.
15	Chittagong Hill Tracts ,, 10, '91	Nil	Weather—unseasonable. Harvesting and gathering of paddy continue. Transplanting of cold-weather crops over. Price of common rice 11 seers 6 chittacks per rupee.

No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*				
Dacca Divn.				
16	Dacca	Dec. 12, '91	Nil	Weather—seasonable. Harvesting of *aman* going on. Prospects appear favourable. Fodder available. No cattle-disease. Common rice selling at from 15 to 18 seers per rupee.
17	Furreedpore Goalundo Madaripore	„ 12, '91	Nil Nil Nil	Weather—seasonable. Harvesting of *aman* in progress. Sowing of winter crops nearly finished. Condition of cattle good and fodder available. Rice selling at 16, 16½, and 15 seers per rupee at Sudder, Madaripore, and Goalundo respectively.
18	Backergunge	„ 12, '91	Nil	Weather—seasonable. Prospects of crops good in Perozepur and Patuakhali subdivisions, but poor in others. Common rice sells at from 10½ to 17 seers per rupee. Fodder and water sufficient. Cattle-pox reported from Bhandaria and Matbaria.
19	Mymensingh	„ 12, '91	Nil	Weather—moderately and occasionally cold. Harvesting of winter rice continues. General prospects of crops fair. State of cattle good. Fodder and water-supply sufficient. Common rice sells at 16 seers per rupee.
Rajshahye Divn.				
20	Dinagepore Thakurgaon	„ 12, '91 ...	Nil Nil	Weather—cool. Winter rice being harvested. Mustard and sugarcane doing well. Price of rice 11 seers per rupee at Sudder and stationary at Thakurgaon. Condition of cattle good. Supply of fodder and water sufficient.
21	Rajshahye Nattore Nowgong	„ 12, '91	Nil Nil Nil	Weather—seasonable. Prospects of *aman* remain unchanged. Harvesting going on. Condition of *rabi* good. Prospects of *ganja* favourable. Price of common rice varies from 12 to 18 seers per rupee. No cattle-disease. Fodder and water-supply sufficient.
22	Rungpore Nilphamari Gaibanda Kurigram	„ 12, '91	Nil Nil Nil Nil	Weather—seasonable. Harvesting of *aman* still going on. Land is being ploughed for *aus* and jute. Potato, mustard, and sugarcane promising. Rice is being sold at from 9 to 14 seers per rupee.
23	Bogra Sherpur Nowkhilla	„ 12, '91	Nil Nil Nil	Weather—seasonable. Harvesting of *aman* going on; outturn will not, as reported last week, exceed 8 annas. *Rabi* crops doing well. Price of rice almost stationary. Condition of cattle good. Fodder and water sufficient.
24	Pubna	„ 12, '91	Nil	Weather—cool. State and prospects of paddy unchanged. Reaping of *aman* paddy almost completed. *Chaitali* crops doing well. Price of common rice the same as before. Fodder and water sufficient.
25	Darjeeling	„ 12, '91	Nil	Weather—fair. Paddy is being reaped. Prospects of mustard and *kalai* good. Wheat and barley promising well. No disease among cattle. Fodder and water-supply sufficient. Prices of common rice:— Srs. Silliguri ... ... 11 ⎫ Phansidowa ... ... 9 Kurseong ... ... 10 Kalimpong ... ... 9 Darjeeling ... ... 9 ⎬ per rupee. Pulbazar ... ... 10 Joro Bungalow ... ... 10 Nagri ... ... 8 Sonadah ... ... 10 ⎭
26	Julpigoree	„ 12, '91	Nil	Weather—seasonable. Harvesting of *haimanti* paddy in full swing; outturn very poor. Prospects of tobacco and other winter crops favourable. Common rice sells at 10 seers per rupee at head-quarters and at 8 seers in Alipur subdivision. No cattle-disease. Fodder and water-supply sufficient.
BEHAR.				
Bhagulpore Divn.				
27	Monghyr Begusarai Jamui	„ 12, '91	Nil Nil Nil	Weather—nights getting cold. No change in prospect of winter rice. Harvesting has now begun in some places. Prospects of *rabi* fair in the Sudder subdivision and good in Begusarai, but owing to want of moisture only 8 annas has been sown in Jamui. Rain much wanted. Prices of rice 12 to 16 seers per rupee in Sudder, 11 seers in Begusarai, and 15 seers in Jamui. Supply of fodder and water at present sufficient.
28	Bhagulpore	„ 12, '91	Nil	Weather—seasonable. Harvesting of winter rice going on. Prospects of neither *rabi* nor rice show improvement. *Kurthi* reported fair. Fodder sufficient. Price of common rice 13 seers 14 chittacks per rupee.
29	Purneah Kishengunge Arrareah	„ 12, '91	Nil Nil Nil	Weather—cold. Has been very slightly cloudy; now settled looking. Harvesting of *aghani* still in progress. *Kurthi* being harvested. *Rabi* reported to be generally doing well, but rain will soon be urgently required for wheat and other *rabi* crops. Prices of rice:— Srs. Sudder ... ... 11½ ⎫ Arrareah ... ... 14 ⎬ per rupee. Kishengunge ... ... 11 ⎭ No cattle-disease. Fodder and water sufficient.
30	Maldah Chanchal Shibgunge Gajole	„ 12, '91	Nil Nil Nil Nil	Weather—seasonably cool. Harvesting of winter rice in progress; outturn estimated to be not less than 8 annas. *Kalai* pulse coming into maturity and other *rabi* crops thriving. Supply of fodder and water satisfactory. No cattle-disease. Coarse rice sells at 11 to 16 seers a rupee.
31	Sonthal Perghs.	„ 12, '91	Nil	Weather—seasonable. Harvesting of winter rice in full progress. Taking the district as a whole, the average outturn will be about ten annas. *Rabi* crops, as far as sown, need rain to improve them. Price of common rice 14½ seers per rupee at Rajmehal and 16 seers in the Sudder. Fodder and water-supply sufficient.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BEHAR—*concld.*			
PATNA DIVISION.			
32	Patna Dec. 12, '91 Barh ... Behar ... Dinapore ... Hilsa ...	Nil Nil Nil Nil Nil	Weather—cool and clear. Paddy still being harvested in places. *Rabi* sowings have been completed and seeds have germinated well. Poppy looks promising. Mustard and *rahar* flowering. Sugarcane being pressed. Rain wanted for standing crops. Prices of food-grains almost stationary.
33	Gya ,, 12, '91 Jehanabad ... Nawada ... Aurungabad ...	Nil Nil Nil Nil	Weather—cold with west winds. Harvesting of paddy going on. *Rabi* crops suffering for want of rain. Poppy crop in good condition. Prices almost the same. Supply of fodder and water for cattle yet sufficient.
34	Shahabad ,, 12, '91 Bhabuah ... Sasseram ... Buxar ...	Nil Nil Nil Nil	Weather—decidedly colder. Light west winds. *Rabi* crops doing well, but, as before stated, rain wanted. Paddy harvest practically over. Poppy growing up well. Sugarcane being pressed. Prices steady, but in Sasseram wheat and gram reported to be cheaper. Insufficiency of water for cattle reported from Bhabuah.
35	Durbhunga ,, 12, '91	Nil	Weather—seasonable. Rice in being harvested; 6-anna outturn of an average crop expected. *Rabi* wants rain badly and will not be more than an 8-anna crop. *Rahar* very good. Prices still continue almost stationary. Water and fodder for cattle plentiful.
36	Mozufferpore ,, 12, '91 Hajipore ... Sitamarhi ...	Nil Nil Nil	Weather—cool and bright. Harvesting of paddy in progress. *Rabi* crops on high and unirrigated lands withering for want of moisture; those on low and irrigated lands doing fairly well. Poppy has somewhat improved since the weather has become colder. Rain urgently wanted everywhere, especially for unirrigated poppy. Cattle in good condition. Fodder and water sufficient. Prices as below:— Common rice (new). / Marua. / Makai. (Srs.) Sudder ... 13 / ... / 21 per rupee. Sitamarhi ... 14 / 23 / 23 per rupee. Hajipore ... 14 / ... / 24 per rupee.
37	Sarun ,, 12, '91	Nil	Weather—colder at latter end of week. Paddy cutting going on, nearly finished in some parts. *Rabi* doing well. In Chupra poppy late owing to resowings. In Sewan poppy prospects good. Fodder and water sufficient. Prices of common rice:— (Srs. Ch.) Chupra ... ... 13 0 per rupee. Sewan ... ... 15 0 per rupee. Gopalgunge ... ... 14 6 per rupee.
38	Chumparun ,, 12, '91	Nil	Weather—cold. Harvesting of paddy in progress. Sowings of *rabi* and poppy completed. Young seedlings germinating fairly well. Rain would do much good. Prospects of both the crops continue fair. Supply of fodder and water sufficient.
ORISSA.			
ORISSA DIVN.			
39	Cuttack ,, 12, '91	Nil	Weather—seasonable. *Sarad* rice being reaped. *Rabi* crops in flower. Fodder-supply sufficient. Common rice sells at from 10 to 13 seers per rupee in the town and 19 to 21 seers in the muffussil. Condition of cattle good.
40	Pooree ,, 10, '91 Khurda ...	Nil Nil	Weather—cold. *Laghu* rice being harvested. *Sarad* rice ripening. *Dalua* rice being sown. Miscellaneous crops doing well. Common rice sells at from 12½ to 19 seers per rupee.
41	Balasore ,, 12, '91	Nil	Weather—seasonable. Harvesting of winter rice continues. Prospects of *rabi* crops good. Rice selling at Balasore 19 seers and at Bhadrak 20 seers per rupee.
CHOTA NAGPORE.			
South-West Frontier Agency.			
CHOTA NAGPORE DIVN.			
42	Hazaribagh Dec. 12, '91 Giridih ...	Nil Nil	Weather—bright and clear. Harvesting of paddy practically completed; outturn about 12 annas, taking the whole district together. Rain urgently wanted for *rabi* crops. Poppy doing fairly. Common rice selling at from 14 to 19 seers per rupee. Water and fodder-supply sufficient.
43	Lohardugga ,, 12, '91 Palamow (up to 7th Dec.)	Nil Nil	Weather—cold. Harvesting of winter rice continues. Rain badly wanted for *rabi* crops. Common rice selling at 15 seers per rupee. Ample fodder for cattle.
44	Singbhoom ,, 12, '91	Nil	Weather—seasonable. Paddy being harvested with full outturn. Cold-weather crops doing well. Price of rice 20 to 32 seers per rupee.
45	Manbhoom ,, 12, '91 Govindpore ..	Nil Nil	Weather—seasonable. Prospects of crops continue good. Rice selling at from 18 to 21 seers per rupee. Fodder and water-supply satisfactory.

Published for general information.

CALCUTTA; REVENUE DEPT.,

* Mean of 5 days.

Explanation.—*Summary.*—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 12th of December 1891.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	DISTRICT OBSERVATIONS. Rainfall. Of week. Mean for district.	Normal mean.	Since 1st of month. Mean for district.	Normal mean.	Variation.	Since 16th October 1891. Mean for district.	Normal mean.	Variation.	Of week. Average number of rainy days.	Normal number of rainy days.	Representative station.	District.	Meteorological Division.

Explanation.—......indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the 15th December* 1891.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 12TH OF DECEMBER 1891.

CONDITIONS at the close of the previous week had become fairly normal for the cold weather, both in Bengal and over the Bay, and during the present week the meteorological changes which have occurred, though they have been small and unimportant, have been practically all in the direction of the further development of north-east monsoon conditions. On the 6th the barometer was rising by about 0·03 inch, and the general pressure had become above the normal by about the same amount. Temperature was falling slowly but the mean temperature was still higher than usual by amounts ranging up to about 5°. A steady northerly wind current was blowing over the whole of the province; the sky was nearly cloudless and absolutely no rain was reported. On the 7th pressure had again risen by one or two hundredths of an inch, and temperature had fallen slowly at the majority of stations, but it was still rather largely above the normal, while the other conditions remained practically unchanged. On the 8th a slight fall of pressure had set in, but temperature continued to fall slowly. Cloud proportion had increased rather rapidly on this day, and the sky was generally moderately to rather heavily clouded, while humidity had increased decidedly at many stations, but no rain was reported. This increase in the amount of cloud and slight change in the general conditions may perhaps have been connected with the commencement of a barometric depression in the south-west of the Bay, the existence of which was distinctly shown on the morning of the 9th. In Bengal on this day pressure had again fallen moderately, generally by about 0·03" or 0·04": temperature also still continued to fall, though cloud proportion and humidity remained rather high, but again there was no rain. The depression in the south-west of the Bay advanced on the 9th in a westerly direction, and passed partly over the south of the peninsula and partly over Ceylon, perhaps also filling up in its advance, and on the 10th very heavy rain was reported in the south of the peninsula. Conditions in Bengal then began to become more settled, and the sky cleared rapidly on the 10th and became almost cloudless. Humidity also fell very rapidly, and the air became decidedly dry, the northerly winds blowing over the province generally strengthened, pressure rose slowly and temperature fell moderately to rapidly, and the mean temperature over the province became nearly normal, while in Behar there was a considerable defect. On the 11th pressure continued to rise moderately and became about a twentieth of an inch in excess of the normal. Temperature also fell rather briskly and was below the normal at the western and southern stations, though it was still slightly above it in North Bengal. On the 12th pressure had again risen slowly in Bengal, and had become about 0·06 inch to 0·08 inch above the normal, but the barometer had fallen moderately to briskly in the south-west corner of the Bay, and another barometric depression appeared to have formed over this area on that day. Again the sky became a little clouded in Bengal and temperature commenced to rise at many stations, so that at the close of the week the mean temperature was very nearly normal over the province generally, except, perhaps, in North Bengal, where there was a distinct excess of about one or two degrees. No rain, however, fell, and throughout the week fine weather obtained over the whole province.

Pressure.—The mean pressure for the week has been in excess of the normal in all districts; the usual excess has been from 0·05 inch to 0·06 inch, but the excess has been generally largest at the western stations where it is about 0·07 inch and smallest in East and South-East Bengal where it has equalled about 0·04 inch.

Temperature—Has been in excess of the normal in all districts, the usual excess being from one to two-and-a-half degrees. This excess has been largest in East and North Bengal and smallest in Chutia Nagpur and Orissa. The variation of the mean temperature of the province from the normal for the whole week has been an excess of 1·5°

This variation of temperature is, however, most clearly seen in the table below where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. In this table it will be seen that the principal variations have occurred in the day or maximum temperatures, while the night or minimum temperatures have been more nearly normal.

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 12th December 1891.

	Normal mean maximum temperature for the week ending 12th December.	Actual mean maximum temperature for the week ending 12th December 1891.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 12th December.	Actual mean minimum temperature for the week ending 12th December 1891.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 12th December.	Actual mean daily temperature for the week ending 12th December 1891.	Variation of actual mean from the normal.

The average fall of the corresponding period for 24 years, S.-G.'s Office ...	0·03
The total fall from 1st January to 12th December 1891	46·93
The average fall of the corresponding period for 24 years, S.-G.'s Office ...	65·22

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

⌓, dew; ≡, fog.

Decrease.

	Tons.
Coal	1,577
This is due to less import owing to bad season for failure of cocoons.	
Cotton piece-goods	62
Imported by steamer plying between Calcutta and Azimganj.	
Grains—	
(2) Rice	19
Due to less export on account of local rate being high.	
(4) Others	94
This is due to falling off in roher and khasari colie owing to less demand.	
Jute—	
(1) Raw	19
Carried by steamer.	
Railway plant and rolling-stock	52
Due to less renewals.	
Salt	25
Due to less import to intermediate stations.	
Sugar—	
(2) Undrained	26
Less imported due to less demand.	

R. G. Mookerjee,
Manager, Nalhati State Railway.

BENGAL VETERINARY INSTITUTION.

REVENUE DEPARTMENT—AGRICULTURE.

Calcutta, the 22nd December, 1891.

RESOLUTION No. 3886Agri.

PROPOSALS for the establishment of a Veterinary School and Hospital in the vicinity of Calcutta have for some time been under the consideration of the Government of Bengal.* The objects which Government have in view in establishing such an institution are the amelioration of the condition of animals, the investigation and treatment of cattle-disease, and the cultivation of veterinary science by means of instruction in connection with the treatment of diseased and injured animals. When the hospital has been constructed and the arrangements of the institution are in working order, it will be open to the drivers of hackney carriages and bullock carts to take their sick and sore animals there for treatment in accordance with such rules as the Committee of management may frame hereafter, on the lines of the arrangements made in Bombay with the Bombay Society for the Prevention of Cruelty to Animals, as suggested by Sir Dinshaw Manockjee Petit, or as may be otherwise determined.

2. It was at first proposed that the school and hospital should be located on part of the grounds occupied by the Pinjrapole Committee at the Sodepur

station of the Eastern Bengal State Railway, ten miles from Calcutta, the Pinjrapole Committee having offered to make a free gift of a portion of them and to contribute Rs. 30,000 to the construction of the necessary buildings. The Committee having since withdrawn their offer, Babu Sheo Baksh Bagla has very generously subscribed and paid to Government Rs. 30,000 in aid of the project, and has also offered (*a*) to give, free of cost, 3½ bighas of land and tank at Belgachia on the Belgachia–Dum-Dum road; (*b*) to make over, on payment, four more bighas required for the whole scheme, the entire area of 7¼ bighas making one compact block with a road-frontage of about 270 feet from east to west, and a depth of 400 feet; and (*c*) not to charge anything for the house, the value of which he states at Rs. 2,500, standing within the area of the 7¼ bighas. As soon as he has completed his transactions for the purchase of the land, Government will issue a declaration, under Act X of 1870, for the acquisition of the whole 7¼ bighas, so that the title of Government to the land may be hereafter secure.

3. Sir Dinshaw Manockjee Petit, of Bombay, has also promised a donation of Rs. 25,000 for the establishment of the proposed hospital.

4. The Lieutenant-Governor desires to thank both these gentlemen for their liberality and public spirit. His Honour is quite willing to meet their wishes in regard to the naming of the contemplated Veterinary Institution as far as he can, and has accordingly decided that it should as a whole be called "The Bengal Veterinary Institution," and the parts thereof (1) "The Kenneth MacLeod Veterinary School," Babu Sheo Baksh Bagla being anxious to commemorate in this way Dr. K. MacLeod's labours in the cause of veterinary science, and (2) "The Sir Dinshaw Manockjee Petit Veterinary Hospital," and that a tablet should be put up with an inscription stating the objects of the Institution and connecting with it the names of the gentlemen above mentioned.

5. The Lieutenant-Governor has been pleased to appoint a Committee, consisting of the following members, to complete the organization of the proposed school and hospital, and for their management when established:—

1. Mr. M. Finucane, Director of the Department of Land Records and Agriculture, Bengal.
2. Babu Sheo Baksh Bagla.
3. Mr. W. B. Gwyther, Executive Engineer—to be also Secretary.

Sir Charles Elliott has inspected the site referred to above, and it appears to him to be conveniently situated, near to but not within Calcutta, and suitable and sufficient for the purposes for which it is required. Mr. Gwyther has drawn out a rough sketch of the buildings, which has been submitted for the opinion of Mr. J. H. B. Hallen, General Superintendent, Horse Breeding Department in India, as to their suitability, their arrangement, &c. As soon as the general plan of the buildings required has been settled, the Committee will have plans and estimates of cost properly prepared and submitted for the approval of Government.

ORDER.—Ordered that copies of the foregoing Resolution be communicated to Mr. Finucane, Mr. Gwyther, Baboo Sheo Baksh Bagla, and Sir Dinshaw Manockjee Petit, for information.

Ordered also that the Resolution be published in the *Calcutta Gazette.*

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF MUNICIPALITIES IN BENGAL DURING 1890-91.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Calcutta, the 18th December 1891.

RESOLUTION No. 2896.

READ—

The reports from the several Commissioners of Divisions on the working of the Municipalities in Bengal (except Calcutta) during the year 1890-91.

Read again—

The Resolution reviewing the divisional reports on the working of Municipalities during the year 1889-90.

The following Resolution reviews the reports submitted by Commissioners of Divisions on the working of municipalities during the year 1890-91.

2. *Number of Municipalities.*—The total number of municipalities in existence at the close of the year was 145 against 147 in the preceding year, the Khagoul and Gurwah Municipalities having been abolished during the year. The statement in Appendix A shows the date of establishment of each municipality in the province, the population within municipal limits, and the actual number of rate-payers in each. The average proportion of rate-payers to the whole population within Municipal limits was 17·67 per cent. against 17·9 in the previous year. The decrease is due to the higher population figures of the recent census which have been used in the statements of the majority of municipalities. In many cases, however, the figures of the census of 1881 have been given either for whole divisions or for isolated municipalities, and it is therefore impossible to review the general results of the census in this Resolution.

3. *Elective System.*—The system under which two-thirds of the total number of Commissioners fixed for each municipality are elected by the rate-payers was in force in all the municipalities except the twenty-eight named below:—

Bettiah.	Debhatta.	Lalgunge.
Chanduria.	Jajpore.	Lohardugga.
Chogda	Jamui.	Nalchitty.
Chyebassa.	Jehanabad.	Netrokona.
Colgong.	Jhalda.	Perozepore.
Cox's Bazar.	Jhalokati.	Raghunathpore.
Daltongunge.	Julpigoree.	Roserah.
Darjeeling.	Kendrapara.	Sitamarhi.
Daudnugger.	Khoolna.	Sonamukhi.
	Tikari.	

4. *Results of elections held during the year.*—The third general election of Commissioners under Act III (B.C.) of 1884 took place during the year on the expiry of the term of office of those elected in 1887. Elections were held in 113 Municipalities, and in the great majority of cases were contested with some spirit. The figures given are not altogether complete, as in some cases votes were not counted, and in others the results have not been reported; but in the Municipalities for which figures are forthcoming, the percentage of registered voters who actually gave their votes was 39·4 against 33·8 in the general elections of 1887.

This increase in the number of persons who actually voted may be regarded as a sign of progress, but the Lieutenant-Governor notices that in many towns the proportion of voters who appeared at the polls was so small as to deprive the elections of all value as a test of public feeling, and several local officers report that even where considerable excitement was aroused by the elections, these were fought on purely personal grounds and without any

trace of intelligent public feeling. The best attendance of voters was at Birnagore in the Nuddea district, where 361 voters out of a total electorate of 373, or 96·7 per cent. of the whole voting power of the Municipality, were present at the polls: at Serajgunge out of 664 registered voters 600, or 90·3 per cent., actually gave their votes. The Commissioner of the Presidency Division reports that interest in the elections is confined to the lower middle class, the upper and higher middle classes standing aloof, while in some cases the votes of the lower class of electors were obtained by improper influence. The Lieutenant-Governor has reason to believe that this account of the state of affairs is not altogether exaggerated. The remedy seems to lie in raising the standard of electoral qualification—a question which is separately receiving His Honour's consideration in connexion with the amendment of the Municipal Act. There were several cases of disputed elections, but in no case were the objections raised sufficient to invalidate the proceedings. At Serampore, by an error in counting, the candidate who had obtained the smaller number of votes was declared elected. The Advocate-General having held that nothing could invalidate this declaration, the opposing candidate was appointed to the Municipal Board as a nominee of Government.

5. The chief point calling for notice which arose from the general elections was the question of the status of the Municipal body between the time of the elections and that of the appointment of the fresh body of Government nominees. Under the present law it would seem that the old body of Commissioners ceases to have a corporate existence as soon as the elections are declared, while the new body is not complete until the Government appointments have been notified, and the consequence has frequently been a more or less prolonged suspension of the Municipal business. It has also been brought to the Lieutenant-Governor's notice that the present practice of holding the general elections in the cold weather, which is the time at which Municipal works should be carried out, is prejudicial to the public interests. These questions are being separately considered by His Honour.

6. The following statement shows, Division by Division, the constitution of the Committees of the various municipalities at the close of the year:—

Division.	Nominated.	Elected.	Total.	Europeans.	Natives.	Government servants.	Zemindars or other land-holders.	Pleaders and mukhtears.	Planters.	Merchants, traders and money-lenders.	Medical practitioners.	School-masters (other than Government servants).	Government pensioners.	Unspecified.

In January last the Commissioners of Divisions were asked to furnish in their Annual Reports detailed information regarding the profession or occupation of the gentlemen serving as Commissioners of Municipalities. The information was, however, omitted in several of the Divisional Reports and had to be obtained by subsequent reference, while the totals of figures furnished in many cases do not agree with those entered in Form No. I. The Lieutenant-Governor hopes that in future the required information on this head may be correctly given in the Annual Reports. The following table compares the percentages of

officials and Europeans respectively on the total number of Commissioners during 1890-91 with the corresponding percentages of the previous year, and with the average of the five years 1884-85 to 1888-89:—

	Officials.	Europeans.
Average percentage for the years 1884-85 to 1888-89	16·4	9·9
1889-90	16·1	9·9
1890-91	17·5	8·2

7. *Attendance at meetings.*—The largest number of meetings during the year in any municipality was 35, held by the Municipal Commissioners of Cutwa. In each of the following 22 municipalities the number of meetings exceeded 20:—

DISTRICT.	Name of Municipality.	Number of meetings.	Average percentage of attendance.
Burdwan ...	Cutwa ...	35	48·3
	Burdwan ...	34	53·6
Maldah .	English Bazar . .	31	21·2
Hooghly ...	Serampore ...	27	59·4

Mymensingh ...	Kisoregunge ...	21	46 6
Moorshedabad ...	Jungipore ...	21	38·1
Jessore ...	Jessore ...	21	38 0

On the other hand, in the Utterpara and Barh Municipalities only three meetings were held, and only four each in Kotrung, Cox's Bazar, and Jugdispore, while in no less than 48 municipalities the number of meetings was less than 12. Section 38 of the Act provides that the Commissioners of a municipality shall meet at least once every month for the transaction of business (if there be any business to transact), and the Lieutenant-Governor cannot believe that in any

municipality less than twelve meetings is compatible with a proper performance of their duties by the Commissioners. During the year 1889-90 more than 20 meetings were held in 27 municipalities, and in only 26 were there less than twelve: there has therefore been a great falling off, which though possibly due in some measure to the suspension of municipal business on account of the elections, cannot be regarded as satisfactory.

In 83 municipalities as against 82 in 1889-90, the average attendance of Commissioners at the meetings exceeded 50 per cent. It is probable that these figures also were unfavourably affected by the apathy produced by the near approach of the elections, but the Lieutenant-Governor does not consider that any circumstances can justify an average attendance of less than half the members of the Committee, and he hopes to see an improvement in this respect on the part of the Commissioners newly elected and appointed.

Sir Charles Elliott regrets to observe that the Magistrate of Maldah reports that while the elected Commissioners gave much time and trouble to their duties, the Commissioners nominated by Government displayed no interest in municipal affairs. If this state of things continues, the Magistrate should call upon these gentlemen to resign their offices and nominate more energetic representatives of Government.

8. *Ward Committees.*—The Lieutenant-Governor is disappointed to find that ward committees have been appointed in only 12 municipalities, and that in only one of these, Rampore Beauleah, are they said to have done any useful work, while in Patna the ward committees are alleged to have made such bad use of the powers conferred upon them, that these powers have been withdrawn by the Municipality. In His Honour's opinion ward committees should be the mainstay of municipal administration by helping the executive in the many matters that require local information and cannot be decided by the Commissioners at a meeting, and in relieving the Chairmen and Vice-Chairmen of many of the executive functions which they have not the time or the special knowledge to carry out properly. Care must at the same time be taken that no functions are delegated to ward committees which can be better exercised by the Chairman as the executive head of the entire body of Commissioners.

9. The Municipal Benches in the Province tried 19,668 cases of nuisance and breach of conservancy rules in which 17,689 persons were convicted against 16,604 cases and 14,730 persons convicted in the previous year. The average amount of fines inflicted on each offender varied from Rs. 6-12-4 in the Daudnagar Municipality in the Patna Division down to Re 0-2-9 in the Dainhat Municipality in the district of Burdwan. The following statement shows the work done in detail:—

10. *Assessments.*—The statement in Appendix D shows the mode of assessment prevailing in each municipality in the province, the rate at which the tax on holdings or on persons according to their circumstances and property within municipal limits was levied, and the result of any revision of assessment made during the year. The tax on holdings was in force in 36 municipalities* as in the previous year, and was levied at rates below the maximum (ordinarily 7½

(a) Includes outstanding fines of the previous year.

per cent. per annum on the annual value of holdings) in the following 12 towns against 13 in the previous year:—

Name of Division.	Name of Municipality.	Rate of tax.	
Burdwan ...	Hooghly and Chinsurah ...	6¼	
Presidency ...	Krishnaghur ...	6	
	Ranaghat ...	6¼	
	Santipore ...	6¼	
Rajshahye ...	Darjeeling ...	7	The legal maximum in these municipalities is 10 per cent.
Dacca ...	Dacca ...	8	
	Naraingunge ...	6	
Bhagulpore ...	Monghyr ...	6¼	
	Jamalpore ...	7	
	Bhagulpore ...	5	
	Purneah ...	6	
	Sahebgunge ...	5	

Out of the twelve municipalities named above, seven are the head-quarters stations of important districts, and the inhabitants may be supposed to be well able to bear the maximum rate of taxation leviable under the law. As long as the Municipal Commissioners of thriving towns so far neglect the means ready to hand of raising the funds required for much needed improvements, the Lieutenant-Governor cannot admit the plea of financial inability so often put forward as an excuse for inaction in the most important duties of a Municipal Committee. It is satisfactory to find, however, that the rate was raised in Monghyr from 6 to 6¼ per cent., in Sahebgunge from 3¾ to 5 per cent., and in Sewan from 7 to 7½ per cent., and the Lieutenant-Governor trusts that the other municipalities will follow this good example. The incidence of municipal taxation per head of population in the several Divisions was as follows:—

Division.	Incidence of Taxation.						Remarks.
	Maximum.		Minimum.		Average.

A general or partial revision of assessment was undertaken in several municipalities, and among those in which it was completed and brought into force during the year, the revision resulted in an increase of income in 39 and a loss in 11 municipalities. In some cases the operations were not completed during the year, and in others it was proposed to enforce the new assessments with effect from 1st April 1891. The largest increase of income accrued to the Municipalities of Gya (Rs. 4,000), Durbhunga (Rs. 3,212, out of an expected increase of Rs. 6,000), Burrisaul (Rs. 2,683), Sahebgunge (Rs. 1,400), Manicktolla (Rs. 1,324), and Berhampore (Rs. 1,300). The average incidence of municipal taxation throughout Bengal (excluding Calcutta) was annas eleven and pie eleven as in the previous year, and in 72 municipalities (none in the Rajshahye Division) the incidence amounted to 8 annas or less per head against 67 in the preceding year. The subject of municipal assessment and its periodical revision is at present separately under the consideration of Government, and it is needless to review it at any length in this Resolution.

11. *Demands, collections and outstandings on account of taxes.*—The attention of Municipal Commissioners has been frequently drawn to the necessity for realising taxes promptly and for arranging the collections on such a system as shall guard against the accrual of long-standing arrears, and shall protect the Municipalities against loss from embezzlement by the collecting agency. In order to secure this object definite instructions were laid down during the year in the shape of rules forming an appendix to the general rules for keeping

Municipal accounts. One of these rules requires Municipalities to submit every year, in the month of June, a taxation report through the Magistrate of the district to the Commissioner of the Division in the form of a combined progress statement for the Municipality, and if there are outstandings extending further back than the first quarter of the previous year, to furnish a full explanation why these taxes have not been either collected or remitted. The Commissioner of the Division is to submit these explanations to Government for orders with his remarks. In the Divisional Reports now under review, the information given under these heads is not sufficiently complete to enable any general figures to be prepared. From figures furnished by the Commissioners of the Burdwan, Rajshahye, and Chittagong Divisions, it appears that the realizations in those Divisions amounted respectively to 76·4, 90·9, and 73·7 per cent. of the nett demand, and the remissions to 2·6, 3·6, and 2·7 per cent., after deduction of remissions for the year. The Commissioner of Burdwan reports that in the Baidyabati Municipality the remissions granted amounted to 19·5 per cent. of the total demand. The Commissioner has already called for an explanation of these figures, and the explanation when received should be submitted to Government. From the reports received it would appear that the collection of taxes is hardly in a more satisfactory condition than the assessments. The Commissioner of Burdwan reports that in the Hooghly and Chinsura, and Midnapore Municipalities there are arrears of five and six years' standing, and the Commissioner of Chittagong observes that in the Chittagong Municipality arrears as far back as 1882 are still unrealized, and that it is stated that the Municipality has of late years lost from Rs. 600 to Rs. 1,000 yearly, owing to want of supervision over the tax-collecting department. The lack of real control over the collection of taxes is shown in many municipalities by the excuses put forward for insufficient realizations during the year, such, for instance, as that the time of the tax-darogahs was taken up by duties in connection with the elections or the census, or that the tax-collector was on leave or under suspension. The Lieutenant-Governor hopes that the rule referred to above will effect an improvement in this department, and that the next Annual Reports will contain a more satisfactory account of the administration of the tax-collecting branch of Municipal business. The work of constantly supervising and checking the operation of the collecting staff devolves more especially upon the Vice-Chairman, whose duties are laid down in the account rules, and the Lieutenant-Governor will look to these gentlemen to see that in future the routine of collecting current and arrear demands is arranged on an intelligent system in the first instance, that that system is carefully followed, and that the instructions issued by the local auditor for dealing with old arrears are fully carried out. The Vice-Chairman of a Municipality may fairly be expected to devote as much care and attention to the supervision of the Municipal finances as he would give to his own affairs, and if he cannot find time to look after the accounts properly, it is his duty to resign his post to some one with more leisure to attend to the details of one of the most important branches of Municipal business. From the taxation reports separately submitted by the Commissioners of the Patna and Orissa Divisions, in accordance with the rule mentioned above, it appears that the Municipal Commissioners are carefully carrying out the instructions therein laid down, and it may be hoped that heavy arrears will not be allowed to accumulate in the future. The Lieutenant-Governor notices with satisfaction that in the small Municipality of Kendrapara in the Orissa Division there was no arrear for the year under review, and that in Balasore and Bhabooah there were only very small outstandings, and those were due only for the third and fourth quarters of the year, and were in course of collection.

12. *Fresh imposts levied during the year.*—Sanction was given to the levy of a tax on horses and elephants in the Tangail Municipality, and to the imposition of a fee on the registration of the carts kept or habitually used within the Municipalities of Kishoregunge, Ranchi, Lohardugga and Purulia. Sanction was also accorded to the levy by the Commissioners of the Cutwa, Soory, Khulna, Kishoregunge and Berhampore Municipalities of fees for the cleansing of private latrines within the respective municipalities. It is, however, reported that there is a general dislike on the part of Municipal Commissioners to anything of the nature of increased taxation.

13. *Extension of various provisions of the Municipal Act and Bye-laws sanctioned during the year.*—The conservancy and other provisions of Part VI of the Act, or portions of them, were extended during the year to Ghattal, Kharar, and Kandi Municipalities.

Part IX of the Act, which regulates the construction and cleansing of latrines, was extended to the Municipalities of Cutwa, Soory, Khulna, Kishoregunge, Berhampore, and parts of Burdwan. Although these provisions were extended to Bankura in 1889, no action, it is reported, has yet been taken by the Commissioners in the matter. The reasons why the provisions are not being actually enforced in the town are not explained, and the Commissioner of Burdwan will be asked to submit a report on the subject.

Part X, which contains provisions for the regulation of markets, was extended to Julpigoree; but the Commissioners have kept its operation in abeyance for the present.

Bye-laws were framed under section 350 of the Act by the Commissioners of the following municipalities, and were confirmed by Government:—

Ghattal.	Daltongunge.	Durbhunga.
Joynagore.	Darjeeling.	Soory.

14. *Revision of Municipal boundaries.*—In the Burdwan Division the boundaries of the Raneegunge Municipality were revised so as to include two adjoining villages in the municipal limits. A portion of the town of Jungipore in Moorshedabad having been washed away by the river on which it stands, the boundaries were extended so as to include two villages within the Municipality. A case has recently come to the Lieutenant-Governor's notice; in which it was found that a village which had been recommended by the Municipal Commissioners of the Debhatta Municipality and by the local officers for inclusion within that municipality contained a population which was more than three-fourths agricultural, and that the proposal could not therefore, under the terms of section 11 of the Act, be lawfully entertained. His Honour has reason to believe that Municipal Committees are not always sufficiently careful, when recommending the extension of the Act to outlying villages, to assure themselves that the conditions laid down by the law are fulfilled, and desires that in future local officers will not forward such proposals without first satisfying themselves on this point. As the law at present stands, no village which has been included within municipal limits can be withdrawn from the operation of the Act except on the recommendation of the Commissioners at a meeting.

15. *Income and expenditure.*—The following table compares the opening balances, income, expenditure and closing balances of municipalities, Division by Division, for the year 1890-91, with those of the preceding year:—

Division.	Opening balance.		Income during the year.		Total funds available for expenditure.		Total expenditure.		Closing balance.	
	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.	1889-90.	1890-91.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

Orissa ...	1,868	3,635	6,786	86,320	88,654	89,955	85,019	84,565	3,635	5,390
Chota Nagpore ...	10,643	11,220	63,519	64,409	74,162	75,629	63,127	61,339	11,035	14,290
Total ...	3,46,402	3,18,262	26,47,502	28,24,204	29,93,904	31,42,466	26,77,511	27,81,524	3,16,393	3,60,942

There is a total discrepancy of Rs. 1,869 between the opening balance of 1890-91 and the closing balance of the previous year. This is due mainly to the accounts of the Ramjibunpore Municipality, which show a difference of Rs. 1,550 owing to the fact that the sum of Rs. 1,500 invested in Government securities and Rs. 50 paid as advance on account of departmental work

during the previous year was added to the opening balance of the year under review. The other small discrepancies have been explained by the local officers. In many municipalities the closing balance seems to be unduly large, in view of the admitted need of sanitary and other works and the plea of poverty which is constantly put forward as an excuse for delay in undertaking them.

16. *Income.*—From the above table it will be seen that there was a total increase in the income of municipalities in Bengal of Rs. 1,76,702. Nearly a lakh of this, however, accrued under debt heads, including loans, deposits, advances and sinking fund payments, which amounted to Rs. 2,88,144 against Rs. 1,87,051 of the previous year. The income from taxation proper is compared, Division by Division, with that of the previous year in the table below:—

Year.	Name of Division.									
	Burdwan.	Presidency.	Rajshahye.	Dacca.	Chittagong.	Patna.	Bhagulpore.	Orissa.	Chota Nagpore	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.

Chota Nagpore ...	+8,003	—352	+7,651	

The Lieutenant-Governor notices with satisfaction the continued progress shown by the municipalities in the Burdwan, Rajshahye, and Orissa Divisions. As regards the Patna Division, which last year showed the largest increase of income under this head, the Commissioner reports that the decrease occurs in the districts of Patna, Shahabad, Durbhunga and Chumparun, but chiefly in the first two districts. In the Patna Municipality there is a noticeable decrease under the head "House-tax" and "Latrine-tax," said to be due to an increase in the number of appeals and applications for exemption and revision of assessment and delays in disposing of them on the part of the Appeal Sub-Committee, to the prevalence of sickness in the town, and to the employment of tax-collectors in the late general elections and again on census

work. The last-mentioned reason applies equally to almost all the municipalities, and as already remarked in paragraph 10, the Lieutenant-Governor cannot admit it as a valid excuse for the neglect of the most elementary duties of municipal administration. The employment of municipal servants in connection with the general elections would seem to require explanation. In Dacca there has been a large falling off in the income from taxation during both the years, and here the fault seems to lie in the assessments, a point which has already been discussed, and which His Honour considers to be one of the vital questions of municipal government. No explanation is furnished by the Commissioner of Bhagulpore of the decline in the income from taxation in his Division. The Lieutenant-Governor desires that in comparing the income of municipalities during the year with that for the previous year, the income from taxation proper should always be separated from that from miscellaneous sources, and any appreciable fluctuations explained in the Commissioners' reports.

17. The statement in Appendix E shows the details of income under each head, Division by Division, as compared with that of 1889-90. The total receipts from the municipalities show an increase under the following heads:—

Heads of Revenue.		Amount of increase.
Taxation—		Rs.
Conservancy cess		47,519
Tax on houses and lands		4,778
Water tax		1,947
Tax on carriages and animals		13,331
Tolls on roads and at ferries		2,785
Total Taxation ...		70,360
Miscellaneous		19,560
Debt—		
Loans	79,000	
Deposits and advances ...	22,093	
		1,01,093
Total ...		1,91,013

On the other hand, there was a decrease under the following heads:—

Heads of Revenue.	Amount of decrease.
Taxation—	Rs.
License on trades	3,209
Tax on persons according to their circumstances and property	9,879
Fees on musical processions	1,223
Total ...	14,311

18. *Conservancy Cess.*—The increase in the receipts occurred chiefly in the Burdwan, Presidency, and Rajshahye Divisions. There was a large increase of income, as compared with 1889-90, of Rs. 16,937 in Howrah, Rs. 3,474 in Serampore, Rs. 2,710 in Maniktolla, Rs. 2,182 in Baranagore, and Rs. 2,124 in the South Suburban Municipality. The increase was due in Serampore partly to the enforcement for the first time of the provisions of Part IX of the Act in certain portions of the town, and in other places to increase in demands on account of new assessments and collections of arrears. The tax was levied for the first time in the Municipalities named in the margin,* and brought an accession of income as noted against the name of each.

	Amount of tax realized.
	Rs.
*Bally	1,083
Ranigunge ...	1,009
Soory	1,697
Khoolna	2,814
Berhampore ...	9,984
Dinagepore ...	4,045
Motihari	816

The Municipalities of the Presidency Division all show an increase of income under this head, with the exception of Krishnaghur and Jessore, where the decrease was only nominal, whilst those in the Dacca Division show a falling off (except Barisal, where there was an increase of Rs. 771). In the Municipality of Dacca there was a large falling off of Rs. 4,339 attributed to the collections of the previous year having included a large arrear, and to the employment of tax collectors on census work.

In Patna the income derived from this source has fallen from Rs 12,421 in 1887-88 to Rs. 8,992 in the past year. The tax is in force only in two wards of the city, and in these its proceeds have been continually reduced in consequence of the Commissioners exempting from tax houses which have no privies. The result has been that a constant abolition of privies has been going on ever since, and collections have been interfered with by the increasing number of applications for exemption. At a recent meeting the Municipal Commissioners of Patna resolved, in accordance with the opinion of the Advocate-General given on the corresponding section of the Latrines Act, VI (B C.) of 1878, to levy latrine tax on all premises on which house tax is levied Measures will be taken when the Municipal Act is amended to remove any uncertainty that may exist on this point.

19. *Tax on houses and lands.*—There was an increase under this head as compared with the previous year in the Divisions of Burdwan (Rs. 8,036), Presidency (Rs. 10,353), and Chittagong (Rs. 5,076), whilst there was a falling off of Rs. 6,553 in the Dacca Division, Rs. 8,725 in Patna, and Rs. 3,957 in the Bhagulpore Division. Although the figures against Burdwan show an increase in the aggregate, the increase was actually shared by the municipalities of Howrah (Rs. 11,565), and Bally (Rs. 1,218), whilst in the rest of the municipalities in the Division, where the tax is levied, the revenue fell off. In the Presidency Division the three Municipalities of Cossipore-Chitpore, Maniktolla, and South Suburbs show an increase of Rs. 2,829, Rs. 7,678, and Rs. 2,903 respectively, whilst all the rest show a small falling off of revenue. In the Chittagong Municipality the income rose from Rs. 7,804 in 1889-90 to Rs. 12,862 in 1890-91. The municipalities named in the margin show a large falling off of income. In the case of Patna there can be little doubt that the town is greatly under-assessed. The system under which appeals against assessment were received and disposed of by Ward Committees was distinctly adverse to sound assessment, and it is stated that at the elections of December 1890 several Commissioners sought election on pledges to reduce taxation. The assessment of some portions of the town was revised during the past year, but the revision did not add to the Municipal income, as in almost all cases where the valuation was raised the Appeal Sub-Committee reduced it. The decrease of Rs. 5,530 in Dacca is attributed to the same causes that were mentioned in the last paragraph as having affected the collections of conservancy cess. Although there are no Ward Committees, the Ward Commissioners make assessments, and the existing valuation is believed to be very unequal.

Name of Municipality.	Amount of decrease. Rs.
Dacca	5,529
Patna	6,264
Jamalpore (Monghyr) ...	3,223
Hooghly and Chinsurah	1,933
Serampore	1,158

20. *Water-rates.*—Water-rates were levied only in Burdwan and Darjeeling, as in the previous year. There was an increase of Rs. 1,705 in Burdwan and a small increase of Rs. 242 in Darjeeling. The increase in Burdwan was due to the raising of the rate from 4½ per cent. to 5 per cent. on the annual value of holdings. No water-rate was levied at Bhagulpore, but the town has been assessed for a water-rate during the current year.

21. *Tax on carriages and animals.*—There was an appreciable increase of income in the Municipalities of Patna (Rs. 3,807), Baidyabati (Rs. 1,943), Maniktolla (Rs. 1,692), Midnapore (Rs. 1,410), Howrah (Rs. 1,334), South Suburbs (Rs. 1,184), and Cossipore (Rs. 1,074), whilst there was a falling off of Rs. 1,095 in Baranagore. All the Municipalities in the Bhagulpore Division show a decrease of income under this head.

22. *Tolls on roads and at ferries.*—As was observed in the Resolution on the Reports of 1889-90, no tolls are levied on any roads in Bengal, and this heading,

therefore, refers only to ferry tolls. There was an increase in the Patna Division of Rs. 5,710, in Dacca of Rs. 1,990, and in Chittagong of Rs. 302, the income having fallen off more or less in the rest of the Divisions, except Chota Nagpore, where no tolls are levied by any of the Municipalities. The Municipalities of Mozufferpore, Dacca, and Revelgunge show the largest increase of income, viz., Rs. 3,842, Rs. 2,605, and Rs. 2,003, respectively. The increase in Mozufferpore was due to the bridge over the Burganduk river not having been repaired by the District Board, which enabled the Municipality to give a lease of the ferry at Akhara Ghât, and thus add considerably to their income. There was a falling off of Rs. 1,420 and Rs. 1,145 in the Lalbagh and English Bazar Municipalities respectively, of which no explanation is given.

23 *Miscellaneous.*—The following Municipalities show the largest fluctuations in the receipts as compared with the previous year:—

Municipality.	Amount of increase.	Municipality.	Amount of decrease.
	Rs.		Rs.
Howrah	16,325	Midnapore	4,196
Burdwan	13,299	Baranagore	3,002
Maniktolla	3,812	Berhampore	2,872
Krishnaghur	3,112	Rampore Beauleah ...	6,831
Khoolna	5,856	Madaripore	7,929
Dacca	2,910	Chittagong	3,932
Nasirabad	6,213	Mozufferpore ...	4,842

In Burdwan the increase consisted of Rs. 1,406 on account of increased receipts from the municipal school, due to the raising of the schooling fees, Rs. 5,000 realized by the sale of municipal debentures, and Rs. 4,298 paid by Babu Banshi Gopal Nandi as the price for the site of a Town Hall. The Khoolna Municipality received a grant of Rs. 6,000 from Government, being part of a special grant of Rs. 50,000 sanctioned for the improvement of the town. The decrease in Rampore Beauleah is only apparent, as the receipts of the previous year included donations from private individuals, amounting to about Rs. 6,000, for the improvement of drainage and water-supply. The old market at Madaripur having been washed away by the action of the Arialkhan river, the Municipality acquired a new site and re-established a market in 1889-90. The lands so acquired were let out to the merchants and shop-keepers on payment of heavy premia in addition to the annual rents. These premia amounted to over Rs. 8,000, which caused a large increase in receipts under this head in 1889-90, and a corresponding falling off in the year under review. The other fluctuations are not explained in the Commissioners' reports.

24. *Tax on persons according to their circumstances and property.*—There was a slight increase in the total receipts in the Burdwan Division, whilst in the Orissa and Chota Nagpore Divisions income under this head remained practically unchanged from the previous year. In the rest of the Divisions there was a falling off under this head. There was a large decrease in the Municipalities of Lalbagh (Rs. 5,990), Kandi (Rs. 2,484), Sasseram (Rs. 2,466), and English Bazar (Rs. 1,655), whilst the accounts of the Municipalities named in the margin show an appreciable increase. The increase in Baidyabatty is attributed to an increase in the rate of taxation. To the revision of assessments made during the year, the delay in the disposal of objections and the employment of the tax-darogah for more than three months in the census work is attributed the falling off of income in the Sasseram Municipality. The large decrease in Lalbagh was due to the exclusion of certain villages from municipal limits. Although, excluding Lalbagh, there has been an increase of revenue in the Presidency Division, the Commissioner thinks that it should be very much greater with vigorous and impartial administration. In Arrah a revision of the tax on persons was undertaken during the year, but it resulted in a decrease of income amounting to Rs. 292, and the executive officers of the Municipality are said to be unduly conscious of the odium attaching to any attempt to raise the assessment of the town.

Municipality.	Amount of increase.
	Rs.
Baidyabatty ...	2,214
Baranagore ...	4,322
Naihati	3,218
Baduria	1,067
Behar	1,273

25. The following table shows the grants received by municipalities from Provincial or Local Funds:—

Name of Municipality.	Amount of grant.		From what fund and for what purpose sanctioned.
	Rs.	A.	
Burdwan	1,594	0	Rs. 937 from Government as grant-in-aid to schools maintained by this Municipality, Rs. 57 from Burdwan District Board for training a nurse, and Rs. 600 from the same Board as contribution to the cost of maintaining the Burdwan charitable dispensary.
Baukoora	1,000	0	From the District Board towards the cost of maintenance of the charitable dispensary.
Midnapore ...	3,189	0	From Government for maintenance of the college and collegiate school.
	459	0	From the Mohsin Fund for the part schooling fees of Mahomedan boys of the collegiate school.
	180	0	From the District Board towards the support of the charitable dispensary.
Khirpai	77	0	Ditto ditto.
Chunderkona	15	0	From the District Board towards the support of the charitable dispensary in the fourth quarter of 1889-90.
Khulna	7,000	0	From Government—Rs. 1,000 (annually) for the maintenance of roads transferred to the charge of the Municipality, and Rs. 6,000 being part of a special grant sanctioned for the improvement of the town.
Darjeeling	6,483	8	From Government (annually) for the maintenance of certain Government roads within municipal limits.
	1,050	0	From the Darjeeling Improvement Fund for the repayment of the Cooch Behar loan of Rs. 50,000, and for the working of the Porters' and Dandiwallas' Act.
Rampore Beauleah ...	1,386	0	From the Prosunnanath Roy Fund (annually) for the maintenance of the charitable dispensary.
Nattore	1,396	0	From the Prosunnanath Roy Fund (annually) for the maintenance of the dispensary.
Nasirabad	1,000	0	From Government (annually, for a term of 5 years) for the support of the charitable dispensary and school.
	600	0	From the District Board for the support of the charitable dispensary and school.
	30,000	0	Promised by the District Board for the water-works to be constructed in the town, to be paid in three years.
Burisaul	1,200	0	From the District Board for the maintenance of the charitable dispensary.
Patna	5,725	0	From Government Rs. 5,725 out of the Wahabee Fund to meet the preliminary expenses of the drainage and water-supply schemes.
Dinapore	1,850	0	From Government Rs. 1,850 (annual) for the repair of that portion of the Bankipore-Dinapore Road which lies within municipal limits.
Gaya	4,471	0	From the Lodging-house Fund for (1) constructing a pucca drain in the old town, (2) Gaya Pilgrim Hospital, and (3) metalling a road in the old town.
Sasseram	1,200	0	From the Sasseram Endowment Fund (annually) for the support of the Sasseram dispensary.
Durbhunga	2,426	0	From Government, Public Works Department, for maintaining two roads in the Collectorate compound.
Motihari	400	0	From the District Board as contribution towards the expenses incurred by the municipality on the charitable dispensary in treating patients resorting to the dispensary from beyond municipal limits.
Bhagulpore	600	0	From the District Board for the maintenance of the charitable dispensary.
Deoghur	300	0	From the Pilgrims' Lodging-house Fund for improvement of street lighting.
Pooree	4,000	0	From the Pooree Lodging-house Fund for the conservancy of the town.

26. The Lieutenant-Governor has read with great satisfaction the record in the Commissioners' Reports of gifts of money or land made, and works of public utility executed, by private individuals within municipal limits. His Honour notices the following instances of private munificence as specially deserving of acknowledgment:—Rupees 3,300, which remained to be paid out of Rs. 6,300 contributed by Babu Kali Krishna Tagore of Calcutta for metalling a road in the Baranagore Municipality, was received during the year. Rupees 112 was contributed by the same gentleman for seven lamp posts for the Municipality. The Lieutenant-Governor also notices with satisfaction the good work done in the same Municipality by the dispensary established by the late Babu Sagore Chundra Dutta of Calcutta at Kamarhattee, and opened on the 1st April 1890; the cost of establishment and medicines amounted to Rs. 7,552-2, which was entirely defrayed from the funds allotted by the deceased gentleman. In South Dum-Dum, Rai Chatrapati Singh Bahadur made a free gift of land, measuring 7 cottahs and 10 chittacks, for the purpose of making a road. In Naihati (24-Pergunnahs), Srimati Monmohini Dassi, widow of the late Kerr Terak, built a pucca ghât on the river Hooghly at a cost of Rs. 6,000. Mr. C. Orr, the Manager of the Gouripore Company, also constructed a ghât at a cost of Rs. 2,000. Babu Bangshi Gopal Nandi of Burdwan made a donation of Rs. 4,298 for the purchase of a site for a town hall within the Municipality, but the land has not yet been formally acquired, and the case is pending in the Civil Court, though the foundation-stone was laid by Sir Steuart Bayley in July 1890. Her Highness the Dowager Maharani Narain Kumari of Burdwan has made a gift of the site of the Soory Municipal market, on the condition that, if the market ceases to exist, the land is to revert to her. To the Midnapore Municipality, Raja Mohendro Lal Khan of Moisadul contributed Rs. 25 a month for the maintenance of the ward for contagious and moribund cases attached to the Municipal Charitable dispensary. In Ghatal, Babu Chintamoni Kumar is constructing a pucca bathing ghât on the left bank of the river Silye. Some lands and Rs. 766 in money were given by Her Highness the Maharani Surnomoyi of Cossimbazar for the construction of a road in Howrah to be called after her name. In Bali, Babu Kanti Chunder Mukerjea has undertaken to build a pucca bathing ghât on the river bank at an estimated cost of Rs 5,000. A commodious building is being erected in the Rampore Beauleah Municipality at the cost of the late Rai Grishchandra Lahiry Bahadur, zemindar of Kasimpore, for the purpose of accommodating the Rajshahye public library. The work has approached completion, and has cost about Rs. 2,000. Raja Deonundun Singh of Sheohur in Mozufferpur contributed Rs. 1,000 for the construction of a new female ward to be attached to the Sitamarhi Dispensary. Babu Satyendra Nath Dey of Balasore, the owner of a thickly populated and insanitary *bustee* in the heart of the Balasore Municipality, had it remodelled at a cost of about Rs. 2,000, an excellent work, well worthy of imitation by other landlords. Syad Ibrahim Hossain Khan of Patna has placed in the hands of Government Rs. 2,000 with which to found scholarships tenable at the Medical College, Calcutta, for Behari Mahomedan women studying midwifery. He has also liberally provided 60 iron beds at a cost of nearly Rs. 1,500 for the use of patients in the Bankipur and Patna City Hospitals. Kazi Reza Hossain Khan Bahadur contributed Rs. 1,000 towards the cost of constructing the Begumpur Road in Patna. In Kishengunge, Babu Lal of Khagra excavated a large tank at an estimated cost of Rs. 1,100 by the side of the Ganges and Darjeeling Road for supplying good drinking-water to travellers. Raja Nilmoni Sing Deo of Pachete made a gift of Rs 5,000 for the improvement of the water-supply of the Purulia Municipality. This gift has already been acknowledged by Government. In the same Municipality Babu Surja Ram Marwari built a masonry well at a cost of Rs. 80. Babu Chandra Mohun Basak of Dacca paid Rs. 4,000 to the Municipality for improving a street in that town. At Bhagulpore, Babu Udit Narain Singh of Hundwa has promised a contribution of Rs. 26,000 for the extension of the water-works. Nawab Ahsanulla Bahadur of Dacca made a donation of Rs. 5,000 to the Comilla Municipality towards the lighting of the town.

27. *Expenditure.*—The total municipal expenditure of the province was Rs. 27,81,524 against Rs. 26,77,511 of the preceding year, showing an increase

of Rs. 1,04,013. The year closed with a balance of Rs. 3,60,942, against Rs. 3,16,393 of the year 1889-90. The following statement compares the percentages of the municipal expenditure in each Division under each of the principal heads of expenditure (excluding debt and suspense heads) during the last two years:—

Head of Expenditure.	Year	Burdwan.	Presidency.	Rajshahye.	Dacca.	Chittagong.	Patna.	Bhagulpore.	Orissa.	Chota Nagpore.	Provincial total.

The Lieutenant-Governor desires that the main heads of expenditure incurred by each Municipality may in future divisional annual reports be compared in the form of the above statement. The statistical information thus collected will enable Commissioners and Magistrates to exercise some check where any class of expenditure falls much below or rises much above the normal rate without the existence of any special reason.

28. The statement in Appendix F shows the details of expenditure under each head, as compared with the previous year. The largest expenditure was as usual incurred on conservancy (Rs. 5,05,355), public works, including the maintenance and repair of roads (Rs. 4,73,551), general establishment, including collection charges (Rs. 2,99,547), maintenance of medical institutions (Rs. 2,32,651), road-cleaning establishment (Rs. 1,84,768), establishment and appliances for lighting (Rs 1,43,343), water-works (Rs. 1,38,501), and public instruction (Rs. 1,15,288). The chief differences in expenditure as compared with that of the previous year are the following:—

Increase.

Heads of expenditure.	Amount of increase.
	Rs.
Establishments and appliances for extinguishing fires ...	7,596
Ditto ditto lighting streets ...	31,902
Erection of slaughter-houses and latrines, &c.	3,170
Water-works (establishment, repairs)	27,054
Conservancy establishments	35,488
Public works	16,360
Miscellaneous	9,578

Decrease.

Heads of Expenditure.	Amount of decrease.
	Rs.
General establishment (including collection charges) ...	7,948
Road-cleaning establishment	7,973
Public health—Other measures (markets, slaughter-houses, public gardens, &c.)	5,829
Public convenience—Survey of lands	6,440

29. *Establishments and appliances for extinguishing fires.*—The bulk of the expenditure under this head is incurred in the Municipalities of Howrah (Rs. 10,794), Cossipore-Chitpore (Rs. 23,979), and Darjeeling (Rs. 1,002). The Municipal Commissioners of Howrah paid Rs. 9,880 to the Commissioner of Police, Calcutta, on account of the Metropolitan fire-brigade, which included arrears due. The balance of the expenditure incurred under the head (Rs. 1,238) was distributed amongst several Municipalities.

30. *Slaughter-houses &c.*—The tables do not show the expenditure on slaughter-houses as apart from latrines, but the Lieutenant-Governor finds that there has been very inadequate provision hitherto for the erection and maintenance of slaughter-houses in such a condition as to ensure absolute privacy and to cause no offence to the Hindu population of the town. In one place His Honour found that the cattle were killed in an open piece of ground, in others a wall has been erected, but not high enough to prevent an outsider from seeing what takes place within. This is a matter to which Sir Charles Elliott attributes the greatest importance, and he trusts that early steps will be taken in all municipalities to remedy the defects which may exist in the construction of these slaughter-houses, and to pass bye-laws which will effectually prevent the slaughter of cattle in any other place.

31. *Street-lighting.*—The largest increase of expenditure occurred in the Municipalities of Howrah (Rs. 14,057), Cossipore-Chitpore (Rs. 10,455), and South Suburbs (Rs. 2,272). In Howrah the increase was due to an increase in the number of lights, and in Cossipore-Chitpore to the payment of arrear bills of the Gas Company, amounting to Rs. 4,733. The Municipalities of Dinapore Nizamut, Sitamarhi and Jamui incurred an expenditure under this head of Rs. 1,861, Rs. 288 and Rs. 225, respectively, against *nil* in the previous year. No expenditure was incurred in 47 Municipalities* against 59 of the previous year. Among these were the Municipalities at the head-quarters of the districts of Nuddea (Krishnaghur), Khulna, Mymensingh (Nasirabad), Chumparun (Motihari), Maldah, Hazaribagh and Singbhoom (Chyebassa). The Motihari Municipality have, however, introduced street-lighting during the current year.

* Name of Division.	Number of Municipalities in which there were no street lamps.	
	1889-90.	1890-91.
Burdwan	12	11
Presidency	21	16

Patna	8	4
Bhagulpore	4	3
Orissa	2	2
Chota Nagpore	8	7
Total ...	59	47

The Lieutenant-Governor observes great discrepancies in the average cost of lighting per lamp in various municipalities, which would seem to show that proper supervision is not always exercised over expenditure under this head. In some municipalities a saving in expenditure was effected concurrently with an increase in the number of lamps used, and it is hoped that these savings may be employed to increase the number of lights. On this subject the Lieutenant-Governor desires to repeat here the remarks already recorded in reviewing the report on the administration of the Police Department for the year 1890:—

"Street-lighting, which is essential to efficient watch and ward at night, has not made very much progress throughout those provinces. Not a single street in the Motihari, Maldah, English Bazar, and Chyebassa towns is lighted at night. That the people themselves feel the want of street-lights is shown by a quaint petition received by the Lieutenant-Governor on his recent tour from some residents of Faridpur, who ask for 'sufficient light in the bazaar to escape fear of robbers, and to avoid mistakes committed by constables thinking customers as thieves in the dark.' His Honour desires Commissioners of Divisions and District Officers to bring to the notice of the municipalities with which they are concerned the necessity of supplying adequate lighting."

32. *Water-works.*—The largest increase appears against the Dacca and Rajshahye Divisions, and the greatest falling off in the Bhagulpore Division. At Dacca the capital expenditure was Rs. 79,047, against Rs. 18,888 in 1889-90, owing to the extension of the water-works in the town by means of a loan made by Government. The present extension is expected to give a supply of 200,000 gallons of water per diem to the town in addition to the 200,000 gallons distributed before. Thus about five gallons of water will be supplied per head of population. At Nasirabad Rs. 6,265 were spent on the acquisition of lands required for the carrying out of the water-works scheme, for which Raja Surjya Kanta Acharjee, Bahadur, has offered a very liberal donation of Rs. 1,14,000, which was noticed in the Resolution for 1888 89. In the Darjeeling Municipality the expenditure rose from Rs. 4,304 in 1889 90 to * Rs. 10,996 during the year under review. The increase in capital expenditure as shown in the margin was due to the laying of a 4″ main pipe of about 5,000 feet in length and to the execution of certain minor new works.

	1889-90. Rs	1890-91. Rs.
* Capital outlay	793	9,268
Establishment, repairs, &c.	3,511	1,728
Total ...	4,304	10,996

The charges on account of the maintenance of the water-works at Burdwan fell from Rs. 8,571 to Rs. 6,679; but a capital outlay of Rs. 6,333 was incurred on the construction of a new settling tank and the extension of the area supplied. The accounts of the Bhagulpore Municipality show a large decrease in expenditure under this head of Rs. 45,115 due to the completion of the project. The capital outlay, which amounted to Rs. 46,316 in 1889-90, was only Rs. 7,034 during the year under report. There was also a reduction in the maintenance charges on account of the water-works in the town. The municipalities which have received the blessing of a pure wate-rsupply up to the present date, or in which water-supply works are under construction, are—

Burdwan.	Darjeeling.
Bhugalpore.	Dacca.

Mymensing.

His Honour regrets that the number in this list has not been increased during the year.

33. *Conservancy and road-cleaning.*—The former item shows a total increase of Rs. 35,488, whilst the latter shows a decrease of Rs. 7,973. These two items have, however, to be considered together, as the same establishment is employed generally for both purposes, and the expenditure is not as a rule correctly adjusted under the respective heads. The Lieutenant-Governor notices with satisfaction the net aggregate increase of expenditure. In the Burdwan Division the increase was most marked in Howrah (Rs. 17,876), Bally (Rs. 1,297), Hooghly and Chinsurah (Rs. 1,146), Serampore (Rs. 1,220), Raneegunge (Rs. 770), and Soory (Rs. 806); whilst Baidyabatty shows a decrease of Rs. 1,591. The increase in Hooghly and Serampore is due to the strengthening of the conservancy establishment and increasing the number of carts as well as to the repair of cow-sheds. The increase in Bally, Raneegunge and Soory is due to the introduction of Part IX. The decrease in Baidyabatty is only apparent, and is due to the charges incurred under "Conservancy" having been erroneously shown under other heads. The steam tramway for the removal of night-soil in Howrah was completed during the year at a cost of Rs. 80,000. It is proposed to increase the number and capacity of the trucks in order to render the tramway more serviceable, and to work the trains at night so as to minimise the inconvenience to the public. In the Presidency Division the Baranagore Municipality shows an increase under both heads, amounting together to Rs. 2,826. At Berhampore the charges on account of conservancy rose from Rs. 5,957 in 1889-90 to Rs. 9,526, and for road-cleaning from nil to Rs. 3,680, thus showing a total increase of Rs. 7,249. At Darjeeling there was a reduction of Rs. 3,048, which appears to have had a disastrous effect on the sanitary arrangements of the station. The Lieutenant-Governor will, however, deal with the Municipal administration of Darjeeling in a separate Resolution. At Dacca the expenditure on conservancy, as shown in head 3 (*i*) of Appendix G to the Commissioner's Report, appears to have fallen from Rs. 49,340 to Rs. 45,770, but no reference is made to this decrease in the body of the

report. Information will be called for to show how these sums are made up, and the details of the establishment employed during the last four years on cleaning private latrines, on cleaning public latrines, and for other purposes. A statement of the establishment maintained and the expenditure incurred under the head "Conservancy" in each Municipality in Bengal is given in Appendix I.

34. *Public works.*—There was a decrease of Rs. 9,411 in Hooghly, part of which is due to the expenditure of a large sum in the preceding year for the acquisition of land for a new road. There was also a decrease in Burdwan of Rs. 2,223. Howrah, however, shows an increase of Rs. 3,228, Serampore of Rs. 2,077, Baidyabatty of Rs. 1,551, and Midnapore of Rs. 1,919. The decrease in Burdwan is attributed to the fact that only ordinary repairs were executed within the year; the increase in Midnapore is chiefly due to the construction of new roads at a cost of Rs. 1,118. In Baidyabatty many roads were repaired, and the expenditure at Serampore, both on construction and repair of roads, compares favourably with that of the preceding year. Of the expenditure of Rs. 4,673 by the Municipal Commissioners of Hooghly, Rs. 1,800 was spent on a protective work on the river side to prevent the erosion of the bank. There were large increases of expenditure in Manicktolla (Rs. 6,656), Mozufferpore, Lalbagh (Rs. 5,186), Rampore Beauleah (Rs. 3,875), South Suburbs (Rs. 2,544). The Municipalities of Gya, Arrah, Santipore, Jamalpore and Bhagulpore show a large decrease of expenditure.

35. *Miscellaneous.*—At Dacca the expenditure rose from Rs. 7,849 in 1889-90 to Rs. 13,259 in 1890-91. It is reported that the increase was only apparent, being due to the fact that expenditure which should have been entered under "other measures" subordinate to "Public health" has been shown under this heading. The increase in the Naraingunge Municipality of Rs. 1,167 was due to the heavy expenditure incurred by the Commissioners in conducting an appeal pending before the High Court. The increase of Rs. 4,856 in Burdwan is chiefly due to the acquisition of the site of the new Town Hall, the cost of which, being met by private liberality, is only a matter of account.

36. *General establishment.*—The Lieutenant-Governor notices with satisfaction the reduction of Rs. 7,948 effected in the expenditure under this head as compared with the previous year. The decrease was shared by all the Divisions except Rajshahye, where the Darjeeling Municipality, shows an increase of expenditure of Rs. 1,669, due to the payment of Rs. 1,200 as bonus to the Vice-Chairman and to the Accountant drawing full pay during the year.

The Commissioner of Burdwan reports that a scale of establishment has now been fixed by each municipality in that Division. In some instances the scale of pay and establishment seemed unnecessarily high, and he had to check a tendency to give unnecessary annual increases in pay and to make additional appointments. The Commissioner of the Presidency Division also reports that Municipal Commissioners are constantly trying to create new appointments, and to raise the pay of their servants; that the Commissioner of the Division is obliged to exercise a vigilant control over them; and that it is to this control that the decrease in expenditure is due. The example set by the Burdwan Commissioner might usefully be followed in other Divisions, and the figures in the table in Appendix F(1) will assist Municipalities in fixing a suitable ratio.

37. *Drainage works.*—There was a large increase of Rs. 9,281 in Rampore Beauleah. The town is being provided with saucer-shaped roadside pucca drains, for which the Commissioners have contracted a loan of Rs. 15,000 from Government. The drains have already been completed on the sides of several roads. The construction of an underground masonry central drainage channel to tap the most filthy parts of the town, and to admit of the passage of river water into foul tanks and ditches, was completed with the help of a donation of Rs. 5,000 made by the Dighaputtia Ward's estate. The arterial or main channels were also cleaned and renovated, and several additional culverts were constructed as waterways. In Rungpore a new drainage canal has been completed, for which the town is largely indebted to the liberality of Babu Janaki Bullubh Sen of Dimla, and to the skill and energy of the Magistrate Mr. Skrine. The subsidiary drains of this town are being properly repaired, and several new kutcha drains have been provided or connected with the new canal. The

Municipal Commissioners intend to borrow Rs. 20,000 from Government for the completion of this scheme. During the year the survey of the Jalpaiguri Municipality was made, and a drainage scheme has been prepared by a qualified engineer at a cost of Rs. 1,610: the scheme is now under the consideration of the Sanitary Board. The bazar drains of the Kurseong Municipality, which are the property of the Burdwan Raj estate, were made pucca with Portland cement. An increase of Rs. 1,781 in expenditure under this head was incurred in Serampore, due to the construction of new drains. In Utterpara there was an increase of Rs. 645 owing to the purchase of surveying and levelling instruments and the entertainment of a surveyor. The Lieutenant-Governor has recently sanctioned an arrangement which will make it possible for the Sanitary Board to render material assistance to municipalities having schemes of drainage in contemplation by lending them the requisite instruments for surveys at a moderate charge for actual wear and tear. In Burdwan there was a large decrease of Rs. 3,084, due to the suspension of all new works under this head pending the preparation and adoption of a complete scheme of drainage. There was a falling off of expenditure in the Municipalities of Darjeeling (Rs. 4,137), Naraingunge (Rs. 1,489), Chuprah (Rs. 2,533), Bhagulpore (Rs. 2,320), and Pooree (Rs. 1,621). At Behar the expenditure rose from Rs. 638 to Rs. 1,766. The Commissioner of Dacca reports that in Dacca, where the drainage continues to be very defective, a sum of Rs. 5,767 was expended during the year for the construction of surface drains. Five pipe drains and 68 concrete drains were also newly constructed during the year. In Burrisal the improvement in drainage noticed in former reports has been continued during the year. A sanitary survey of the towns of Comilla, Burdwan and Patna was made with a view to introduce a proper system of drainage. The Lieutenant-Governor would be glad to see a sanitary survey of every municipality undertaken without delay, and would specially invite attention to the following orders of the Government of India:—

"In regard to the general question of sanitation in mofussul municipalities, it appears to His Excellency the Governor-General in Council that the time has come for the prosecution of sanitary measures on a more systematic plan than has hitherto been adopted as a rule. The recent municipal legislation has endowed local bodies with very considerable powers for the improvement of the sanitary condition of towns and villages, and has placed at their disposal considerable funds for expenditure on that object. It is therefore of the utmost importance that the money thus made available should be laid out to the best purpose on well-devised schemes of permanent utility. I am therefore to suggest to His Honour the Lieutenant-Governor that a sanitary survey of each municipality in the province should be, with as little delay as possible, undertaken by the Sanitary Commissioner and by the Local Engineering Authorities, and that plans and estimates may be prepared of all improvements necessary to provide each town with an efficient system of drainage, water-supply and conservancy. The plans so fixed upon should be executed from year to year as funds become available, the object aimed at being persistently kept in view until it is attained."

38. *Maintenance of hospitals and dispensaries and vaccination.*—One hundred and eighteen municipalities maintained 126 dispensaries during the year. The total cost incurred on account of "Medical institutions" was Rs. 2,32,651, against Rs. 2,30,241 of the previous year. By far the heaviest expenditure under this head was in the Patna Division, where an expenditure of Rs. 65,069 was incurred among 25 municipalities with an income of Rs. 4,72,157. The Presidency Division comes next with Rs. 37,799 divided among 37 municipalities with an income of Rs. 5,65,671. The Commissioner of Chittagong, referring to the expenditure by the Cox's Bazar Municipality of Rs. 570 under this head out of a total income of Rs. 3,268, mentions this as a striking, perhaps scandalous, disproportion of expenditure. Whatever the proportion may be the amount is not excessive in itself and the Lieutenant-Governor considers that a thoroughly efficient dispensary is one of the first necessities of the general public, and would not discourage reasonable expenditure in this direction. The statement in Appendix G shows the number of patients, both indoor and outdoor, treated at the hospitals and dispensaries maintained or aided by municipalities, and the cost thereby incurred by each municipality. The Municipalities of Culna and Hooghly are relieved of such charges by the existence of the Burdwan Raj Dispensary in the former, and of the Imambarah Hospital in the latter. The Raj estate also maintains a large and efficient dispensary in the town of Burdwan. The statement in Appendix H shows the establishment employed and cost incurred by the municipalities on account

of vaccination and the results of vaccine operations. The total municipal expenditure on this item amounted to Rs. 17,127, against Rs. 16,847 of the previous year. The total number of persons vaccinated or revaccinated during the year amounted to 85,358, of whom 78,094 were reported as successful cases. The only event of importance during the year in this connection was a violent outbreak of small-pox in the town of Chittagong. Extra vaccinators were employed, some of whom had to be prosecuted for practising inoculation. In Cox's Bazar Hindus and Mahomedans are reported to have received vaccination unwillingly, while the Mughs protested so strongly that only one Mugh child could be vaccinated. It must be remembered, however, that in Chittagong itself the lymph used was bad, and the protection afforded by vaccination imperfect. If similar defects were observed in Cox's Bazar, the prejudice against the operation would not be unnatural.

39. *Female medical education.*—The Burdwan Municipality contributed Rs. 81 towards the support of a female student of the Campbell Medical School, and Rs. 96 for a nurse and midwife attached to the Burdwan charitable dispensary. The latter resigned on March 16th, and the vacancy has not yet been filled up owing to the want of a suitable candidate. The Municipal Commissioners of Hooghly offered Rs. 20 a month for a trained midwife practising within the town, but no one came forward for the appointment. The Municipal Commissioners of Serampore paid Rs. 4 a month to a female student of the Campbell Medical School.. All that was done in this direction in the Rajshahye Division was the offer of a monthly scholarship by the Commissioners of the Municipality of Rampore Beauleah for a period of three years to secure the education of a female in the Campbell Medical School, on condition that she practised in the town after completing her studies. Although no suitable candidate came forward, the offer has been repeated this year. In Serajgunge one midwife has been entertained at Rs. 12 per mensem. One stipend at the rate of Rs. 5 was provided for by the Revelgunge Municipality in the Patna Division for a female medical student, but no candidate appeared. There is a lying-in-hospital attached to the Bankipur dispensary, where a trained nurse is employed. The Lieutenant-Governor trusts that next year the municipalities will continue their efforts to promote female medical education, and that they may meet with a more ready response. The idea is a novel one in this country, and some time will have to elapse before a supply of candidates has grown up to meet the demand for female medical attendance. Pending the creation of such a supply in the locality itself, it would be well for the municipalities to place themselves in communication with the authorities of the Campbell Medical School and to obtain trained females from that institution who are willing to be attached to the Municipal Hospital to practise in the Municipality.

40. *Vital statistics.*—Under this head it is only necessary to reproduce the remarks already recorded in reviewing the report of the Sanitary Commissioner for 1890, as follows:—

"Out of the 142 municipalities which profess to register births, only seven* reach this standard (40 per thousand), and only 29 show a birth-rate equalling or exceeding the birth-rate of England and Wales in 1888 (30·6 per mille) These results are accepted by the Sanitary Commissioner as approximately correct: 55 municipalities, returning birth-rates varying from 29·43 to 20·03, are held to have done moderately well in the matter of birth registration; while in 58 municipalities, or 40 per cent. of the entire number concerned, the results are spoken of as very defective. In the following 19 municipalities the birth-rate is so absurdly low that it is clear not the smallest attention can have been paid to the work of registration:—

*Madhubani ...	53·89
Jamalpur	43·50
Pubna ...	42·90
Moheshpur ..	41·86
Sonamukhi ..	40·42
Pirozpur	40·26
Sitamarhi	40·00

	Towns.	Ratio per 1,000 of population.		Towns.	Ratio per 1,000 of population.
1.	Jungipore ...	1·57	10.	Bazitpore ...	6·24
2.	Loharduggа ...	2·98	11.	Nobodip or Nuddea ...	6·38
3.	Chagdah ...	3·44	12.	Gobardanga ...	7·47
4.	Jhalakati	3·72	13.	Baduria ...	7·62
5.	Kandi	3·84	14.	Satkhira ...	8·12
6.	Nalchiti	3·92	15.	Nasirabad ...	9·15
7.	Burisal	5·23	16.	Baraset ...	9·30
8.	Noakholly ...	5·46	17.	South Suburban ...	9·44
9.	Taki	5·85	18.	Muktagacha ...	9·54
			19.	Kulna ...	9·90

Excluding physiological causes tending to affect the number of births, which, though referred to by the Sanitary Commissioner, may for practical purposes be disregarded, it is obvious that the abnormally low birth-rates shown in this statement must be due to two causes—the preponderance of the male over the female population reducing the actual number of births, and defective registration reducing the number reported. By way of illustrating the operation of the former factor, the Sanitary Commissioner observes that in most of the towns which have a larger male than female population the deaths exceed the births, while in most of those where females preponderate, the births exceed the deaths. The report, however, omits to supply the statistics requisite to test this statement, which, if correct, would tell rather in favour of the relative accuracy of the birth and death statistics. It is, however, in the highest degree improbable that the disproportion of the sexes can anywhere be pronounced enough to account for the very low birth-rates referred to above. It may further be observed that, with one exception, all of these towns are situated in Bengal Proper, and most of them are known to contain a large proportion of people of the respectable and educated classes, who might have been expected to desire to have the births of their children officially recorded, and who at any rate cannot plead ignorance of their obligations under the law or of the requirements of sound municipal administration. * * * *
* * * * * * * *

Death rate in different districts.

In the following municipalities the recorded death-rate is below 15 per thousand, and the work of registration appears to be neglected:—

Kumarcolly	...	14·56	Baduria	...	10·97

Bazitpore	...	11·85	Chugdah	...	7·89
Santipore	...	11·21	Lohardugga	...	6·49

Three years ago, in a circular addressed to Commissioners of Divisions, the Lieutenant Governor drew attention to the fact that in 51 municipalities out of 64 for which the figures were examined, the registration of deaths during 1877 showed a serious falling off when compared with the mean of the previous five years, during which registration had been conducted by the police. Since then some improvement has taken place, but hardly so much as might reasonably have been looked for, and it is evident that much still remains to be done.

On further consideration and after enquiring into the question in the municipalities which he has visited on tour, the Lieutenant-Governor has satisfied himself that the duty of collecting and recording vital statistics cannot properly be entrusted to municipalities in Bengal. It demands for its adequate performance more continuous care and attention than Municipal Commissioners are ordinarily willing to give to it, and it seems doubtful whether the object of recording such statistics and the necessity for aiming at a high standard of accuracy have been at all generally realised. The results at any rate are so unsatisfactory that the Lieutenant-Governor has decided to introduce a complete change of system, and to transfer the work of registration to the town police with effect from the 1st January 1892. Municipalities will then be relieved of the charges hitherto incurred under this head, and His Honor desires that the funds thus set free may in all cases be applied to the advancement of primary education.

41. *Public instruction.*—The total expenditure as shown in the municipal accounts was Rs. 1,15.288 against Rs. 1,14,198 of the previous year. There was a large increase of Rs. 6,880 in the Burdwan Division, and a decrease of Rs 3,333 and Rs. 2,318 in the Presidency and Patna Divisions, respectively. The statement in Appendix J shows, division by division, the class and number of schools (except colleges) maintained or aided by municipalities, the number of pupils receiving instruction at them, and the expenditure incurred on them; and also the number and class of other schools within municipal limits. The report for the Patna Division does not furnish the necessary information under this head, and it was found necessary to obtain the figures for this Division from the Education Department. It is hoped that for future years complete information will be supplied in all the divisional reports on this point. As was the case last year, the figures furnished in the divisional reports and reproduced in Appendix J do not agree with those furnished to the Education Department for insertion in a similar tabular statement--statistical table No. IV—appended to the Annual

Education Report. Special arrangements will be made to secure this agreement in future by prescribing an authoritative set of figures from which no deviation will be permitted. The figures cited in the margin, taken from the Education Report for the year 1890 91, show that, although there was a reduction of expenditure on secondary education, the charge remains disproportionately high with reference to the expenditure incurred on primary education, in which there was a slight falling off during the year. On this subject the Commissioner of Dacca writes as follows:—

		1889-90.	1890-91.
		Rs.	Rs.
Secondary	...	54,019	49,577
Primary	...	20,827	20,411
Female	...	1,000	1,309
Special	...	..	...
Buildings	...	4,298	976
Inspection	...	154	157
Miscellaneous		2,489	1,862

"This large expenditure on secondary education is having my attention, and I am taking measures to check the diversion of municipal funds for purposes scarcely contemplated by the law, and by which only a small section of the rate-payers, viz., that containing the well-to-do classes, can be said to be benefited. The giving a boy in these days an English education is equivalent to starting him in business with a stock-in-trade, and the cost of doing so should certainly not be charged to the general body of rate-payers, or paid for from funds which are all too small for their legitimate objects, viz., the advancement of the health and convenience of the public, and the encouragement of primary education. There can be no doubt that the time has come when English education should be self-supporting, and in some places the Municipal Commissioners are beginning to recognize this principle and are withdrawing municipal aid from high English schools"

With these remarks the Lieutenant-Governor entirely agrees. It is one of the first duties of a municipality to provide primary education for all boys and as many girls as will accept it, and Sir Charles Elliott desires that in future Commissioners of Divisions when dealing with the annual estimates of municipalities will see that provision is made for the proper performance of this duty before any funds are allotted to the support of secondary education. In reviewing the reports on the administration of District Boards, the Lieutenant-Governor has fixed seven per cent. as the minimum proportion of expenditure which should be devoted to primary education. In the case of Municipalities a standard of this kind is hardly applicable, but the extent of their obligations admits of being defined clearly enough for practical purposes in a different way. A municipality may fairly be required to provide primary education for all boys of a school-going age, a number which may be taken to be 15 per cent. of the male population of the town. In reply to the numerous addresses which have been presented to him by municipalities, the Lieutenant-Governor has frequently taken occasion to impress this principle upon the Municipal Commissioners, and has been glad to find that his advice was received with general approval and concurrence. The demands of primary education, thus formulated must be held to take precedence over those of secondary education, and Commissioners of Divisions are authorised to give effect to this principle in dealing with Municipal budgets under section 76 of the Act. The best plan of giving effect to these orders will, however, probably be to ask each municipality to prepare a definite scheme for providing the requisite number of primary schools, and to submit it for the Divisional Commissioner's approval. The Lieutenant-Governor trusts that Municipal Commissioners will find no difficulty in meeting his wishes in this matter. Orders will soon be issued transferring the grants now made by Government to primary schools within municipal limits to the municipalities concerned for expenditure on the same object, and this will be a considerable assistance to Municipal Commissioners towards meeting this new liability. Moreover, the transfer of the collection and registration of vital statistics to the town police will appreciably relieve their finances, and the entire amount shown in their budgets under this head may properly be devoted to the extension of primary education.

42. *Loans and sanitation.*—The policy of Government in regard to loans to local bodies has been frequently enunciated, and an estimate is annually prepared on reports from the Commissioners of Divisions of the requirements of Municipalities in this matter, so that every possible facility is given them for obtaining funds for the sanitary improvement of towns. The following municipalities incurred loans or otherwise made special arrangements for improving drainage or water-supply:—

Serampore Municipality.—A loan of Rs. 30,000 was sanctioned for the improvement of the drainage of the town, but the amount was not brought into account during the year.

Burdwan Municipality.—The Commissioners propose to borrow Rs. 25,000 from Government, in order to purchase a second pair of engines and a boiler, and to make other necessary arrangements to extend the supply of filtered water to the whole town. A survey has been made and levels taken, and a drainage scheme is now in course of preparation in consultation with the Engineer of the Sanitary Board.

Howrah Municipality.—The question of supplying the town with filtered water is now under the consideration of the Sanitary Board. A Norton's tube well sunk to the depth of 60 feet failed to reach a water-bearing stratum, and the river therefore appears to be the only available source of supply. The Commissioners have, since the close of the year, applied for another loan of Rs. 8,000 for the acquisition of the Huldoosah tank with a view to its improvement.

Utterparah Municipality.—The Municipal Commissioners applied for a loan of Rs. 8,000 for the construction of certain new drains. They have been asked by the Commissioner to prepare a plan and estimates for the drainage of the whole town and to consult the Sanitary Board. Meanwhile they have purchased surveying and levelling instruments and employed a surveyor. A survey is also in progress in Midnapore, and a scheme has been proposed for the town of Bally.

Presidency Division.—In North Dum-Dum a map of the municipality was prepared and submitted to the Sanitary Board with a view to the preparation of a drainage scheme. The Sanitary Board have directed the Commissioners to record the levels of the adjacent khals, which, when properly restored, may serve as main drains, and the Commissioners have made provision for this in their current year's budget. The Naihati Municipality is reported to have cut a number of channels to drain the low lands on its western border near the river Hooghly, and it is proposed to carry the work further. The drainage of North Barrackpore, North Dum-Dum, South Barrackpore, and Baranagore is closely connected. A comprehensive scheme for draining this area by opening or re-excavating the Dunka, Khurda, Dantia, and Bagjulla khals, which have partly silted up, and also by sluicing them in convenient places, has been for some time before the Sanitary Board. Certain valuable suggestions for the improvement of the sanitary condition of Baranagore, submitted by Babu Dukhina Runjan Mookerjee, a resident of the municipality, were referred to the Sanitary Board for consideration. The recommendations of the Board on the subject of the drainage scheme are now before Government. Another comprehensive project for the supply of filtered water to the riparian municipalities in the district of the 24-Pergunnahs is under consideration by the Sanitary Board. The municipality of Chanduria applied for a loan of Rs. 2,000 for the excavation of a tank in a part of the municipality where the want of drinking water is very severely felt. The application was not approved of by the Commissioner of the Presidency Division, as the dimensions of the proposed tank seemed too small. The Collector has again included this sum in his estimate of loans and advances for 1892-93, and the project is still under discussion. The Commissioner observes that upon the whole these important subjects appear to be receiving some attention, and hopes some real advance may be made. The Lieutenant-Governor concurs in the opinion expressed in the following extract from the Commissioner's report :—

"Application has recently been made to the Lieutenant-Governor by the Municipal Commissioners of Jessore and Krishnagar (Nuddea) for grants for drainage, but they appear to have done nothing themselves or to be in a position to ask for help. I understand that in Jessore no levels have been taken and no practical schemes devised, and no attempt appears to have been made to raise money by either municipality upon their own resources. I am of opinion that Municipal Commissioners should prepare schemes and see what amounts they can borrow before coming to Government for grants. The same remarks apply to the supply of drinking water. I have no sympathy with appeals for aid made by bodies who cannot show that they have made all possible use of their own resources."

It may be added that before preparing schemes on their own account, municipalities will do well to seek the advice of the Sanitary Board, who will be in a position to instruct them as to the best method of drawing up projects of this kind, and to give them information regarding measures which have proved effectual in other places.

Dacca Municipality.—The extension of the water-works carried out by means of the loan of Rs. 1,25,000 sanctioned by Government has been noticed elsewhere.

Furreedpore Municipality.—The Commissioners obtained a loan of Rs. 5,000 from Government to enable them to complete the excavation of a tank called the Jubilee tank, and to metal certain roads in the town. The amount was received only in October 1890, and a sum of Rs. 2,596 has already been deposited in the Collectorate as compensation for the acquisition of the land required for the tank and Rs. 447 has been spent in metalling the roads in question.

Comilla Municipality.—The municipality obtained a loan of Rs. 2,500 from Government to re-excavate a large reserved tank which had silted up, and to reserve and re-excavate another big tank in the eastern part of the town where the population is thick. With the exception of the re-excavation of the last mentioned tank, for which there was no time, the work was completed before the close of the year, and the balance of the loan refunded to Government. The Lieutenant-Governor would have preferred to see the amount devoted to some necessary work. The number of tanks reserved for drinking purposes has risen from two to four. The Maharajah of Hill Tipperah, who owns many tanks in the town, has lately consented to entrust the preservation of the Nanna Dighi to the Commissioners, and this tank under proper care will furnish an abundant supply of good water to a thickly populated quarter of the town. The District Board proposes to aid the municipality with funds when their title to the reserved tanks has been secured.

Chittagong.—In this town the drinking water is obtained from natural springs and artificial wells and tanks. All these sources of supply are carefully guarded by the municipality. The Commissioners applied for the services of a competent Engineer to determine the levels of the several springs with reference to those of the adjacent country with a view to ascertain whether it is possible to make a reservoir by damming up a valley or by diverting a stream, so as to give a sufficient supply of drinking water to the town. A similar application was received from the Pubna Municipality for the preparation of a scheme for the drainage of the town. Both applications are under the consideration of the Sanitary Board.

Patna Municipality.—The town has been surveyed with the object of providing it with a regular system of drainage; a scheme has been prepared, and it is understood that the Commissioners are about to apply to Government for a loan to enable them to carry it out. The question of the water-supply of the town has also engaged the attention of the Commissioners, and the Inspector of Local Works has submitted a plan and estimate to Government, but his project will cost seven lakhs, and it is doubtful whether the Commissioners will be able to undertake it in its present form.

Mozufferpore Municipality.—The Municipality incurred an expenditure of Rs. 2,690 in order to prepare a drainage scheme and to put the existing drains in order. As there is no regular system of drainage in the town, the Municipal Commissioners applied to Government to allow them the assistance of the Executive Engineer. The levels of the existing drains have already been taken, and a project is being prepared under the Engineer's direct supervision.

Pooree Municipality.—A scheme for the drainage of the town has been approved by Government, and a loan of Rs. 25,000 sanctioned to meet the cost. In 1886 an attempt was made to supply the town with drinking water from the Surnomoyi river. The necessary plans and estimates were prepared; but as sufficient funds could not be raised for carrying out the scheme, which was estimated to cost about three lakhs of rupees, it had to be abandoned. In his last visit to the town, the Sanitary Commissioner examined the water of the river and found it unfit for human consumption. As, however, the water from the wells in the town is of excellent quality, he recommended that these should be improved on some regular system. A copy of the Sanitary Commissioner's inspection report was forwarded to the Commissioners, and they were asked to state definitely what sort of scheme for improving the well water-supply they are prepared to introduce, and what expenditure they would incur. It was at the same time suggested that the best thing for them to do would be to raise a loan, to acquire a number of wells, put them in perfect order, impose a water-rate, and with the proceeds keep the wells in repair and maintain a proper supervising establishment. The reply from the Municipality with the

Commissioner's remarks thereon is now under the consideration of Government. The question of the sanitation and water-supply of Puree is one of extreme importance owing to the large numbers of pilgrims who visit the town, and the Lieutenant-Governor hopes soon to have an opportunity of looking into the subject on the spot.

Kendrapara Municipality.—The Municipality used to obtain canal water free of charge for filling some of the tanks in the town, when the canals were closed for annual repairs. This procedure having been objected to, and a heavy water-rate imposed, the Commissioners have, it is reported, resolved to discontinue taking water from the canal, and to spend some portion of their income every year in providing permanent sources of water-supply. As the whole supply of canal water is never or hardly ever utilised for irrigation, the Commissioner agrees with the District Magistrate and with the Chairman of the Municipality in thinking that the former practice might well be resumed. The Lieutenant-Governor desires that, if the canal water is really good, the municipality should be required to take it, a moderate charge being made for the water.

Chaibassa.—This town gets its supply of water from an artificial lake within its limits, now called the Jubilee lake, and from tanks, wells, and the Roro river. The re-excavation work of the Jubilee lake was completed during the year at a cost of Rs. 3,328.

43. Under orders contained in a Resolution dated 20th February 1882, all charges on account of police in municipalities were transferred to Government, and it was expressly stipulated that the municipal funds so set free should still be levied for expenditure on works of general municipal utility, and that the increased resources should not be devoted to the reduction of taxation. In order to ascertain how far this stipulation had been complied with, Commissioners of Divisions were asked to submit, with the reports now under review, a statement showing for each municipality the amount of income released by the exemption of the municipality from police charges together with the expenditure under the heads "Public Instruction" and "Public Health" during the years 1881-82 and 1890-91. The following table shows the results of these enquiries:—

Name of Division.	Number of Municipalities which were relieved of police charges.	Number of municipalities in which the savings on account of police have not been fully applied with in accordance the terms of the contract.
Burdwan	21	12
Presidency	33	16
Rajshahye	10	3
Dacca	10	Nil.
Chittagong	5	1
Patna	21	13
Bhagulpore	10	4
Orissa	5	1
Chota Nagpore ...	5	1
Total ...	120	51

Some municipalities have more than fulfilled the stipulation, but in 51 municipalities out of 120 the terms made by Government at the time of the transfer of the Police charges have not been fully carried out. The Lieutenant-Governor desires that Commissioners of Divisions will bear this in mind in passing the estimates, and will in their next annual reports explain any failure on the part of a municipality to carry out the terms of the agreement. The figures for each municipality are shown in appendix K.

44. *Embezzlement.*—The tax-collector of the Mozufferpore Municipality was accused of embezzling on three different occasions certain funds of the Municipality, amounting in all to about Rs. 97, and was prosecuted for criminal breach of trust. The municipal accounts were, however, kept in such an irregular manner that the misappropriation of any specific sums could not be proved against him to

the satisfaction of the court, and he was acquitted. In view of the vagueness of the accounts, it was considered undesirable to sue the tax-collector's surety to recover the loss, and the Municipality had thus to suffer a loss of the funds embezzled. This case shows a degree of carelessness in the administration of municipal affairs, which reflects the greatest discredit on all concerned. The tax daroga of the Raneegunge Municipality was prosecuted on a charge of embezzling Rs. 1,750, but he was acquitted at the Sessions. Owing to disputes as to the election of a Chairman, the Commissioners are reported to have taken no steps towards the recovery of the amount. A collecting sircar of the Hooghly-Chinsurah Municipality, who was entrusted in January 1890 with house and latrine-tax bills for the fourth quarter of 1890-91, misappropriated sums amounting to Rs. 633. He died in March 1890, and the embezzlement was detected on examining his accounts. A sum of Rs. 355 was recovered from his estate, and the balance will be demanded from his surety. A collecting sircar in Howrah was found to have been embezzling ever since 1887-88. His friends paid up the amount short, Rs. 737, and he was let off without being prosecuted—a course which the Commissioner considers was probably a wise one, as the account rules had been systematically neglected, and there would have been difficulty in getting a conviction for embezzlement. Another sircar in Howrah appropriated Rs. 1,049 in the second and third quarters of 1889-90. Rupees 678 has been recovered by the sale of his house and of the Government paper held as security. A warrant has been issued against him by the Magistrate, but has not yet been executed. Enquiries instituted at Bansberiah, in consequence of some remarks made by the local auditor, led to the dismissal of the tax-daroga, who paid up Rs. 183; but the way in which the accounts had been kept rendered a prosecution hopeless. One of the collecting sircars of the North Barrackpore Municipality embezzled Rs. 895, and as soon as the embezzlement came to light from the audit of accounts of the Municipality, and the man was suspended, he absconded. The Municipal Commissioners held a paper purporting to be a security for Rs. 100, which was executed 17 years ago in favour of the Barrackpore Municipality. On the man's appointment to the North Barrackpore Municipality this security was accepted without being tested or transferred in legal form. No civil action for the recovery of the amount could be undertaken as the document was worthless.

The frequency of these cases of embezzlement clearly demonstrates a want of proper check and control on the part of the executive officers over the collecting agency, and general disregard of the instructions contained in the rules for the keeping of municipal accounts. The Lieutenant-Governor considers that these occurrences are the strongest possible proof of administrative inefficiency on the part of the municipal executive concerned, and desires that in order to prevent the recurrence of such malpractices and the consequent loss of public revenue, the responsible officers will insist on greater regard being paid to these rules in the future, and will in all cases take securities in the form prescribed by Government, so that they may be easily realizable.

45. *Miscellaneous.*—There were unusually heavy floods during the year in the several districts of the Dacca Division, which caused considerable damage to many of the Municipal roads and necessitated the expenditure of a large sum of money on their repair. Floods also caused considerable damage to the roads in Lalbagh and Jungipore. Several other towns in the Presidency Division suffered from the floods. A very extensive fire took place in the town of Khulna in the beginning of the year, and nearly the whole bazar was reduced to ashes. Advantage was taken of the circumstances to prohibit the construction of houses and shops with inflammable materials, and although this was at the time attended with some hardship to the people, it has, it is believed, made the bazar practically safe from the recurrence of similar calamities. Fires also occurred in the Municipalities of Jhallokatti and Nasirabad.

46. *Working of the Porters and Dandiwallas' Act in Darjeeling.*—The Act is said not to have worked satisfactorily owing to the powers of the Commissioners being insufficient, and the whole subject is reported to be under the special consideration of the Municipality. Three hundred and fifteen dandiwallas and 361 porters were registered and 643 badges issued. The cost incurred in the working of the Act was Rs. 284-7. There were no prosecutions.

47. *Working of the Pilgrims Lodging-House Act, IV (B.C.) of* 1871.—In Pooree the total receipts of the year, which amounted to Rs. 12,126, excluding the opening balance of Rs. 1,186, show an increase of Rs. 3,666 over the receipts during the previous year, which again exceeded those of 1888-89 by Rs. 3,000. The total expenditure amounted to Rs. 9,923, against Rs. 11,255 of the previous year, and the year closed with a balance in hand of Rs. 3,389. The contribution to the municipality for conservancy and other charges fell from Rs. 5,000 in 1889-90 to Rs. 4,000 during the year under review. The total amount of fines realized amounted to Rs. 1,271, against Rs. 911 of the previous year. The total number of lodging-houses licensed at the close of the year was 779, capable of accommodating 16,719 lodgers, against 417 lodging-houses with accommodation for 11,170 lodgers licensed in the previous year. This large increase in the number of houses licensed under the Act seems to show that the people appreciate the working of the Act. Pucca latrines are insisted on in every house, and frequent inspections provide for their maintenance in a sanitary condition. Five thousand and thirty-eight inspections were made by the Health Officer and Assistant Health Officer. The Lodging-House Committee maintained the hospital at Pipli, and a temporary field hospital at Satyabadi during the car festival, and contributed largely towards the support of the Balianta hospital and the Pilgrim Hospital at Pooree. Two new latrines were erected for the patients at the Pipli Hospital. The Act continued to work satisfactorily.

48. The total income of the Gya Lodging-house Fund during the year amounted to Rs. 13,534-11-1 including the balance of the previous year, and the total expenditure was Rs. 8,409-10-2, leaving a surplus of Rs. 5,125-0-11. Altogether 392 licenses were issued during the year, against 405 in 1889-90. The number of lodgers fell from 11,659 to 10,732. Fifty two prosecutions were instituted; 47 cases ending in conviction and three in acquittal. The amount of fines imposed was Rs. 156. The Lodging-house Committee held four meetings during the year. The lodging-houses were kept in good order, under the supervision of the Health Officer and the Overseer. The working of the Act appears on the whole to have been satisfactory.

49. In Uluberiah the total receipts during the year amounted to Rs. 866, including the opening balance of Rs. 425, and the expenditure to Rs. 257, leaving a balance of Rs. 609 at the close of the year. The attention of the Committee was drawn to the anomaly of allowing the unexpended balance to accumulate in the case of a town which is described as "becoming full of filth and cesspools." The Committee met 13 times during the year. The fines levied amounted to Rs. 126 against Rs. 111 of the previous year. Thirty-two licenses were taken out against 31 of the previous year, and the amount of license fees realised was Rs. 277 against Rs. 288. Four sweepers were employed throughout the year to sweep the streets and cleanse the public latrine and urinal in the town.

50. The income of the Deoghur Lodging-house Fund was Rs. 1,552, including the opening balance of Rs 218, and the expenditure Rs. 584, leaving a balance of Rs. 968 at the close of the year, which it is proposed to utilise during the current year. Although the number of licenses issued during the year was the same as in the previous year, the amount of license fees rose from Rs. 679 in 1889-90 to Rs. 736 during 1890-91, owing to some of the lodging-house-keepers taking out licenses for a larger number of lodgers. The fines levied amounted to Rs. 360 against Rs. 242 of the previous year, which was due to a better supervision exercised by the Committee. In the opinion of the Commissioner the management was efficient.

51. At Chandbally the income was Rs. 891, including the opening balance of Rs. 266, against Rs. 921 of the preceding year, and the expenditure Rs. 354 against Rs. 655. The balance in hand at the close of the year was Rs. 537. Sanction was accorded to the sinking of a well and cleaning of a tank at a cost of Rs. 250 out of the accumulated balance. The Act worked smoothly during the year.

52. The provisions of the Act were put in force during the year in the *chutties* (or rest-houses) along the Juggernath Road in the districts of Balasore, Cuttack and Pooree; itinerant Health Officers were appointed to supervise the working of the Act in the *chutties*, and bye-laws were framed to give effect to its provisions. There were no receipts under the Act in the Cuttack

district, and the pay of the Health Officer (Rs. 40 a month) and that of 13 sweepers (Rs. 48 a month), maintained for the conservancy of the *chutties*, was met from the Juggernath Road Fund. The extension of the Act to the *chutties* is said to have been resented by the shopkeepers, owing to the passenger traffic on the Juggernath Road having declined on the opening of the coast canal and the sea routes, and it is reported that for a few months certain inn-keepers actually closed their shops in Balasore. The inn-keepers have, however, commenced to file applications for licenses, and in Balasore the receipts came up to Rs. 356, including Rs. 240 as license fees, Rs. 46 certificate fees, and Rs. 70 as fine. The Lieutenant-Governor agrees with the Commissioner in thinking that if the Act is worked with tact and firmness, there is no reason why it should not be as successful as in Pooree. The salaries of the Health Officer and of the 10 sweepers maintained in the Balasore district were also paid out of the Juggernath Road Fund for that district. The income of the Lodging-house Fund may now be applied to improving the water-supply of some of the chutties.

53. *General working of the Municipal Act, III (B.C.) of* 1884.—The Commissioner of the Burdwan Division observes:—

Burdwan Division.

"I do not know that I can, or need, add much to what has been written on this subject in previous years. The gentlemen selected for special mention have well earned the thanks of Government, and there are others who, in less important positions, have discharged their duties with zeal and ability. What is wanting in Municipalities generally is a better use of local knowledge, and a better control over overseers and out-door work generally. An occasional inspection by a gentleman who knew the wants of his neighbourhood, and what could be done with the money allotted for them, would often do far more good than the most assiduous attendance at meetings, where discussions are apt to be needlessly protracted to the great inconvenience of busy men."

The Lieutenant-Governor notices with satisfaction the favourable mention made in the report of Rai Nalinaksha Bose Bahadoor (Chairman, Burdwan Municipality), Baboo Dhone Kisto Ghose (late Chairman of the Soory Municipality), the late Rai Bepin Behari Dutt, Bahadoor, (Chairman, Midnapore Municipality), Baboo Ishan Chandra Mitra (Chairman, Hooghly and Chinsurah Municipality), and Baboo Siv Narain Mukerjee (Chairman, Utterparah Municipality) for the efficient manner in which they have administered the affairs of the towns under their charge.

54. The Commissioner of the Presidency Division remarks:—"From what has come before me while in charge of the division, I cannot consider municipal administration satisfactory.

Presidency Division.

Nothing appears to have taken the place of the constant supervision of the Magistrate or Joint-Magistrate, who used to spend the morning in going about noting requirements and supervising the work of the servants. It is most exceptional to find a Chairman or Vice-Chairman or any Municipal Commissioner who makes a practice of riding or walking about. Servants are left to themselves, money is wasted, and work is not properly done. As regards executive action, the boon of self-government conferred upon the people appears to have entailed the result that work which used to be done is done no longer. The bulk of the Municipal Commissioners appear to consider that all their work is to be done in meetings and not outside. There is a general want of personal activity and energetic supervision. The work of assessment is unpopular, and the Municipal Commissioners therefore neglect it. Taxation is much below what it should be, and bad as the work of assessment is the work of collection is still worse. I am sorry that this report contains no return of the balances of tax remaining uncollected. There may be exceptions which have not come to my notice, but enough has come before me to create the general impression that there are very discreditable balances of arrears remaining uncollected. Municipal Commissioners do not like to be hard on defaulters, and neglect their duty in a manner calling for the strongest censure. * * *

Mr. Baker thinks that the tax on persons should be replaced by a tax on the annual value of holdings, that it should be assessed by a person unconnected with the Municipality, and collected by the Magistrate as the road cess is collected by the Collector. Thus an experienced Magistrate considers that the

elected or nominated representatives of the people have shown themselves unfit to be entrusted with the duty of assessing or collecting the taxes which are to supply the funds for their expenditure, and all that I have seen leads me to agree with Mr. Baker that in this respect municipal administration has proved a failure. There have been cases of party feeling, unworthy imputations, and unfair criticisms, but nothing which appears to call for special notice; nor do I find any gross case of misconduct on the part of the Municipal Commissioners, except in Manicktollah (24-Pergunnahs), where the late Vice-Chairman was convicted of misappropriating public money. The conviction was set aside by the Appellate Court."

Rajshahye Division.

55. The Magistrate of Rajshahye writes:—"Both the Corporations (Rampore Beauleah and Nattore) have discharged their duties with great ability and to my entire satisfaction. I have always been consulted on all matters, and it has been a pleasure to me to advise bodies in whom I have inspired confidence. The relations between me and the Corporations, I may say, have always been cordial." The Magistrate of Bogra writes thus in regard to the Municipalities in his district:—"Before the general elections of December 1890, there were in both the municipalities a few Commissioners who attended scarcely any meetings, and took little or no interest in the concerns. But there were also several who attended almost all the meetings and did useful service. It is too early to speak of such changes as have been caused by the general elections. The Commissioners of Sherepore are not active or progressive, but those of Bogra are decidedly so. They keep the roads in very good order, the streets are well lighted, and the business of their office is excellently conducted. In all these matters the traditions and the practice at Sherepore show want of energy and efficiency. At Bogra, the Chairman, Babu Rajani Kant Mazoomdar, whom the new Commissioners have wisely re-elected, has great powers of reorganization. The taxation in the town of Bogra is very bad, and I think unduly high; the contribution towards primary education is too small, but, with these exceptions, the arrangements are good and successful, and the Commissioners deserve much credit. On the whole the Act may be said to have worked well in Bogra and only fairly in Sherepore." The late Magistrate of Rungpore wrote as follows:—"My hearty acknowledgments are due to Dr. Raj Mohun Banerjee, the Chairman, and Babu Jogesh Chandra Mozoomdar, Vice-Chairman, to whose untiring efforts is due such measure of success as has attended the working of the Rungpore Municipality during the year under review." The Deputy Commissioners of Jalpaiguri and Darjeeling and the Magistrate of Pubna are of opinion that the municipalities in their districts have worked well during the year.

The Commissioner writes:—"In the above opinion expressed by the district officers I entirely concur. The Municipal Commissioners have on the whole performed their duties with zeal and devotion to the public interests as well as in harmony with the heads of their districts."

Dacca Division.

56. The Magistrate of Dacca has recorded the following opinion:—"The year has been one of some progress. In the town of Dacca effect was given to the long-pending scheme for extending the water-supply. This has now been nearly doubled, and much benefit will result to the town from this important improvement. The interest taken in their work by many Municipal Commissioners was perhaps less than in previous years, and may be accounted for by the fact that many were aware that they would shortly cease to be Commissioners. In Naraingunge especially much important road work, which should have been done in the cold weather, was put off and has had to be done since at increased expense. Some improvements were effected in Dacca in the working of the conservancy establishment, but these large establishments require a very strong hand to keep them in full working order. The Municipal Commissioners do not, I think, sufficiently realize this, and that an officer competent to do this must be well paid. They are inclined rather to multiply low-paid officers and to cut down the Secretary's pay." The Commissioner agrees with the concluding remarks in the above extract, and thinks that many of the shortcomings in the Municipal administration in the town of Dacca are due to petty jealousies and party dissensions among the Commissioners, which render the Chairman's

position a difficult one, and the action of the Municipal Executive often weak and uncertain. The Magistrate of Furreedpur observes as follows:—"Both the municipalities in the district have worked fairly well, but more attention should be given to the practical administration of minor details. The Commissioners show a praiseworthy inclination to benefit by the instruction of higher authorities and to work harmoniously with other public bodies. The Commissioners of the Furreedpur Municipality have generally consulted the District Officer on points of difficulty, and have always tried to carry out his suggestions." The Magistrate of Backergunge writes:—"All the Municipal Committees have worked smoothly and considerable improvements have been effected. In Burrisal town in particular the change for the better must be very apparent to any one who knew the place 8 or 10 years ago. The other towns, however, are in many respects a long way behind. Jhallokati and Nalchitti in particular are, and must continue to be, towns with filthy surroundings, as they contain no latrine accommodation. I tried to get the Committees to move in the matter, but failed, and nothing short of a law which will compel the adoption of the latrine system in its entirety will be of any effect." The Magistrate of Mymensingh writes as follows:—"On the whole the Act has worked satisfactorily, and the Commissioners have taken a fair amount of interest in their work. The Commissioners of Nasirabad and Kishoregunge have displayed a considerable interest in the welfare of their respective towns. * * * * Municipal administration in Bengal is marred by some serious defects, and these defects are due to a tendency to expend more money for the benefit of the well-to-do classes than for that of the general bulk of the rate-payers. The greatest good of the greatest number should constitute the sole justification of Municipal taxation; an excessive amount is spent on English education and very little on primary education, which alone in this district benefits the bulk of the rate-payers. The great want is a want of men with leisure as well as education and enlightenment. Pleaders, who are mostly elected, have the latter qualifications, but not the former. The want of leisure must mean deficient interest, and the result of deficient interest is seen in many directions, such as the worthless vital statistics compared with which the statistics in rural areas are accuracy itself. Then it must be remembered that the Magistrates as *ex-officio* Chairmen were absolutely independent. It is perhaps impossible for permanent residents of a place to be so. The Magistrates are birds of passage: they come and go; the non-official Chairman stays on for ever. No wonder that he is perhaps inclined to court popularity or at least to avoid unpopularity. The very best native Chairmen readily admit this. They are very reluctant to take action against encroachments and bad drains, the class of offences, broadly speaking, in which well-to-do people indulge. When compelled to act, they prefer to invoke the aid of the Magistrate, so that some or all of the odium of the interference may not fall on themselves."

The Commissioner of the Division observes:—"There is much in Mr. Phillips' remarks in which I entirely concur. I am not, however, inclined to agree with him in thinking that the remedy for inefficient administration is to be found in generally increasing the powers of control exercised by the local Government officials. The powers given to Magistrates and Commissioners by the law are, I think, sufficient, except in regard to one or two matters, which I will notice further on. I also think that it would be a mistake to encourage constant interference with Municipal bodies by the magistracy, or to do anything which will have the effect of making the Commissioners feel that what is being given them with one hand is being taken away with the other. Such a course cannot promote mutual good feeling or willing co-operation, but must lead to complications and much vexation of spirit. In all such matters prevention is better than cure, and much more will be gained by judicious guidance than by any amount of driving. My experience of Municipal Commissioners generally is that they are anxious to do what is right, and to perform their duties honestly and thoroughly, but that they are so beset by wheels within wheels of private or party interests, that it is in many cases almost impossible for them to shake themselves clear of surrounding influences and to act independently, though their better feelings would induce them at once to do so if they only had some one to give them a lead and to take the responsibility."

Patna Division.

57. The Commissioner of Patna observes:—"In the Gaya Municipality the working of the Act is reported to be on the whole satisfactory. The working of the Arrah Municipality was not quite satisfactory. As regards this Municipality the Magistrate observes that 'The roads are in a bad state and require repairs. There is little supervision over the conservancy staff; watering and lighting are insufficient and badly supervised. Latrines are wanted. Drainage is defective. Of late the Commissioners have split up into two factions. They finally recommended Government to appoint a Chairman, and Mr. Forbes was appointed. On his transfer they have re-elected Babu Seo Sarun Lall, the late Chairman. This gentleman and the Vice-Chairman, Babu Jadubans Sahai, interest themselves in their work, but do not seem to be able to make much improvement.' The defects pointed out in Arrah exist more or less in other municipalities in the district. The want of latrines and good drains is felt everywhere; but the real difficulty in the way of providing them is the want of funds. In the Mozufferpur Municipality the Act has on the whole worked fairly well. Babu Purmeshwar Narain Mahata, the Vice-Chairman, deserves great credit for the interest he has taken in his work. In Lallgunge the Commissioners generally take no interest in their work. In Durbhunga the Commissioners on the whole seem to take a fair amount of interest in their work, but there is still room for improvement. Better attendance at meetings is wished for. Speaking of the Chuprah Municipality, the Chairman writes:—"The year has on the whole been one of progress, which would have been greater had I had more time to give to details. The Commissioners as before gave a good deal of assistance in the only way in which it can really be expected from a body of native gentlemen * * * * Great attention has been paid to sanitation, and still more would have been done had I or the Vice-Chairman had more leisure. Regular trenching has been introduced; some progress has been made towards incessant supervision of the establishment, and a new slaughter-house has been built, and the old slaughter-house for horned cattle renewed. Arrangements are being made for two new markets * * * * *
Latrines have been supplied and a relief camp was opened during the floods in August last. Lastly, the town has been, it is believed, thoroughly protected from flood." * * * *
Special mention is made of the services of the Vice-Chairman, Mr R. P. Ghose, and others. As regards the Motihari Municipality, the Magistrate says that the elected Commissioners worked well during the year. Both the present and the late Vice-Chairman took great interest in the Municipality. In my General Administration Report for the past year, I wrote the following remarks on the subject of the Patna Municipality:—"Mr. Currie, the District Officer, writes in very strong terms of the shortcomings of the municipality. He specially complains that the Commissioners have divested themselves of most of their powers and duties and delegated them to Ward Committees. Lighting, watering, scavenging, building, &c., are all in the hands of Ward Committees, who are in the hands of their neighbours. They are afraid to close well-privies, or to propose latrine taxes, or to refuse licenses to build. They are too ignorant of the rudimentary ideas of sanitation to see their importance, and when orders are passed by the Commissioners, the Ward Committees are afraid to enforce them. Latrine taxes are now imposed in only two wards, and attempt has been made to free them also. The taxes were under-assessed and the Ward Committees then made large remissions without proper enquiry." I confess that I should have thought a long narrow tract like the city of Patna would be unusually suitable for Ward Committees, but much must depend on the manner in which they are worked. * * *
The Commissioners have since resolved at a meeting to withdraw the powers from the Ward Committees. The Municipal Commissioners of Barh have been very negligent in the matter of their accounts; both the district officer and I have taken notice of this, and have ordered the submission of periodical reports showing the steps taken to remedy the irregularities. The Behar Municipality works fairly well, though there is a chronic feud among the Commissioners. The same is to be said of the Dinapur Nizamut Municipality."

58. The Commissioner of Bhagulpore has recorded the following remarks:—

Bhagulpore Division

"The record of Municipal administration during the past year is not altogether satisfactory. In some cases local jealousies and dissensions between rival sections of the Committee have interfered with successful working, and in two municipalities, viz., English Bazar in the Maldah district, and Sahebgunge in the Sonthal Pergunnahs, from both of which, considering the number of educated and intelligent residents, better things might have been expected, conservancy and sanitation have been greatly neglected, and the administration has been generally inefficient. At the same time there has been in some municipalities a good outturn of useful work, and indications of progress are not wanting. The Commissioners generally are alive to the real requirements of the municipalities under their charge, and in several cases successful attempts have been made to provide for growing needs by increasing the assessments, though there is still a tendency to look to Government as the only source from which help can be obtained. Establishments have been reviewed, and on the whole there has been a reduction of charges under this head, while the practice of increasing salaries at irregular intervals and without regard to any fixed scale has been checked. The proceedings of some Municipal bodies, such as the Bhagulpore Committee, evince a high degree of intelligence and ability in dealing with administrative questions, and if the scheme of work were always as well executed as it is often designed, there would be little left to desire."

59. Not having had an opportunity of inspecting any of the Municipalities, the Commissioner of Orissa was unable to make any remarks based on personal knowledge, and he has confined himself to reporting the following remarks of the District officers in his Division:—The Magistrate of Cuttack makes the following remarks:—"On the whole the Cuttack Municipality has done well. I had up occasion now and again to point out an unfenced well, holes on crest of bridges and the like, and found matters promptly set right."

Orissa Division.

In Pooree the Chairman reports that steps have been taken to improve one of the big tanks called the Seth Ganga by appointing a Sub-Committee to devise means for so doing. But the Magistrate writes:—"The water of this tank was sent to the Chemical Examiner nearly two years ago. It was said to resemble liquid sewage. Bathing has gone on ever since, and Municipal Commissioners have effected no improvement. The appointment of a Committee is a mere blind. The contribution from the Lodging-house Committee more than covers the up-keep of the hospital, which is practically the only benefit the pilgrims get from the Municipal Commissioners, who will not employ a Food Inspector, and will not enforce the cleaning of the filthy tanks in which the pilgrims have to bathe, and so they are annually poisoned with fermented and putrid food and are forced to bathe in sewage. * * * I reluctantly recommend the abolition of the Municipality and its reconstitution as a second class Municipality with official Chairman." The Commissioner also thinks that the Municipal Commissioners have not hitherto done all they could have done with the money and powers they have, and it is quite possible that special measures will be necessary to compel them to adopt more rigorous measures; and he has, therefore, asked the Magistrate to submit a special report embodying his proposals for reform. The Lieutenant-Governor desires that the submission of this report to Government may be expedited.

The Magistrate of Balasore writes:—"During the three years of Dr. Zorab's incumbency there was practically no need for the Magistrate to intervene in municipal matters. I fear, however, that, under the existing *régime*, I may be forced to take more frequent action in support of authority and order." The Magistrate is, however, satisfied that the state of the roads and of conservancy arrangements are generally satisfactory.

60. The Commissioner of the Chota Nagpore Division observes:—The Commissioners of both the Hazaribagh and Chattra Municipalities in the district of Hazaribagh are reported to have generally taken interest in their duties. Speaking of the Vice-Chairman of the Hazaribagh Municipality, Rai Jadu Nath Mukerjee, Bahadur, the Deputy Commissioner says:—"The Vice-Chairman has rendered invaluable service to the town for many years. He looks into every branch

Chota Nagpore Division.

of the municipal administration, and has every detail at his fingers' ends; he is quite fit, as an exceptional case, for appointment by Government as Chairman. He is one of the very few non-officials who so far have thoroughly justified the Government policy of extending local self-government, and as such he is deserving of Government recognition." The Deputy Commissioner of Lohardugga reports:—"The Commissioners of the Ranchi Municipality take a lively interest in its affairs. The collection of municipal dues is made almost with mathematical regularity * * * The Municipal Commissioners take particular interest to see that the funds of the municipality are strictly appropriated to legitimate purposes. They also devote all necessary attention to the sanitary requirements of the town." Of the Municipal Commissioners of Ranchi, the name of Dr. F. R. Swaine, Civil Surgeon, is specially mentioned. He is said to have taken particular interest in improving the sanitation of the town. The working of the Lohardugga Municipality is said to be on the whole good. Regarding the working of the Act in the Purulia Municipality, the Deputy Commissioner of Manbhoom writes:—"The Purulia Municipality was on the whole managed well. The Commissioners with few exceptions took an interest in their duties and supplied their obligations. Besides attending the meetings, they assisted in the executive work of their respective wards. The efficiency of its Committee was greatly due to the active interest taken in municipal matters by its Vice-Chairman, the late Rai Gunga Nund Mukerjee, Bahadur. This excellent gentleman died some three weeks ago, and his loss will be felt by us for many a year to come. The Civil Surgeon and District Engineer are members of our Municipal Committee. Their professional knowledge is always at our service, and they have rendered us much service by their advice." The Chairman of the Chyebassa Municipality, Dr. S J. Manook, appears to have continued to evince interest in its affairs."

61. On a general view of the year's work and bearing in mind the special difficulties which Municipal Commissioners have to contend with, especially when acting without the guidance and initiative power of an official Chairman, the Lieutenant-Governor considers that the record is fairly satisfactory. Almost everywhere the Commissioners appear to have made a genuine effort to do useful work, and the shortcomings which have been pointed out in the reports are such as might naturally have been expected from a body of gentlemen who have their own business to look after, and who as a rule have undergone no special training in the work of administration. The making and revision of assessments, the collection of municipal taxes, the checking of accounts, the supervision of conservancy establishments, and generally the maintenance of efficient control over out-door work, represent a considerable amount of personal labour, and demand close attention to a variety of details. It is in these points, rather than in attendance at meetings and appearances on public occasions, that the work done by Municipal Commissioners seems to admit of improvement. During his various tours Sir Charles Elliott has had frequent opportunities of discussing local requirements with the Municipal representatives, and he has always found them extremely ready to take advice and to adopt any reforms that were suggested to them. It seems to him, therefore, that a good effect would be produced if the Magistrates of districts and Sub-divisional Officers were to make periodical inspections of the Municipalities in their jurisdictions, and to submit notes of their inspections to the Commissioner of the Division. A copy of such notes, with the remarks of the Commissioner, might afterwards be sent to the Municipalities concerned. In this way the Municipal Commissioners will get the benefit of the wider experience of the District Magistrate and the Commissioner of the Division, who see the working of many Municipalities, and are therefore in a position to offer advice without interfering with the independence of the Commissioners. In the case of Municipalities at the head-quarters of districts, the Commissioner of the Division might himself occasionally inspect them, and in that case the Lieutenant-Governor would be glad to have a copy of the inspection note submitted for his perusal. Such notes would form a useful supplement to the Annual Report, which does not always contain sufficient information as to the working of individual Municipalities.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Offg. Secretary to the Government of Bengal.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 19*th December*, 1891.

Division	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
BURDWAN DIVN.	1	Burdwan Dec. 19, '91	Nil	Weather—seasonable. Harvesting of winter rice still going on. Prices of common rice:— Srs. Sudder ... ... 14 Culna ... ... 14 Cutwa ... ... 15 Raneegunge ... ... 15½ } per rupee.
		Culna ...	Nil

	2	Bankoora " 19, '91	Nil	Weather—seasonable. Harvesting of winter rice still continues. Prospects of *rabi* and sugarcane good. Fodder and water sufficient. Condition of cattle good. Common rice selling at 17½ seers per rupee both at Bishenpore and Sudder market.
	3	Birbhum " 19, '91	Nil	Weather—seasonable. Harvesting of winter rice still going on. *Rabi* sowings nearly finished. Prospect of *rabi* crops fair. Supply of fodder and water sufficient. Common rice selling at from 14½ to 18½ seers per rupee.
		Rampore Haut ...	Nil	
	4	Midnapore " 19, '91	Nil	Weather—cold and fair. *Aman* paddy is being cut. Indigo, sugarcane, and *rabi* crops doing well. Prices of common rice:— Srs. Sudder ... ... 17 Contai ... ... 18 Ghatal ... ... nearly 16 Tumluk ... ... 14 } per rupee.
	5	Hooghly " 19, '91	Nil	Weather—rather warm for the time of year. Harvesting of *aman* paddy going on. Prospects of *rabi* tolerably fair. No difficulty in obtaining fodder and water-supply. Prices of common rice:— Srs. Sudder ... ... 12 Serampore ... ... 13 Johanabad ... ... 16 } per rupee.
		Serampore ...	Nil	
		Jehanabad ...	Nil	
	6	Howrah " 19, '91	Nil	Weather—fine. Harvesting of *aman* crop still proceeding with an average outturn except on higher lands. Sugarcane doing well. Health of cattle good. Fodder and water-supply sufficient. Price of common rice 14 seers per rupee.
		Uluberia ...	Nil	
PRESIDENCY DIVN.	7	24-Perghs. " 19, '91	Nil	Weather—seasonable. Harvesting of *aman* paddy progressing. Prospects of neither *rabi* nor *aman* show improvement. Sugarcane being pressed. Prices stationary. Fodder and water sufficient. Cattle-disease reported from one village in thana Harowa.
	8	Nuddea " 19, '91	Nil	Weather—seasonable. Harvesting of *aman* nearly finished; outturn poor. State of *rabi* crops continues bad for want of rain. Indigo doing well. Common rice selling at from 11 seers 6 chittacks to 15 seers per rupee. Condition of cattle good, and supply of fodder and water sufficient.
		Kushtea ...	Nil	
		Meherpore ...	Nil	
		Chuadanga ...	Nil	
		Ranaghat ...	Nil	
	9	Khoolna " 19, '91	Nil	Weather—seasonable. Harvesting of *aman* going on. Prospects fair. Common rice selling at from 14 to 16 seers per rupee. Fodder and water sufficient.
		Bagirhat ...	Nil	
		Satkhira ...	Nil	
	10	Jessore " 19, '91	Nil	Weather—rather warm. *Aman* paddy is being harvested; it is best in Narail subdivision. Prospects of *rabi* crops not good owing to want of rain. Fodder and water sufficient.
		Jhenidah ...	Nil	
		Magurah ...	Nil	
		Narail ...	Nil	
		Bongong ...	Nil	
	11	Murshedabad " 19, '91	Nil	Weather—seasonable. Harvesting of *kalai* going on. *Rabi* crops doing well. Winter rice being harvested with better results than had been anticipated. No want of fodder for cattle.
CHITTAGONG DIVN.	12	Chittagong " 19, '91	0·19	Weather—still warm. Clouds often about. Harvesting of winter rice in progress; probable average outturn estimated at 10 to 12 annas. Vegetable crops benefited by late showers. Prices steady. Condition of cattle generally good. Supply of fodder sufficient.
	13	Noakhally " 19, '91	0·06	Weather—cloudy and unseasonably warm. Harvesting of *aman* paddy continues. *Rabi* crops doing well. No cattle-disease reported from Feni or Sudder subdivision. Supply of water and fodder good. Price of common rice at Feni 15 seers and at Sudder head-quarters 14 seers per rupee.
	14	Tipperah " 19, '91	Nil	Weather—seasonable. Harvesting of *aman* going on. Winter crops progressing. Fodder sufficient. No cattle-disease.
	15	Chittagong Hill Tracts. " 17, '91	Nil	Weather—unseasonable. Cloudy and very hot during midday. Harvesting and gathering of paddy continue. Cold-weather crops not doing well. Price of common rice 9 seers 6¼ chittacks per rupee.

Division	No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—concld.					
DACCA DIVN.	16	Dacca	Dec. 19, '91	Nil	Weather—less cold than it ought to be at this time of the year. Harvesting of *aman* going on. Prospects of *rabi* crops good. Fodder available. Common rice selling at from 13 to 18 seers per rupee. Condition of cattle good.
	17	Furreedpore	„ 19, '91	Nil	Weather—seasonable. Harvesting of *aman* and sowing of winter crops nearly finished. Rice selling at 16, 16, and 15 seers per rupee at Sudder, Madaripore, and Goalundo respectively. Condition of cattle good and fodder available.
	18	Backergunge	„ 19, '91	Nil	Weather—seasonable. Prospects of crops good. Common rice sells at from 10 to 17 seers per rupee. Fodder and water sufficient. Cattle-pox reported from Bhandaria and Matbaria.
	19	Mymensingh	„ 19, '91	Nil	Weather—cold. Prospects of crops fair. Gathering of winter crops nearly completed. Coarse rice sells on an average at 16 seers per rupee. Condition of cattle good. Supply of fodder and water sufficient except in Kishoregunge subdivision.
RAJSHAHYE DIVN.	20	Dinagepore	„ 19, '91	Nil	Weather—cool. Winter rice still being harvested. Prospects of standing crops unchanged. Land being prepared for *bhadoi*. Price of rice at Sudder 14½ seers per rupee and at Thakurgaon 11 seers. Condition of cattle good. Supply of fodder and drinking water sufficient.
		Thakurgaon	...	Nil	
	21	Rajshahye	„ 19, '91	Nil	Weather—seasonable. Harvesting of *aman* continues. Prospects remain unaltered. Condition of standing crops (tobacco, mustard, turmeric, sugarcane, &c.) good. Prospects of *ganja* good; insects causing some damage. Price of common rice ranges from 12 to 18 seers per rupee. No cattle-disease. Fodder and water-supply sufficient.
		Nattore	..	Nil	
		Nowgong	...	Nil	
	22	Rungpore	„ 19, '91	Nil	Weather—seasonable. Prospects unchanged. Tobacco looking well. Price of rice stationary from 9 to 14 seers per rupee. Fodder and water sufficient.
		Gaibanda	...	Nil	
		Nilphamari	...	Nil	
		Kurigram	...	Nil	
	23	Bogra	„ 19, '91	Nil	Weather—clear and seasonable. Prospects of *rabi* favourable. *Aman* 8 annas for the whole district. No want of fodder and water. Price of rice (new) varies from 13½ to 16 seers per rupee.
		Sherpur	...	Nil	
		Nowkhilla	...	Nil	
	24	Pubna	„ 19, '91	Nil	Weather—seasonable. State of standing crops fair. Rain wanted. *Aman* paddy being reaped; yield 10 annas. Common rice selling at 13 seers per rupee. Water-supply and fodder sufficient. No cattle-disease.
	25	Darjeeling	„ 19, '91	Nil	Weather—fair. Reaping of paddy going on everywhere. Prospects of mustard, *kalai*, and potatoes good. No cattle-disease. Fodder and water ample. Wheat and barley about 3 inches high in the hills. Big *marua* is still being harvested. Prices of common rice:— Srs. Silliguri ... ... 13 Nuxalbari ... ... 12 Kurseong ... ... 10 Kalimpong ... ... 10 Darjeeling ... ... 10 Joro Bungalow ... ... 10 Nagri ... ... 8 Sonadah ... ... 10 Pulbazar ... ... 11 } per rupee.
	26	Julpigoree	„ 19, '91	Nil	Weather—seasonable. Winter rice harvest in full swing. Outturn is unfavourably reported on. Prospects of *rabi* crops good. Common rice sells at 11 seers per rupee at Head-quarters and 9 seers per rupee at Alipur. No cattle-disease. Fodder and water-supply abundant.
BEHAR.					
BHAGULPORE DIVN.	27	Monghyr	„ 19 '91	Nil	Weather—cold and seasonable. Prospects unchanged. Rain badly wanted for *rabi* crop. Paddy being harvested. Prospects of poppy fair. Common rice selling at 11 and 12 seers per rupee in Begoserai, 15 seers in Jamui, and 12 to 17 seers in different parts of the Sudder. Fodder and water-supply sufficient.
		Begoserai	..	Nil	
		Jamui	.	Nil	
	28	Bhagulpore	„ 19, '91	Nil	Weather—seasonable. Prospect of *rabi* not improved. Harvesting of rice goes on, but outturn low. *Kurthi* being harvested; outturn fair. Price of common rice—old 12 seers 10 chittacks, new 14 seers 8 chittacks per rupee.
	29	Purneah	„ 19, '91	Nil	Weather—cool and dry. Harvesting of *aghani* continues, that of *kurthi* nearly complete. Prospects of *rabi* still fair, but rain will soon be needed. New rice selling at 11 seers at Kishengunge. In Arrareah and Head-quarters prices stationary. No scarcity of water or fodder.
		Kishengunge	...	Nil	
		Arrareah	...	Nil	
	30	Maldah	„ 19, '91	Nil	Weather—cool and bright. Harvesting of winter rice progressing throughout the district. Gathering of *kalai* has begun in some places. Wheat and other *rabi* crops doing well. Fodder and water-supply plentiful. No cattle-disease. Common rice selling at 11 to 16 seers per rupee. The present year is almost the same as 1888—neither better nor worse.
		Chanchal	...	Nil	
		Shibgunge	...	Nil	
		Gajole	...	Nil	
	31	Sonthal Perghs.	„ 19, '91	Nil	Weather—cool and pleasant, but too persistently dry. Paddy harvest going on; an outturn of from 8 to 12 annas expected; outturn worst in Rajmehal. *Rabi* will be short this year owing to drought. Common rice selling at from 15 to 22 seers per rupee. Price highest as usual in Rajmehal. Fodder sufficient.

No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BEHAR—*concld.*				
Patna Division.				
32	Patna Barh	Dec. 19, '91 ...	Nil Nil	Weather—cool and clear. Paddy still being harvested in some places. Prospects of *rabi* and poppy fair, but rain urgently wanted. Mustard and *rahar* in flower and in ear. Prices of food-grains almost stationary.
33	Gya Jehanabad Aurungabad Nawada	" 19, '91	Nil Nil Nil Nil	Weather—cold. Harvesting of paddy continues. *Rabi* crops require rain. Poppy doing well. Prices of food-grains stationary. Supply of fodder and water for cattle yet sufficient.
34	Shahabad Buxar Bhabuah Sasseram	" 19, '91	Nil Nil Nil Nil	Weather—cool. Prospects unchanged. *Rabi* will do fairly well if rain falls in the next two or three weeks. Sugarcane harvest proceeding. Poppy harvest about finished. Opium promises well. Prices rising in Bhabuah.
35	Durbhunga	" 19, '91	Nil	Weather—seasonable. Harvesting of rice continues. Rain wanted everywhere for *rabi* crops. *Rahar* good. Prospects of poppy not favourable. Fodder and water-supply for cattle sufficient. Price of common rice varies from 13 to 15 seers per rupee.
36	Mozufferpore Hajipur Sitamarhi	" 19, '91	Nil Nil Nil	Weather—cool and clear. Harvesting of paddy, *urid*, and *kurthi* in progress. *Rabi* in low lands and where irrigated doing fairly well, elsewhere suffering for want of rain. Poppy sowings in irrigated tracts in Hajipur Sub-Agency coming on well; in unirrigated lands seeds have failed to germinate everywhere. In Tirhoot Sub-Agency poppy has failed in several plots though sown twice and thrice, water-supply being very scanty. Cattle doing well. No scarcity of water and fodder for them. Prices as below:— Wheat. Barley. Rice (common). Makai. Marua. Srs. Srs. Srs. Srs. Srs. Sudder ... 12 25 13 21 ... } Sitamarhi ... 13 22¼ 14 23 24 } per rupee. Hajipur ... 13½ 27 14 22 ... }
37	Sarun	" 19, '91	Nil	Weather—cold and fine. *Rabi* being irrigated and doing well. Poppy plants healthy in Sewan. About 1,200 bighas have failed. Water and fodder for cattle sufficient. Prices of common rice:— Srs. Ch. Chupra ... ... 13 0 } Sewan ... ... 15 12 } per rupee. Gopalgunge ... ... 14 6 }
38	Chumparun	" 19, '91	Nil	Weather—seasonable. Paddy is being reaped. *Rabi* being weeded. State of standing crops fair. Prospects of poppy satisfactory. Prices stationary. Fodder and water for cattle sufficient.
ORISSA.				
Orissa Divn.				
39	Cuttack	" 19, '91	Nil	Weather—seasonable and dry. *Sarad* rice is being harvested. *Mung* attaining maturity. Common rice selling at 13¼ seers per rupee at Head-quarter and 21 seers at Kendrapara and Jajpore. Fodder-supply sufficient.
40	Pooree	" 17, '91	Nil	Weather—cool. *Laghu* rice being collected. *Sarad* rice being reaped. *Dalua* rice being sown. Miscellaneous crops doing well. Common rice sells at from 15¾ to 21 seers per rupee. Cattle-disease reported from Khoorda, Banpur, Kuspalla, and Dandimal.
41	Balasore	" 19, '91	Nil	Weather—seasonable. Harvesting of winter rice still continues. Outturn of *sarad* rice estimated at 12 annas in Bhadrak and 13 annas in Sudder. Prospects of *biri*, *mung*, and mustard good. Rice selling at 19 seers per rupee.
CHOTA NAGPORE.				
South-West Frontier Agency.				
Chota Nagpore Divn.				
42	Hazaribagh Giridih	Dec. 19, '91 ...	Nil Nil	Weather—seasonable. Rain greatly wanted for *rabi* crops; outturn likely to be seriously affected. Poppy doing fairly so far. Common rice selling at from 12 to 17 seers per rupee. Fodder and water-supply sufficient.
43	Lohardugga Palamow (up to 14th)	" 19, '91	Nil Nil	Weather—seasonable. Harvesting of winter rice finished. Rain still badly wanted for *rabi* crop. Common rice selling at 15 seers per rupee. Fodder and water plentiful.
44	Singbhoom	" 19, '91	Nil	Weather—seasonable. Harvesting of rice crop continues. Cold-weather crops on the ground doing well. There is sufficient fodder for cattle.
45	Manbhoom Govindpore	" 19, '91 ...	Nil Nil	Weather—seasonable. Prospects of all crops satisfactory. Rice selling at from 18 to 22 seers per rupee. Fodder and water-supply sufficient.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last
The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 19th of December 1891.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	Of week. Mean for district.	Of week. Normal mean.	District observations. Rainfall. Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 16th October 1891. Mean for district.	Since 16th October 1891. Normal mean.	Since 16th October 1891. Variation.	Of week. Average number of rainy days.	Of week. Normal number of rainy days.	Representative station.	District.	Meteorological Division.

Explanation.—......indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the 22nd December* 1891.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY THE 19TH OF DECEMBER 1891.

At the close of the previous week ordinary north-east monsoon conditions obtained in Bengal, and these have continued practically without interruption in almost all districts throughout the present week. There have been the usual slight oscillations of pressure, temperature, &c., but fine settled weather has prevailed except for one or two days in the Chittagong district, where a few drops of rain fell on the 15th to the 17th instant. On the 13th the barometric changes were very small, and at some stations pressure was rising and at others falling, while temperature on the whole had fallen slowly on this day. In the south-west corner of the Bay a feeble barometric depression had formed on the 12th, or the last day of the previous week, and on the 13th it had given rather heavy rain to the South Madras coast, but the depression was evidently commencing to fill up. On the 14th in Bengal pressure fell rather rapidly, though it still remained above the normal, while the temperature changes were generally in an upward direction. In the south of the Bay the barometric depression had continued to fill up, but there had again been heavy rain at some of the Madras stations, and weather still continued in a disturbed state in the southern half of the Bay. On the 15th pressure continued to fall very slowly in Bengal, and temperature had again risen slightly and had become above the normal in all districts. In the south-west of the Bay, also, pressure had risen slowly, and though strong winds continued to be reported over the southern half of the Bay, there was no evidence of the existence of any depression. Pressure again fell slowly in Bengal on the 16th, and temperature also rose moderately, while over the Bay pressure was rising along the Madras coast and falling elsewhere, and strong winds were still blowing in the centre and south of the Bay, and weather was distinctly disturbed over that area. It was about this period that skies became rather clouded over in parts of South-East Bengal and a few unimportant showers were reported. On the 17th the continued fall of pressure in Bengal had ceased, and was succeeded by a rather brisk rise, which caused pressure to become almost normal; but temperature, on the other hand, continued to rise at many stations, and was from about 2° to 6° above the normal. Over the southern half of the Bay, also, the disturbed conditions with rather strong winds continued, and these conditions had probably advanced northwards in the Bay, though they were confined to the sea area, and weather in Bengal was practically unaffected by them. On the 18th a further slight rise of pressure was generally reported, but temperature was steady, and in the Bay the conditions were similar to those of the 16th and 17th On the 19th, however, a further moderately rapid rise of pressure took place in Bengal, and the general pressure of the province became about a twentieth of an inch in excess of the normal, while temperature commenced to fall slowly, but the mean temperature was still above the normal by about 2° to 4° or 5°; a very light shower was, however, reported from Noakholly on this day. On the 19th also the conditions in the Bay began to improve, and winds in the centre and south fell off in force, and from this day again weather conditions in the Bay became more normal.

It will therefore be seen that ordinary cold season conditions have been present practically uninterruptedly throughout the week in Bengal, but that in the centre and south of the Bay the weather conditions have been very decidedly disturbed for almost the whole of this period.

Pressure—Fell for the first three or four days of the week and rose for the remaining portion. The mean pressure for the whole period has therefore not been very far removed from the normal, and at many stations in South Bengal and Orissa the variations only equal a few thousandths of an inch. At the stations further inland, however, pressure has been in distinct excess of the normal, the excess usually equalling about 0·02″ or 0·03″.

Temperature—Rose for about the first four or five days and fell at the close of the week, but almost on every day and at most stations temperature was above the normal. For the whole province the mean temperature for the week has been 1·5° in excess; but the excess has been largest in Orissa and East Bengal, where it has equalled more than 2°, while, on the other hand, temperature has been almost normal in Behar.

This variation of temperature is, however, most clearly seen in the table below, where the average maximum, minimum, and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period

From this table it will be seen that the principal variations have again occurred in the day or maximum temperatures, which average about 3° above the normal, while the night or minimum temperatures have been nearly normal :—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 19th December 1891.

	Normal mean maximum temperature for the week ending 19th December.	Actual mean maximum temperature for the week ending 19th December 1891.	Variation of actual mean from the normal. Rainfall.—Except for a few drops of rain in the Chittagong and Noakholly districts, the whole province has again been rainless throughout the week.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 19th of December 1891 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th Oct. 1891.	
			Of highest of each day.	Of lowest of each day.	Of mean for each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

The total fall from 1st January to 19th December 1891	46·93
The average fall of the corresponding period for 24 years, S.-G.'s Office ..	65·23

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph

The mouth of the rain-gauge is one foot above the ground.

▲, dew; ≡, fog.

C. Little,
For Meteorological Reporter to the Govt. of India.

Meteorological Office, Govt. of India;
Calcutta, the 21st December 1891.

Results of the Barometrical and Thermometrical Observations taken at the Meteorological Office, Chowringhee, from 13th to 19th December 1891.

Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 26th December, 1891.

	No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL.				
BURDWAN DIVN.	1	Burdwan Dec. 26, '91	Nil	Weather—seasonable. Harvesting of winter rice still going on. Prospects of *rabi* crops and sugarcane good. Prices of rice :— Srs. Sudder ... ... 13½ to 17 } Culna ... ... 14 } per rupee. Cutwa ... ... 15 } Raneegunge ... ... 15½ }
		Culna ...	Nil	
		Cutwa ...	Nil	
		Raneegunge ...	Nil	
	2	Bankoora „ 26, '91	Nil	Weather—seasonable. Harvesting of winter rice nearly finished. *Rabi* plants and sugarcane thriving. Condition of cattle good. Supply of fodder and water sufficient. Common rice selling at 17½ seers per rupee at the Sudder as well as at the Bishenpur market.
	3	Birbhum „ 26, '91	Nil	Weather—fair and cool. Harvesting of winter rice still going on. Prospects of *rabi* fair. Supply of fodder and water sufficient. Common rice selling at from 14 to 18½ seers per rupee.
		Rampore Haut ...	Nil	
	4	Midnapore „ 26, '91	Nil	Weather—fine and cool. *Aman* harvest nearly finished. Indigo and sugarcane doing well. Prices of common rice :— Srs. Sudder ... ... 17 } Contai ... ... 18 } per rupee. Tumluk ... ... 14 } Ghatal ... ... nearly 16 }
	5	Hooghly „ 26, '91	Nil	Weather—seasonable. Harvesting of *aman* still going on. Prospects of *rabi* tolerably fair; crop being irrigated in places. No difficulty in obtaining fodder and water-supply. Prices of common rice :— Srs. Sudder ... ... 12 } Serampore ... ... 13 } per rupee. Jehanabad ... ... 16 }
		Serampore ...	Nil	
		Jehanabad ...	Nil	
	6	Howrah „ 26, '91	Nil	Weather—fine. Harvesting of *aman* crop well advanced. Outturn somewhat below an average one. Sugarcane crop good. Price of common rice 13 to 14 seers per rupee. Health of cattle good. Fodder and water-supply sufficient.
		Uluberia ...	Nil	
PRESIDENCY DIVN.	7	24-Perghs. „ 26, '91	Nil	Weather—seasonable. Harvesting of *aman* still continues. Prospects of standing crops unchanged. Price of rice stationary from 12½ to 15 seers per rupee. Condition of cattle good. No deficiency of fodder or want of water for cattle.
	8	Nuddea „ 26, '91	Nil	Weather—seasonable. Harvesting of *aman* not yet over. Prospects of cold-weather crops not improved for want of rain. Common rice selling at from 11 seers to 15 seers per rupee. Supply of water and fodder sufficient.
		Kushtea ...	Nil	
		Chuadanga ...	Nil	
		Ranaghat ...	Nil	
		Meherpore ...	Nil	
	9	Khoolna „ 26, '91	Nil	Weather—cold and fair. Harvesting going on. Prospects of *aman* fair. Price of common rice 14 to 16 seers per rupee. Fodder and water sufficient.
		Bagirhat ...	Nil	
		Satkhira ...	Nil	
	10	Jessore „ 26, '91	Nil	Weather—seasonable. *Aman* paddy being harvested: very poor outturn from short rain. Winter crops for the same reason do not promise well. Fodder and water sufficient.
		Jhenidah ...	Nil	
		Magurah ...	Nil	
		Narail ...	Nil	
		Bongong ...	Nil	
	11	Murshedabad „ 26, '91	Nil	Weather—cold. Winter rice is still being harvested. Prospects of *rabi* crops not favourable. Harvesting of *kalai* almost finished. Fodder obtainable for cattle.
CHITTAGONG DIVN.	12	Chittagong „ 29, '91	Nil	Weather—seasonable. Harvesting of winter rice continues. Prospects unchanged. Prices stationary.
	13	Noakhally „ 26, '91	Nil	Weather - seasonable. *Aman* paddy is being harvested. *Rabi* crops doing well. No cattle-disease. Fodder and water available. Common rice 15½ seers per rupee at head-quarters and 16 seers per rupee at Feni.
	14	Tipperah „ 26, '91	Nil	Weather - seasonable. *Aman* is being rapidly harvested. Winter crops doing well. No cattle-disease.
	15	Chittagong Hill Tracts. „ 24, '91	Nil	Weather—cloudy during the first part of the week. Gathering of late plough-paddy continues. Mustard and other cold-weather crops progressing. Price of common rice 11 seers 10 chittacks a rupee.

No.	District and date of return.	Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BENGAL—*concld.*			
DACCA DIVN.			
16	Dacca Dec. 26, '91	Nil	Weather—seasonable. Harvesting of *aman* going on. Prospects of standing crops fair. Fodder available. Condition of cattle good. Common rice selling at from 14 to 17 seers per rupee.
17	Furreedpore „ 26, '91 Goalundo ... Madaripore ...	Nil Nil Nil	Weather—seasonable Harvesting of *aman* nearly finished; that of *mug* and *kalai* in progress. Rice selling at 16 seers per rupee. Condition of cattle good and fodder available.
18	Backergunge „ 26, '91	Nil	Weather—seasonable. Prospects of crops good. Common rice sells at from 10 to 18 seers per rupee. Fodder and water sufficient. Cattle-pox reported from Bhandaria, Matbaria, and Golachipa.
19	Mymensingh „ 26, '91	Nil	Weather—cold. Prospects of crops fair. Coarse rice sells at 14 seers 12 chittacks per rupee. Condition of cattle good. Supply of water and fodder sufficient.
RAJSHAHYE DIVN.			
20	Dinagepore „ 26, '91 Thakurgaon ...	Nil Nil	Weather—seasonable. Harvesting of winter rice not yet finished. Prospects of standing crops continue unchanged. Land being prepared for *bhadoi*. Price of rice at Sudder 13 seers per rupee and at Thakurgaon 11 seers. Condition of cattle good. Supply of fodder and drinking-water ample.
21	Rajshahye „ 26, '91 Nattore .. Nowgong ...	Nil Nil Nil	Weather—seasonable. Prospect of *aman* continues unaltered. Expected outturn varies from 6 annas to 10 annas; the average will be about 8 annas. Condition of winter crops good. Pressing of sugarcane going on. Prospect of *ganja* good Price of common rice varies from 12 to 18 seers, the average being 15 seers. Condition of cattle good. Fodder and water-supply plentiful.
22	Rungpore „ 26, '91 Gaibanda ... Nilphamari ... Kurigram ...	Nil Nil Nil Nil	Weather—cold and clear. *Aman* paddy being harvested. Outturn slightly better than estimated in parts of Nilphamari and Gobindgunge thana. Price of rice falling slightly except in the Kurigram subdivision. It ranges from 17 seers in Gaibanda to 11 seers in Kurigram. Prospects of sugarcane and cold-weather crops fair. Fodder sufficient.
23	Bogra „ 26, '91 Sherpur ... Nowkhilla ...	Nil Nil Nil	Weather—seasonable. Harvesting of *aman* not yet finished. Prospects of *rabi* favourable. An average 8-anna crop of *aman* expected. No cattle-disease. Fodder and water sufficient. Price of rice stationary.
24	Pubna „ 26, '91	Nil	Weather—seasonable. State of standing crops fair; rain wanted. *Aman* harvest yielding 10 annas. Common rice 13 seers per rupee. Water-supply and fodder sufficient.
25	Darjeeling „ 26, '91	Nil	Weather—fair. *Marua* and *aghani* paddy have been cut. Wheat and barley promising well. Prospects good. Prices of common rice:— Srs. Silliguri ... ... 11 Kurseong ... ... 10 Kalimpong ... ... 10 Darjeeling ... ... 11 Pulbazar ... ... 11 Jore Bungalow ... ... 12 Nagri ... ... 8 Sonadah ... ... 12 } per rupee.
26	Julpigoree „ 26, '91	Nil	Weather—seasonable. Harvesting of *haimanti* continues; outturn not favourable. *Rabi* crops doing well. Common rice sells at 11 and 12 seers per rupee at head-quarters, while 10 seers at Alipore and other thanas. No cattle-disease. Fodder and water-supply sufficient.
BEHAR.			
BHAGULPORE DIVN.			
27	Monghyr „ 26, '91 Begusarai ... Jamui ..	Nil Nil Nil	Weather—seasonable. Outturn of rice 2 annas only at Jamui. *Rabi* doing well still. Rain much wanted. Poppy sowings nearly completed. Prospects continue fair. Fodder and water-supply sufficient.
28	Bhagulpore „ 26, '91	Nil	Weather—seasonable: colder than last week. Harvesting of rice going on. Prospects of *rabi* not improved. Rain badly wanted. Common rice—old 12 seers, new 12 seers 10 chittacks per rupee.
29	Purneah „ 26, '91 Kishengunge ... Arrareah ...	Nil Nil Nil	Weather—cold and clear. No material change. *Aghani* harvest continues. Prospects of *rabi* still fair, but rain is needed. In most places there is ample fodder and water, but a first note of scarcity is being sounded at Gondwara in the Suddor subdivision. Price of rice stationary.
30	Maldah „ 26, '91 Shibgunge ... Gajole ...	Nil Nil Nil	Weather—seasonable. Harvesting of winter rice still going on. Gathering of *kalai* also in progress. Wheat and other *rabi* crops thriving. Cattle-pox reported from Ratna and Sibgunge thanas. Supply of fodder and water sufficient. Common rice sells at from 11 to 15¼ seers per rupee.
31	Sonthal Perghs. „ 26, '91	Nil	Northerly winds. Cold weather has set in; dry. Rice harvest continues; outturn 8 to 14 annas. Worst report from Rajmehal. Water-supply very short. No immediate fear of distress.

Division	No.	District and date of return.		Rainfall at Sudder Station in inches.	Character of the weather and state and prospects of the crops.
BEHAR—*concld.*					
Patna Division.	32	Patna	Dec. 26, '91	Nil	Weather—cool and clear. Harvesting and threshing of paddy going on. *Rabi* and poppy doing well, but rain wanted. Prices of food-grains almost stationary. In the corresponding week of the previous year, the *rabi* and poppy crops were reported to promise well, but were wanting rain, and the prices were showing a tendency to fall.
		Barh	...	Nil	
		Behar	...	Nil	
	33	Gya	„ 26, '91	Nil	Weather—cold and fair. Paddy harvesting going on. Prospect of *rabi* continues the same. Condition of poppy good. Prices of food-grains almost stationary. Supply of fodder and water sufficient.
		Jehanabad	...	Nil	
		Nawada	...	Nil	
		Aurungabad	...	Nil	
	34	Shahabad	„ 26, '91	Nil	Weather—seasonable. *Rabi* crops generally doing well, except on light sandy soils without facilities for irrigation. Peas, gram, mustard, *rahar* and *khesar* are in flower. Wheat and barley promising. Sugarcane being pressed. Prices steady. Food-supply and fodder abundant, but water-supply in the west of Bhabuah shows signs of failing.
		Buxar	...	Nil	
		Bhabuah	...	Nil	
		Sasseram	...	Nil	
	35	Durbhunga	„ 26, '91	Nil	Weather—cold, with west winds. Rain has not fallen and prospects of *rabi* show no improvement. Mustard and *rahar* in flower. Poppy doing fairly since the weather has become colder. Price of common rice varies from 13 to 16 seers per rupee. Fodder and water-supply sufficient.
	36	Mozufferpore	„ 26, '91	Nil	Weather—cool and clear. Harvesting of paddy in progress. *Rabi* in low lands doing well; elsewhere suffering for want of rain. Poppy in irrigated tracts coming on well; elsewhere failed in several plots though sown twice and thrice. Cattle doing well: no scarcity of water and fodder for them. Prices as below:— Srs. Common rice ... ... 13 } Wheat ... ... 12 } per rupee. Barley ... ... 24 } Makai ... ... 22 }
	37	Sarun	„ 26, '91	Nil	Weather—cold and clear. Irrigation of *rabi* continues and the crop is doing well. Poppy backward in many places owing to failure of first sowings. Fodder and water sufficient. Prices of common rice are:— Srs. Ch. Chupra ... ... 13 0 } Gopalgunge ... ... 15 0 } per rupee. Sewan ... ... 15 8 }
	38	Chumparun	„ 26, '91	Nil	Weather—seasonable. Paddy being reaped. *Rabi* being weeded. State of standing crops fair. Rain wanted for *rabi*. Supply of water and fodder for cattle sufficient.
ORISSA.					
Orissa Divn.	39	Cuttack	„ 26, '91	Nil	Weather—seasonable and cold. *Sarad* rice being harvested. *Rabi* doing well. Supply of fodder sufficient and condition of cattle good. Common rice sells at 12½ seers per rupee in Sudder and 20 seers in the interior.
	40	Pooree	„ 24, '91	Nil	Weather—cool. *Sarad* rice being reaped. *Dalua* rice being sown. Miscellaneous crops doing well. Common rice sells at 12½ to 24 seers per rupee. Cattle-disease reported from Dandimal, Begunia and Khorda stations.
	41	Balasore	„ 26, '91	Nil	Weather—seasonable. Harvesting of winter rice continues. Prospects of *rabi* good. Rice selling at 19 seers per rupee.
CHOTA NAGPORE.					
South-West Frontier Agency.					
Chota Nagpore Divn.	42	Hazaribagh	Dec. 26, '91	Nil	Weather—seasonable. *Rabi* crops doing well, but suffering for want of rain. Common rice selling at from 13½ to 16 seers per rupee. Water-supply sufficient.
		Giridih	..	Nil	
	43	Lohardugga	„ 26, '91	Nil	Weather—seasonable. Harvesting of winter rice finished. Want of rain badly felt for *rabi* crops. Common rice selling at 15 seers per rupee. Fodder plentiful.
	44	Singbhoom	„ 26, '91	Nil	Weather—seasonable. Everything satisfactory. Cold-weather crops on ground doing well. *Kurthi* and *serguja* being harvested.
	45	Manbhoom	„ 26, '91	Nil	Weather—seasonable. Rain badly wanted for cold-weather crops. Prospects so far fairly satisfactory. Rice selling at from 18 to 22 seers per rupee.
		Govindpore	.	Nil

The average fall of the corresponding period for 24 years, S.-G.'s Office ...	65·23

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h, 10h, 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph

The mouth of the rain-gauge is one foot above the ground.

o, overcast; ⌓, dew.

C. LITTLE,

For Meteorological Reporter to the Govt. of In

METEOROLOGICAL OFFICE, GOVT. OF INDIA;

Calcutta, the 28th December 1891.

* Mean of 6 days.

Explanation.—Summary.—The normal means of air pressure and temperature are the arithmetical average or means of the reading during the same period for the last … The *humidity* of the atmosphere is expressed at percentage, saturated air being presented by 100. A clear sky is denoted by 0 and an overcast sky by 10. The numbers are the numerical means or average of the rainfall in that district determined from the returns sent in by the sub-divisional station for the period in question during the past … stations in the district sending in returns divided by the number of stations. A rainy day is one on which at least a tenth of an inch fell.

for the week ending Saturday, the 26th of December 1891.

Average humidity at 8 A.M.	Average cloud amount at 8 A.M. for week.	Rainfall of week at observing station.	Of week. Mean for district.	Of week. Normal mean.	District observations. Rainfall. Since 1st of month. Mean for district.	Since 1st of month. Normal mean.	Since 1st of month. Variation.	Since 16th October 1891. Mean for district.	Since 16th October 1891. Normal mean.	Since 16th October 1891. Variation.	Of week. Average number of rainy days.	Of week. Normal number of rainy days.	Representative station.	District.	Meteorological Division.

Explanation.—..... indicate that no rain has fallen. If the return for any day has not been received, the corresponding space is left blank. If any of the returns are wanting, the corresponding spaces in the total rainfall columns are left blank. With reference to the column of rainy days, the definition of a rainy day is when at least 0·1 inch of rain has fallen.

CALCUTTA, *the 29th December* 1891.

SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL FOR THE WEEK ENDING 8 A.M., SATURDAY, THE 26TH OF DECEMBER 1891.

THE meteorological conditions in Bengal during the past week only call for very brief comment, for ordinary north-east monsoon conditions have continued quite uninterruptedly throughout the week, and the only changes which have occurred have been of the usual oscillatory character which accompany fine weather. On the 20th pressure had risen very slowly, and was above the normal by about a twentieth of an inch. Temperature was generally falling moderately, though it still continued above the normal of the day by amounts which generally ranged from 1° to 3°; a steady northerly and north-westerly wind current was blowing over the whole province, humidity was fairly low, the sky was only lightly clouded, and there was no rain. On the 21st the pressure changes were again very small; while temperature continued to fall slowly, but it was still considerably above the normal. On the 22nd a slight to moderate fall of pressure took place, though pressure still remained above the normal, while the temperature changes were a little variable and, if anything, they had an upward tendency. On the 23rd pressure had risen rather rapidly, the rise equalling about 0·06", and pressure became nearly a tenth of an inch above the normal, while temperature on this day fell briskly at the northern stations, though at the southern stations it had increased, and the mean temperature was again above the normal by amounts ranging from about 1° at the northern stations to 4° and 5° at the southern stations. On the 24th again the barometer had risen by small amounts, and pressure became from a tenth to a sixth of an inch above the normal; but, on the other hand, there had been a rather rapid fall of temperature, amounting in some cases to 2°, though the mean temperature of the province was still distinctly above the normal. On the 25th the barometric changes were extremely small, but temperature continued to fall rapidly, the decrease in the mean of the day at some stations exceeding 4°, and the mean temperature became rather below the normal at the southern and western stations, though it was still above elsewhere. On the 26th pressure was generally falling slowly, though it still remained about a tenth of an inch above the normal, and the temperature changes were a little variable and the general distribution of temperature remained practically unchanged. Thus for almost the whole of the week the pressure changes have been unimportant, while as a rule temperature has been falling. Steady northerly winds of moderate strength have also prevailed throughout the week, and cloud proportion and humidity have remained low, and except for a light shower (0·16 inch) of rain reported from Chittagong on the 21st, the whole province has been rainless.

Pressure.—The mean pressure for the week has been in excess of the normal over the whole province. This excess has been largest in North and part of South Behar, where it has averaged more than a tenth of an inch, while in the southern districts it has usually equalled about 0·07" or 0·08".

Temperature—Fell rather rapidly towards the close of the week, but for the greater part of it the mean temperature was in considerable excess of the normal. For the whole week the mean temperature of the province was 1·3° above the normal, and this excess has been very evenly distributed in all divisions.

The variation of temperature is, however, most clearly seen in the table below, where the average maximum, minimum and mean temperatures for the week at nine typical stations in different districts of the province are compared with the normal values for the same period. It will be seen that the excess has, if anything, been rather larger in the day than in the night temperatures:—

Table showing the excess or defect of the actual mean temperature from the normal for the week ending 26th December 1891.

	Normal mean maximum temperature for the week ending 26th December.	Actual mean maximum temperature for the week ending 26th December 1891.	Variation of actual mean from the normal.	Normal mean minimum temperature for the week ending 26th December.	Actual mean minimum temperature for the week ending 26th December 1891.	Variation of actual mean from the normal.	Normal mean daily temperature for the week ending 26th December.	Actual mean daily temperature for the week ending 26th December 1891.	Variation of actual mean from the normal
Cuttack	81·0	81·2	+0·2	56·7	57·5	+0·8	68·7	69·4	+0·7

Darjeeling	45·7	48·1	+2·4	35·6	35·1	−0·5	41·4	41·6	+0·2

Rainfall.—Except for a slight shower (0·16 inch) at Chittagong on the 21st, the whole province has been rainless for the week.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the province for the week ending Saturday, the 26th of December 1891 :—

Meteorological Divisions.	Temperature.						Rainfall.									
	Highest observed during week.	Lowes observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th Oct. 1891.
